

About The Report

Reporting Principles and Standards

This is the seventh Sustainability Report published by BNK Financial Group. BNK Financial Group's annual Sustainability Report aims to disclose to stakeholders the economic, environmental, and social performance achieved through sustainability management practices.

Reporting Period and the Scope of Reporting

The Sustainability Report is based on sustainability management performance of BNK Financial Group from January 1 to December 31, 2018. For information that can make a significant impact on stakeholders' decision-making including governance, the report includes data up to the first half of 2019. Data for three years is also presented to help readers quantitatively identify progress.

Scope of Reporting

The report covers eight affiliates of the BNK Financial Group - Busan Bank, Kyongnam Bank, BNK Capital, BNK Securities, BNK Savings Bank, BNK Asset Management, BNK Credit Information, and BNK System. If necessary, performance related to overseas business is disclosed.

Reporting Principles and Standards

This report was written according to the Core option of the Global Reporting Initiative (GRI) Standards.

Financial information is written on a consolidated basis in accordance with the Korean International Financial Reporting Standards (K-IFRS). The balance for loans and deposits, customer satisfaction indicators, GHG emissions, and social contribution investments are covered in the report, based on the exclusive individual standards of BNK Financial Group.

Third Party Assurance

In order to ensure the reliability of reporting information, we have been verified by Korea Quality Foundation, a third party assurance report. The results of the verification are shown in p.102 of this report. Financial information was provided by an independent auditor's audit.

BNK Financial Group Included in the DJSI for Four Consecutive Years

For four consecutive years, BNK Financial Group was included in the Dow Jones Sustainability Index Asia-Pacific, an index jointly developed by S&P Dow Jones Indices of the U.S., which serves as a global institution that assesses and invests in sustainability management, and RobecoSAM of Switzerland. DJSI is the world's premier sustainability index for assessing financial performance, social contribution, and impact on the environment each year for the world's top 500 global companies. BNK Financial Group has been included in the DJSI for the past four years, having been recognized for its steady activities and efforts in key assessment areas, including favorable management performance, society, and the environment. BNK Financial Group will do its utmost to grow sustainably as a century-old company, while fulfilling responsibilities as a regional financial group.

CEO Message

BNK Financial Group will make the best efforts to grow and develop with you by fulfilling foundational roles in finance.

BNK Financial Group, established in March of 2011, has endlessly innovated and challenged itself despite the tough business environment at home and abroad. Such efforts have led the Group to establish itself as Korea's representative financial group with eight affiliates (Busan Bank, Kyongnam Bank, BNK Capital, BNK Securities, BNK Savings Bank, BNK Asset Management, BNK Credit Information, and BNK System). This is attributable to our stakeholder's unwavering trust and support for the Group as customers, shareholders and the local community. I would like to express my genuine gratitude once again on behalf of all employees at BNK Financial Group.

BNK Financial Group has shared not only its business strategies but also the values of corporate social responsibilities and its future roadmap through the annual Sustainability Report. Moreover, the Group has done the utmost to establish a transparent management system and a sound corporate culture under the goal of social responsibilities in the name of "Happy Finance, Giving Hope." As a result, the Group's prestige has been recognized in the global market by being included in the Asia-Pacific Index of the world's renowned DJSI (Dow Jones Sustainability Index) for four consecutive years.

BNK Financial Group promises to pour in further efforts to achieve the Group's mid- to long-term business goal of 'GROW2023, takeoff as a global financial group' through qualitative and quantitative growth, recognizing its calling as a group that has developed alongside the customers and the community for half a century. The Group seeks to implement the following values of priority for its sustainable development:

[Raising values for customers]

BNK Financial Group will provide differentiated customer services to ensure customers' success and financial happiness. The Group will also protect financial consumers from diverse financial difficulties, and run wideranging programs to enhance convenience in financial accessibility for financial consumers which will be developed further by reflecting thoughts and voices of customers throughout the business management.

Boosting transparency in corporate management and governance

BNK Financial Group will take the lead in making a variety of improvements to satisfy the social demands of 'transparent management systems' and 'advanced corporate governance.' The Group will strive to gain more trust by raising transparency in management and governance by fully guaranteeing the independence of the board of directors and appointing directors equipped with a broad spectrum of experiences and expertise.

「Creating social values in finance」

The Group will solidify the basis for all its affiliates to achieve continued growth together, while being attentive to such issues as human rights, labor, the environment and anti-corruption based on its management principle. Furthermore, the Group will push itself further to develop products with public interests for the underprivileged, and extend loans and investment for SMEs and start-ups. The roots of BNK Financial Group are embedded in the local community. The Group will fulfill the social responsibilities of finance by disseminating social contribution in the community and expanding support for education and mecenat projects.

Fostering talents – investment for the future

Amid the business expansion of companies in the non-financial sector such as communications, retail and IT, etc. and the launch of internet-only banks brought on by innovation in digital technologies, the financial sector is faced with a new paradigm. Also, the uncertainty in the internal and external management environment requires continuous changes and innovation.

BNK Financial Group plans to pour in significant investment and support for the future of its organization and employees in tandem with the Group's philosophy for talent management – 'Finance is centered on people.' Furthermore, the Group will make further efforts to establish a corporate culture where work-life balance can be embodied within BNK.

Lastly, I look back on what BNK has achieved so far through this report and I am delighted for an opportunity to dream a better future with you – customers, shareholders and the community. BNK Financial Group will make the best efforts to grow and develop with you by fulfilling foundational roles in finance. I sincerely ask for your genuine interest and encouragement. Thank you.

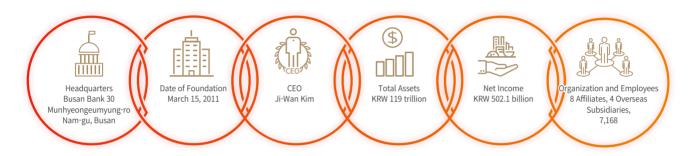

Outline of BNK Financial Group

Established on March 15th, 2011 as Korea's first financial holding company of local banks, BNK Financial Group acquired Kyongnam Bank in 2014 and changed its name into 'BNK Financial Holdings' in 2015. BNK Financial Group has established itself as Korea's top-notch regional financial group with eight affiliates, and for 2019, the Group strives to push for a takeoff as a global-standard financial group by announcing 'GROW 2023', the Group's mid-and long-term business strategy and new management vision.

Business Portfolio of Subsidiaries

Savings Banking The bank raises funds by taking deposits, and

provides long-term and short-term loans mainly to the underprivileged. Additionally, the bank provides other financial services, including domestic exchange and the services of the Korea Financial Telecommunications and Clearing Institute.

Credit Investigation and Collection Agency Service

This affiliate conducts investigations of debtors' assets and collects debt on behalf of creditors. Specifically, it looks into credit records, urges debtors to repay their debts, receives debt payments on behalf of creditors, and determines debtors' whereabouts.

Banking

Our two banks conduct all of major banking businesses such as taking deposits and providing loans, foreign exchange, payment guarantees, and the issuance of and investment in securities. In addition, it offers auxiliary services, including receiving payments into the National Treasury, and keeping securities in custody under the Banking Act, trust business, credit card business, and bancassurance services

BNK Securities
BNK Asset Managemen

Specialized Credit Finance

BNK Capital is a financial service provider that engages in installment financing, facility leases, commercial loans, and new technology project financing. It generates profit in a variety of fields including lease financing, auto financing, and corporate loans.

System Development and Supply

This affiliate is responsible for accurately analyzing customers' needs and providing integrated financial IT services, including system consulting, set-up, and operation, so as to proactively respond to the changing financial environment.

Financial Investment

Our two financial investment affiliates help distribute capital efficiently by providing financing options to those who need funds and investment opportunities to investors. They also perform investment trading, investment brokerage, collective investment, and discretionary investment according to the Financial Investment Services and Capital Markets Act.

Organization and Global Network of BNK Financial Group

BNK Financial Group runs 379 branches and 114 offices in Korea, and 28 branches and 3 representative offices abroad as of the end of 2018. BNK Capital, in particular, has subsidiaries in four locations in Southeast Asia and Central Asia including Myanmar, Laos and Kazakhstan, running a sales network focused on microfinance and automotive loans. They are expected to grow rapidly as automotive finance and microfinance markets have gradually expanded in those countries. Opening of a branch of BNK Capital in Kazakhstan in November 2018 is expected to be a gateway for advancing into the fast-growing Central Asia.

Vision and Management Strategy

Management Philosophy and Vision

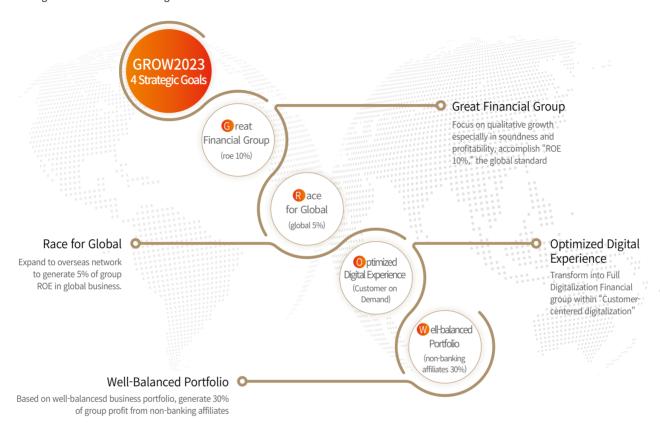

BNK Financial Group proactively implements detailed tasks in tandem with new management vision 'GROW2023' to grow into a "Global Standard Financial Group" based on the management Philosophy "Toward the world with the region, toward a better future with customers." BNK Financial Group has served as a reliable partner in regional finance and plans to grow as Global Standard Financial Group with unwavering love and encouragement of customers and the community.

BNK Financial Group will secure the world's best competitiveness based on asset soundness, non-interest income, and expansion of profit from non-banking affiliates to become a substantive Financial Group.

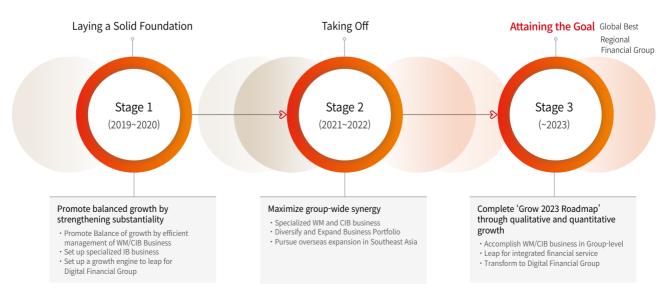

Group's Vision Map

Strategic Goals for the New Management Vision of GROW2023

Medium-and Long-Term Development Roadmap

2018 Highlights of BNK Financial Group

BNK Financial Group, Opening the CIB Center in Seoul

BNK Financial Group opened CIB Center in Seoul within Seoul Branch of BNK Securities in Yeouido on January 17, 2019 to reinforce corporate investment banking (CIB) and expand cross-affiliate synergies. Seoul CIB Center provides one-stop corporate banking solutions with 40 people as a specialized workforce in corporate banking (CB) and investment banking (IB) of Busan Bank, Kyongnam Bank and BNK Capital with IB business of BNK Securities at the core. The center offers wide-ranging corporate banking services including capital increase, issuance of corporate bonds, project financing and M&As along with corporate banking products including loans and foreign exchange products.

Opening the CIB Center in Seoul(2018. 1. 17)

BNK Financial Group, Opening 'BNK Talent Development Institute' to Reinforce Talent Development

BNK Financial Group opened BNK Talent Development Institute directly under the chairman on January 10, 2018 to reinforce competitiveness in the future and develop financial specialists. The institute conducts diverse training programs including cross-affiliate joint training, customized training, capacity build-up programs for the top management of the Group and capacity build-up programs for managers to-be (each department/division/branch manager in the banks). Opening of the institute to supervise employee training in all affiliates of BNK is expected to drive synergy as 'One Company.'

Opening 'BNK Talent Development Institute' (2018. 1. 10)

BNK Busan Bank, Extending KRW 7.5 Billion to Small Merchants in Ulsan

BNK Busan Bank signed an 'MOU for financial support for small businesses and merchants in Ulsan' with Ulsan Credit Guarantee Foundation on March 9, 2018. This agreement was signed to revitalize the local economy as it aims to help out financially stricken small businesses and merchants in Ulsan due to the slowdown in local backbone industries including shipbuilding and shrinkage in consumer confidence. BNK Financial Group will make steady efforts to realize values of shared finance and social finance to move ahead together with the region.

MOU for financial support for small businesses and merchants in Ulsan (2018. 3.9)

BNK Securities, Opening an Office

in the Financial Hub of Yeouido

BNK Securities completed a procedure to relocate its office to the main building of Samsung Life Insurance in Yeouido in Yeongdeungpo-gu as of January 1, 2018, reflecting the commitment of the CEO to kick off the securities business anew in Yeouido upon ushering in 2018. Yeouido is a hub of the domestic financial and securities sectors, accommodating Korea Exchange and the Financial Supervisory Service, and a place of flourishing interactions including information exchange with other securities companies.

Opening 'BNK Digital Innovation Center' for Digital Competency Buildup

BNK Financial Group opened 'BNK Digital Innovation Center' on 5F of the main branch building of Busan Bank on May 8, 2018 in order to boost the Group-driven R&D competency and spearhead digital transformation. BNK Digital Innovation Center is an organization to research new digital technologies to provide optimized digital services to customers by focusing on competency of digital specialists within the Group. BNK Financial Group plans to do the best to offer the Optimized Digital Experience to customers by opening the innovation center.

Opening of BNK Digital Innovation Center(2018. 5. 8)

BNK Capital,

Opening MFO BNK Kazakhstan LLP as the 4th Overseas Subsidiary

BNK Capital completed the opening of MFO BNK Kazakhstan LLP as the 4th subsidiary after the ones in Myanmar, Laos and Cambodia on November 6, 2018. Kazakhstan as the economic center of Central Asia has huge potentials for future development where the microfinance and automotive finance markets grow fast. While BNK Financial Group contributes to the economic growth of Kazakhstan by successfully tapping onto the retail banking market, the Group strives to achieve the new corporate vision of 'Race for Global.'

BNK Capital, Opening MFO BNK Kazakhstan LLP (2018. 11. 6)

BNK GROW 2023

#1. Great Financial Group 14

#2. Race for Global 15

#3. Optimized Digital Experience 16

#4. Well-Balanced Portfolio 17

#1. Great Financial Group

BNK Financial set a target of '10% for the Return on Equity (ROE)' which is a global standard to take off as a Great Financial Group. It implies that we will achieve the net income of KRW 1 trillion at BNK through 'qualitative' growth based on soundness and profitability of banking affiliates, and non-banking affiliates with a high ROE

Strategies for a Great Financial Group

Due to the rapidly changing financial environment, interest income in the banking sector has reached its limits, and growth in the capital market, instead, tends to stand out. As such, BNK Financial Group recognizes that the future competitiveness of the Group lies in boosting competitiveness in banking, intensifying non-banking business of high growth/high yield, and bolstering WM/CIB. We seek to move forward as a global-standards financial group by attaining the net income of KRW 1 trillion and the ROE of 10% by 2023 through robust competitiveness with a mid- to long-term approach

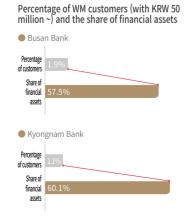

Measures to Intensify WM and CIB Competitiveness

Intensifying WM of the Group as a New Growth Engine

BNK Financial Group strives to expand WM customers at the Group level. Expansion of WM customers implies strategic meanings of dramatically improving the market share of Busan Bank and Kyongnam Bank beyond simply generating non-interest income. In fact, 1.9% of customers with over KRW 50 million in assets in Busan Bank possess 57.5% of total financial assets in the bank, while 1.1% of customers with over KRW 50 million in assets in Kyongnam Bank form 60.1% of financial assets.

Accordingly, BNK plans to provide high-quality customer management services by specifying and sophisticating customer management systems with a focus on core customers of the two banks at the Group level, and strive to make continued efforts to intensify WM throughout BNK.

Expanding the Basis for CIB to Intensify the Capital Market Business

BNK Financial Group plans to expand its CIB base by targeting high-growth markets through high-tech industrial hubs in the Seoul metropolitan area and innovative cities, and use a two-track strategy to leverage the regional target of the industrial hub in Busan, Ulsan and Kyongnam.

In addition, we plan to identify models for creation of new profits through the participation of GP / LP in corporate financial stability PEFs or private equity trusts for NPL investments considering the current internal and external environment. We will strive for growth in various ways, for example, by diversifying the bank asset portfolio.

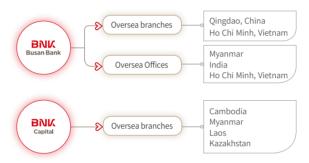

#2. Race for Global

BNK Financial Group seeks to enter new markets where growth potentials and profitability are guaranteed including Southeast Asia and Central Asia beyond Korea with more limitations as a regional financial group facing low growth and low margins.

Establishing Midand Long-Term Globalization Strategies

BNK Financial Group sets mid- and long-term strategies for global advancement for additionally exploring the new market in Asia, while refreshing on strategic values in the existing countries where BNK affiliates have already entered. While reviewing the market attractiveness for each target country based on market growth potentials and profitability, we devise sophisticated advancement strategies based on the success models for financial advancement in target countries.

BNK Financial Group's Overseas Advancement

Success Models of BNK Globalization

Success Models of BNK Globalization

BNK Capital has three overseas subsidiaries in Southeast Asia. The company does microfinance business in its subsidiaries in Cambodia and Myanmar, and its subsidiary in Laos mostly deals with auto loans.

Southeast Asia has not only a high population but also an increase in the market size and private consumption due to its recent economic growth, so auto finance and microfinance markets are expected to growth.

Moreover, with BNK Capital's advancement into Southeast Asia, Busan Bank and BNK Securities, etc. are reviewing a model for advancement by forming hybrid branches to create synergies with BNK Capital.

BNK Capital, Advancing into the Financial Sector in Kazakhstan

BNK Capital has conducted a market survey of Kazakhstan since 2016 and ended up establishing a subsidiary there in January 2018. Kazakhstan has great potentials in retail finance with low entry barriers for foreign investors and high interest rates for loans and its economy is on the rise as an economic center in Central Asia. BNK Capital plans to target the Kazakhstani market with 'two-track' strategies in consideration of the local needs and appropriate products. The company plans to focus on auto financing with high-yield products for cities with a high purchasing power, and approach other regions with profit-oriented microfinance products.

#3. Optimized Digital Experience

"Optimize Digital Experience" implies a conversion into a customer-centered digital financial group through full digitalization at the Group level. BNK Financial Group is committed to pushing for digitalization, believing it as an area for continued investment in the long-term perspective for survival in the future.

Operational Strategies for "Optimize Digital Experience"

BNK Financial Group has established approaches for driving full digitalization at the Group level, while planning on 'Digital Growth Roadmap' for enterprise-wide digital innovation and growth. We plan to wage efforts to boost enterprise-wide digital competencies by 2023 by designating such core factors for digitalization as sophisticating digital channels, innovating digital-based operations, facilitating synergies among affiliates through digital alignment, and expanding the digital-based financial business.

BNK's Digital Growth Roadmap

Establishing Infrastructure to Achieve Full Digitalization

BNK Financial Group adopts infrastructure for utilizing new digital technologies such as cloud, blockchain and open API, through which, the Group takes gradual approaches in establishing a system for full digitalization. Moreover, continued efforts are underway for multi-dimensional digitalization including acquiring a pool of digital specialists to set up digital infrastructure and intensifying R&D.

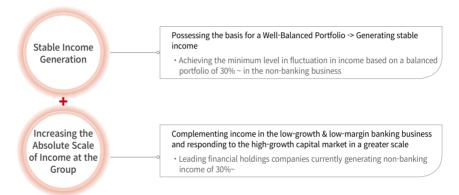

Cloud Blockchain Open API · Analyzing use cases for cloud in the financial sector • Providing services for collaborating with outside · Implementing pilot projects for blockchain · Discovering the areas of job functions where · Reviewing and selecting diversely applicable areas · Verifying through PoC and embodying · Sharing information among affiliates conversion into cloud is possible · Establishing strategies for conversion into cloud at · Initiating to expand the open API of Busan Bank at the Group level the Group level BNK Industry-Hankuk University of Foreign Studies Pusan National University Digital Innovation Center вик Academia Pohang University of Science D-IT Specialist Group at Busan Bank Cooperative UNIST and Kyongnam Bank Internal workforce and IT resources at the Group **BNK DT Advisory Committee BNK R&D** Blockchair Big data

#4. Well-Balanced Portfolio

BNK Financial Group established a strategic goal of 'Well-Balanced Portfolio' for increasing the portion of non-banking income, and diversifying its business suited to the global standard. To this end, we have achieved 30% for the portion of non-banking income, created stable income based on balanced portfolios and initiated expansion of the absolute scale of income.

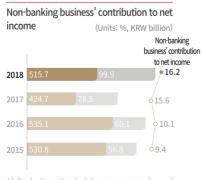

Strategies for a Well-Balanced Portfolio

Financial groups have recently focused on raising profitmaking in the non-banking sector proactively through business diversification instead of resorting to a profitmaking model centered on increasing interest income of their banks. Establishing diversified business portfolios implies a higher portion of the non-banking business, in which case, stable operating income can be generated despite changes in the external environment such as fluctuation in interest rate, foreign exchange rate and stock prices. BNK Financial Group plans to increase the portion of non-banking income up to 30%, through which, it seeks to put in place a substantial profit model.

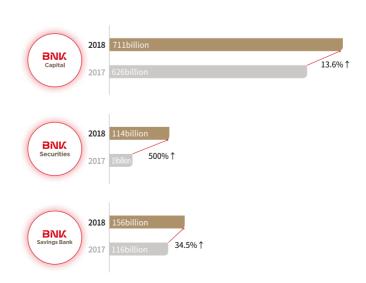

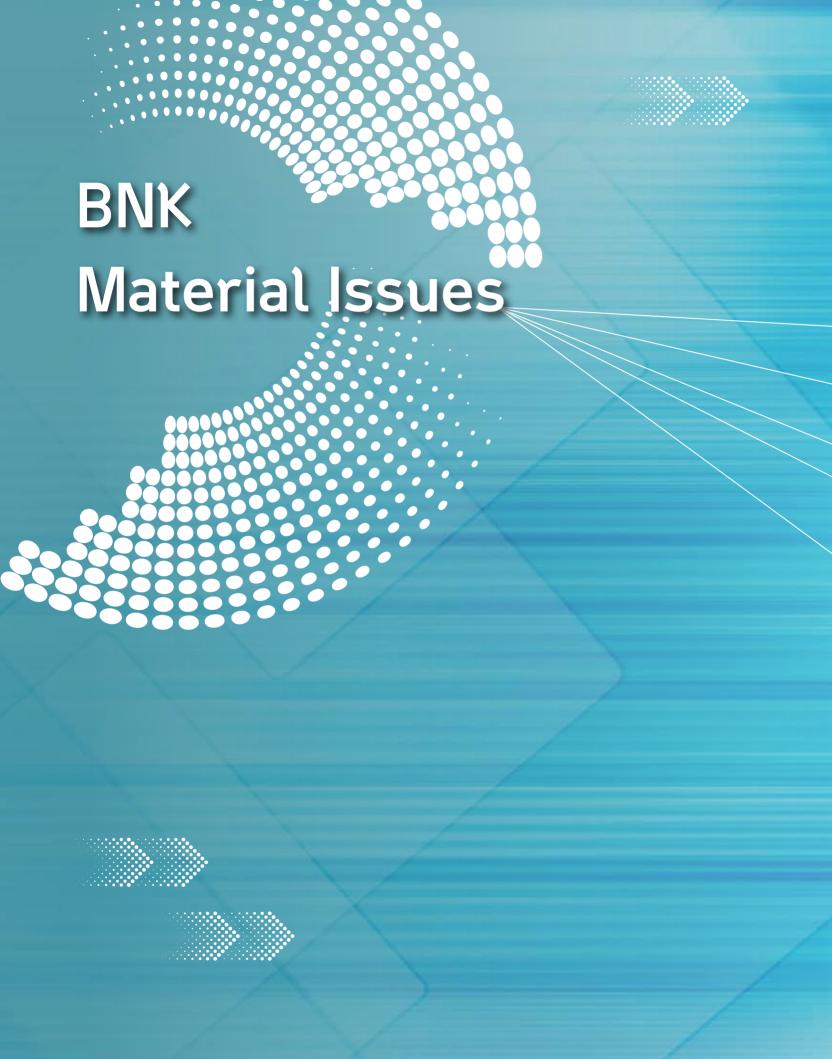

Performance in Non-Banking Business of BNK Financial Group

A higher portion in non-banking income of BNK has witnessed continued growth since 2015. Our net income in the non-banking business took up 16.2% out of total net income at the Group to reach KRW 99.9 billion. It is such an outstanding achievement compared to the contribution of net income at only 10% in 2015. We plan to make continued to efforts to strengthen profitability of non-banking affiliates and attain 30% in the portion of income.

- Excluding the holdings company's and consolidated returns
- 2) Prior to excluding the net income of noncontrolling interests

Engagement with Stakeholders and Materiality Test

Engagement with Stakeholders and Materiality Test

BNK Financial Group conducts a materiality test before publishing the annual Sustainability Report in order to identity interests of the stakeholders and effectively reflect them in our management activities. The Group formed a basic pool of issues based on relevant international standards and sustainable management indicators including GRI Standards, ISO 26000 and DJSI, and assessed priorities of issues for BNK's sustainable management reflecting results from media analysis, benchmarking of other companies and surveys completed by sustainable management experts and internal stakeholders. The issues that have been finally confirmed through this procedure are transparently disclosed in the Sustainability Report.

Stakeholders

BNK Financial Group defined five stakeholder groups to more efficiently manage the needs of stakeholders impacting our management activities, and communicates with them through diverse communication channels to identify their exclusive needs. Ethical management and economic issues were major concerns of stakeholders this year, which were reflected as key considerations upon selecting core issues for sustainable management of BNK.

Materiality Test and Results

#1. Forming a pool of issues for sustainable management

- · Reviewing international standards and indicators for
- sustainable management e.g. GRI Standards, ISO 26000, DJSI
 Forming a pool of 47 issues related to sustainable management

#2. Executing the materiality test for each issue

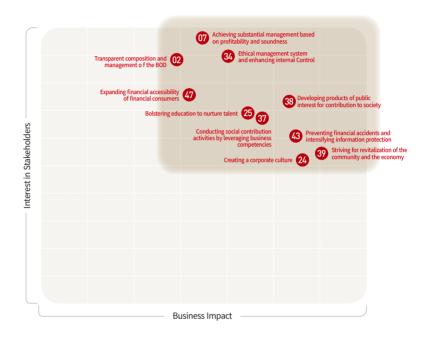

- Conducting media analysis, benchmarking and stakeholder analysis for the issue pool
- $\boldsymbol{\cdot}$ Implementing the materiality test and selecting top 10 issues
- Selecting the top 5 core issues

#3. Managing core issues

- Identifying risks/opportunities on the selected issues
- · Devising effective measures for response
- Transferring and managing major related activities and tasks

- Writing and revising the Sustainability Report
 Reporting to the management and receiving feedback
- Sharing it online and offline, and disclosing it to stakeholders

Preventing Financial Accidents and Protecting of Financial Consumers

Preventing Financial Accidents and Protecting Financial Consumers

The 'policy advisor panel for consumer protection' was launched

Amid increases in online financial transactions and non-face-to-face transactions, financial frauds involving the leakage of personal information have rapidly increased. As such, BNK Financial Group has further strengthened its system to prevent financial fraud by adopting the Fraud Detection System (FDS), which utilizes deep learning technologies and encrypts all unstructured customer information. Training and activities are conducted to prevent financial scams and protect financial consumers.

Activities for Protecting Financial Consumers

BNK Financial Group launched a policy advisor panel for consumer protection to reflect consumer demands to business management such as setting policy directions for protecting financial consumers and discovering improvements to be made in systems and processes in their perspective. The advisor group consisting of external specialists with expertise in consumer protection engages in diverse activities including discussing policies, and discovering and reviewing improvements to be made for consumer protection. The 'Policy advisor panel for consumer protection' was launched at Busan Bank for the first time in the banking sector in Korea in September 2018. In November, an 'advisory panel for consumer rights' was formed at Kyongnam Bank. This will empower consumer rights and better protect the consumers.

In October, a joint campaign for 'preventing voice phishing frauds' was carried out among BNK Financial Group, the Financial Supervisory Service and the provincial police agency. The campaign was designed to promote the severity of the damage of voice phishing crimes and know-how to address voice phishing. It was staged as an on-street campaign in the downtown areas of Busan and Changwon.

Protecting Financially Underprivileged Consumers

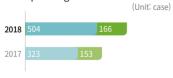

We conducted a project to perform 'Touring musicals to prevent financial frauds' to prevent financial accidents of elderly customers and provide financial education. Musicals on the theme of preventing financial frauds were staged at the main branches of Busan Bank and Kyongnam Bank in September and October of 2018, and 450 and 300 local senior financial consumers attended the shows, respectively.

Branches of the banks have also intensified their programs to protect underprivileged consumers. Windows and services exclusively for the financially underprivileged including the elderly and the disabled have been provided since early 2018 to enhance their convenience. We also make proactive responses to direct financial frauds including voice phishing.

HE MA

Prevention of financial scams

Record of prevented cases of of voice phishing

Amount saved from prevention of voice phishing

Monitoring to Prevent Telephone Financial Fraud(voice phishing)

The scale of damage resulting from voice phishing has increased each year (KRW 243.1 billion in 2017 → KRW 440 billion in 2018), and it is more significant than ever for financial institutions to carry out prevention activities. BNK Financial Group aims to prevent damage from financial fraud by installing a monitoring system for electronic communication-related financial fraud and operating the Monitoring Team for Financial Fraud Prevention, making it easier to make immediate responses to voice phishing. In particular, the head branch and branch offices systematically cooperate on handling suspicious transactions. Training on cases of damage from voice phishing is provided to sales staff in the Group's efforts to strengthen response competency. Since this system was implemented, there have been more cases of prevented voice phishing incidents thanks to prompt responses of employees at branch offices. In 2018, these efforts led to the prevention of customer damage worth approximately KRW 500 million.

Strengthening the Information Protection System

Information Security Management System, ISMS

Fraud Detection System, FDS

BNK Financial Group continuously runs its information protection management system in accordance with ISO 27001, the international standard on information protection. Inspection of the information protection management system is strengthened by analyzing the weaknesses of the e-finance infrastructure, in accordance with e-financial authorities, and revising relevant rules. We make improvements by reflecting the results of weaknesses identified during inspection when establishing implementation measures. Kyongnam Bank acquired the certification for the Information Security Management System (ISMS) for the first time as a local bank, and further strengthened its operation of the information protection system and information security by renewing the certification each year.

Bolstering the Financial Fraud Prevention System

BNK Financial Group installed the Fraud Detection System (FDS), which uses AI "deep learning" technology, to monitor the presence of suspicious transactions which might occur through e-financial systems. It is a system to automatically block internet banking transactions if a case is judged to be an e-financial fraud through an analysis of the customers' routine transaction patterns. The bank runs a model to dramatically lower the error rate in detecting suspicious transactions by entering over 1,000 cases of FDS accident types into AI for analysis.

In 2018, the Bank used the system to detect 14 suspicious transactions and prevented damage worth a total of about KRW 134 million.

Strengthening Security of Customers' Personal Information

Busan Bank has installed and runs an IT system to encrypt and manage unstructured information, including customers' address, phone number, images, and voice files, to strengthen the protection of personal information and increase the security of financial transactions. Busan Bank is capable of blocking illegal leakage of information from the source, while also preventing misuse or abuse of customer information. It is the first bank in the financial sector to install an encryption system for unstructured information.

Kyongnam Bank is no exception in managing excessive usage of customers' personal information and leakage of personal information by setting up a system for constant monitoring. In 2018, there were no cases of customers' personal information leakage, grievances or complaints at BNK Busan Bank, who will continuously strive to protect customer assets by installing a more robust system for information protection.

Expanding Accessibility of Financial Consumers

Spreading the Customer-Centered Culture

As customer demands of financial service users increase, global financial companies provide wide-ranging products and services by predicting customer demands through various channels. BNK Financial Group strives to strengthen customer-centered services to cater to their diverse needs by listening to their voices, and seeks to perform corporate management to touch their hearts by expanding financial accessibility of the financially underprivileged and many others.

Spreading the Customer-centered Culture and Intensifying Competencies for Customer Satisfaction (CS)

BNK Financial Group pours in its utmost efforts to spread the customer-centered culture and beef up competencies for CS to raise the level of CS and its competitiveness. Branches start their day by playing video clips – 'Our Commitment for Customers' and 'Morning Greetings to Welcome Customers' – to form consensus on the importance of CS. Periodic CS assessment is carried out to select and award top-performing branches and employees in CS to encourage them to voluntarily spread the CS culture.

 Busan Bank has appointed 20 'CS High Tough Leaders' in 2018, ensuring that they could voluntarily spread the CS culture through active sharing of knowhow on CS.

 Kyongnam Bank conducts weekly CS training by selecting 'CS Angels' as excellent staff in CS in all branches, and enables its staff to boost professionalism in CS by offering group training and special lectures from distinguished speakers.

Efforts to Raise CS and Performance

We evaluate 'BNK Customer-centered Management' through annual CS surveys, and complement any shortcomings that are found.

Thus, Busan Bank and Kyongnam Bank select customer advisors each year (the third quarter of 2018) to listen to customers' honest feedback such as the voices from the field, conveniences and benchmarking cases of other companies. Such feedback is reflected in various areas to develop customized products and improve the process in collecting the Voice of the Customers (VoC).

Moreover, Busan Bank was able to gain positive effects in many fields including CS and increases in the number of excellent staff by intensifying the management of waiting customers in branches by running a campaign titled 'Please ease the minds of customers in line,' The bank also strived to listen to the genuine voice of customers through communication with customers by conducting an open call on communication. Kyongnam Bank was selected by Korean Service Quality Index (K-SQI) of the Korean Management Association Consulting (KMAC) in 2019 as an excellent call center of local banks for four consecutive years. BNK Financial Group is committed to further spreading the customer-centered culture by boosting CS.

Expanding Financial Accessibility

Sign Language Service

Providing Specialized Services for Foreign Customers

Intensifying Services for the Financially Underprivileged

Improving Convenient Facilities for the Disabled

Financial accessibility might not only mean the presence and a physical distance of a branch, but also a broad scope of benefits for customers: raising convenience for the elderly and the disabled to access financial services conveniently; and enabling the financially underprivileged due to their credibility to access financial services. BNK Financial Group does the utmost to boost financial accessibility for the socially vulnerable, and seeks to become an endeared BNK by many more people.

Intensifying Financial Services for the Socially Underprivileged

BNK Financial Group has expanded financial services for the socially underprivileged: 'sign language service' and 'visible ARS' for those with disabilities in hearing; 'voice recognition-based ARS', 'Braille-based security cards' and 'Braille-based terms and agreements' for the blind; and 'elderly-exclusive windows' and 'ARS notices in big letters' for the elderly customers.

Providing Specialized Services for Foreign Customers

Busan Bank makes utmost efforts to provide specialized services for expats living in Korea that are not proficient in using Korean including married immigrants and ethnic Koreans returning from other countries. Busan Bank started to provide ARS services in English, Japanese and Chinese from November 2018. The bank produced and distributed a guidebook on financial transactions for foreigners on the 'Together Day' in 2019. The guidebook was produced in six languages: Korean, English, Chinese, Vietnamese, Uzbek and Indonesian.

Intensifying Services for the Financially Underprivileged

BNK Financial Group strives to raise financial accessibility for the financially underprivileged group without the ability to use formal banking services. Busan Bank and Kyongnam Bank expanded the number of exclusive windows for the financially underprivileged in all their branches, providing services including not only microcredit and financial support for small merchants but also debt arbitration and financial consulting. Such efforts support the financially underprivileged to financially turn around, recovering their credit, normalizing their financial transactions and building up assets.

Improving Convenient Facilities for the Disabled

Yongwon Branch of Kyongnam Bank in Jinhae-gu in Changwon was selected as a convenient facility of excellence by Jinhae Welfare Center for the Disabled. Yongwon Branch was highly evaluated for being equipped with diverse convenient facilities for the disabled including wheelchair ramps at the entrance and CDs/ATMs for the blind, the deaf and wheelchair users. BNK Financial Group plans to further enhance physical accessibility for the socially underprivileged with more convenient facilities for mobility like the case of Yongwon Branch.

Corporate Management and Governance

Significance of Issues

The term 'corporate social responsibilities' connotes many meanings, but what is fundamentally required of companies is the economic responsibility. The economic rationale of a company directly impacts not only its related stakeholders' lives but also its community and the national economy. The root of a company's sustainable growth including its financial growth originates from a transparent decision-making structure. Promoting transparency in disclosing its governance and establishing a desirable governance not only contribute to investors for making reasonable investment decisions but also have a close linkage with improving the corporate image and raising the brand value.

BNK's Approach

BNK Financial Group makes diverse efforts to flexibly respond to the external changes in the environment. In 2018, in particular, the Group focused its competencies on establishing balanced business portfolios, managing financial risks, and creating reasonable management performance. In addition, numerous efforts have been poured into enhancing the governance scheme for securing a transparent governance.

Future Strategies

BNK Financial Group aims to intensify its pursuit to become a global-standard financial group represented through 'GROW 2023.' In order to lay the foundation for growth, the Group's goal is to establish a system for qualitative growth. The Group will do the utmost to foster its companies to be exemplary with a transparent governance, while enhancing them to generate sound and reasonable management performance.

2018 Key Performance

Consolidated net income KRW 502.1 billion (KRW 99 billion △ compared to 2017)

Higher asset soundness and capital adequacy

Appointment of the chairman of the BOD and members /heads of committees under the BOD as Independent Directors

Transparent Management and Composition of the BOD	Average attendance rate of directors	95 %	95 %	Achievement	80 %	80 %

Achieving Stable Management Performance Driven by Profitability and Soundness

Management Strategies and Goals

BNK Financial Group, launched as the first local bank to become a financial holdings company in March 2011, has continued to challenge itself to grow into Korea's top-notch regional financial group based on the management motto, "Toward the world with the region, toward a better future with customers." We plan to establish a system for qualitative growth driven by high-yield assets with the 2019 management motto of "Grow one 2019, Establishing a System for Qualitative Growth" as a part of efforts to achieve the Group's mid-and long-term management plan.

Туре	Co	ontent
Management motto	Grow one 2019, Establishing up a System for Quali	tative Growth
Six strategic tasks	Improving the Group's portfolio through strategic asset growth Intensifying preemptive soundness and risk management at the Group level Proactively implementing shared growth with the community and fair management	Setting up a system for qualitative growth by advancing the Group's core areas Continuously initiating the Group's management efficiency based on digitalization Spreading BNK's shared value of peoplecenteredness

2018 Landscape and BNK's Reasonable Management Performance

The global economy in 2018 showed signs of recovery, but volatility in the global financial market intensified due to the U.S.' higher interest rates, and stronger protectionism in trade including the U.S.-China trade disputes. The domestic economy also witnessed various risks including higher household debts, the higher unemployment rate and the sluggish domestic demand, which weakened confidence in economic entities. BNK Financial Group was able to reap a favorable performance by focusing on establishing balanced business portfolios and strengthening risk management to counter such challenges.

Consolidated net income

2018 KRW 502.1 billion 2017 KRW 403.1 billion

Interest income

※ 지배기업지분순이익 기준

Fee income

Expenses for bad debt

Establishing Balanced Business Portfolios

We have implemented continuous realignment of the Group's business portfolios centered on 'non-banking and non-interest income' categories, judging that it is difficult to generate steady performance amid the rapidly changing management environment simply with the banking-oriented management performance.

Strengthening Risk Management

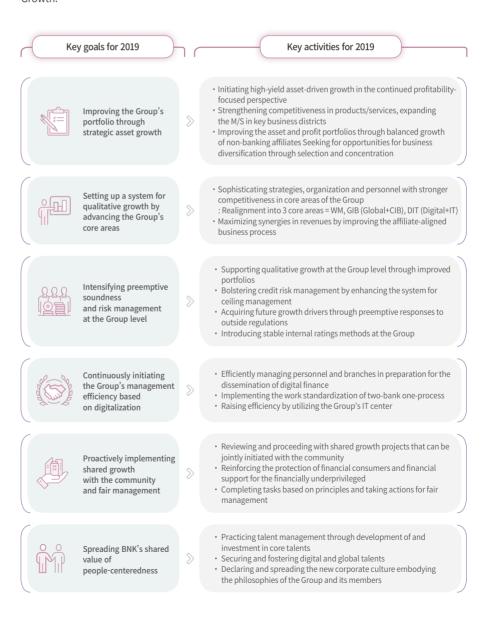

We have made consistent efforts to improve asset soundness and capital adequacy for financial risk management. Therefore, we were able to achieve higher outcomes compared to 2017 in various categories including the NPL ratio, coverage ratio and the BIS capital adequacy ratio.

BNK's 2019 and Establishing a System for Qualitative Growth The global and domestic economies of 2019 are expected to develop in a similar flow as 2018. Despite the continuum of the global economy, U.S.-China trade conflicts will remain the same. We also need to keep in mind the possibilities of higher uncertainties in the financial market of emerging countries due to the higher global interest rates. The domestic economy is projected to be not starkly different from the previous year by undergoing a continuum of the low-growth phase and low productivity. BNK Financial Group plans to make proactive responses to the economic circumstance at home and abroad by fully implementing management strategies based on the 2019 management motto of "Grow one 2019, Establishing a System for Qualitative Growth."

Transparent Management and Composition of the BOD

Composition of the Board of Directors

BNK Financial Group's board of directors (BOD) makes decisions on matters prescribed by the decrees and the Articles of Association, matters entrusted by the shareholders' meetings, and key matters on basic directions of corporate management and execution of work.

In addition, the BOD supervises overall internal control, and conducts supervision on the directors' execution of roles. BNK Financial Group's board of directors (BOD) is composed of one CEO and seven external (non-standing) directors as of March 31, 2019.

BNK Financial Group appoints the chairman of the BOD from among the external directors in order to secure the independence of the BOD and provide a system of checks and balances. Moreover, we ensure transparent management by guaranteeing fairness, checks, and supervision in managing the Board of Directors and committees through ensuring that every committee head under the board is an external director.

(As of March 31, 2019)

Туре	Name	Career	Specialization	Note (date of appointment ~ end of tenure)	Note

Guaranteeing autonomy in managing the BOD

Our executive directors are appointed at the shareholders' meeting according to independent criteria. There is no discrimination based on age, gender, nationality, or academic background. In addition, the number of external directors can be three or more, or a majority of the total according to the Articles of Association (As of March 31, 2018 ratio of external directors is 87.5%). Directors are appointed at the shareholders' meeting following a procedure of verification and recommendation by the Executive Nominating Committee, which consists of all external directors, and the confirmation of candidates for the BOD. In addition, those appointed should be independent from stakeholders in order to prevent conflicts of interest.

Statutory Disqualifications of External Directors (Laws on Corporate Governance of Financial Companies)

- · Largest shareholders and related parties
- Major shareholders, their spouses, and immediate family members
- Spouses and immediate family members of executives
- Full-time employees of corporations that are in a statutorily critical transaction with BNK, or in business competition or partnership with BNK

BNK Financial Group's Measures for Managing an Independent BOD

- Directors are appointed through several steps through the Executive Nominating Committee, BOD, and shareholders'
 meetings.
- 2. Upon appointing directors, their qualifications are thoroughly reviewed, in compliance with the decrees and internal regulations.
- 3. The tenure of external directors is confined to two years and cannot exceed five years to prevent collusion.
- 4. CEO succession is transparently and fairly collateralized, and according to internal regulations, the CEO is prohibited from appointing external directors, thus the exclusion of the CEO and chairman from the Executive Nominating Committee.
- 5. An external director is appointed as the chairman of the BOD to guarantee independent management of the BOD.
- 6. Major issues of the Group are regularly reported to the BOD to minimize information asymmetry and facilitate BOD discussions on key issues.

Securing transparency in managing the BOD

The BOD holds either regular or ad-hoc board meetings, convened by the chairman of the BOD. Each director has one voting right per agenda, but those with special interests cannot exercise their voting right. Decisions are made by the affirmation of a majority of the registered directors in attendance. In 2018, a total of 12 BOD meetings were in place to cover a total of 65 agenda to be deliberated and reported on, and the average attendance rate at the BOD reached 95%, exceeding the minimum attendance rate at the BOD and committees. The minimum attendance rate required for the BOD and committees is 98.7%.

In addition, we took actions to facilitate adequate information and idea sharing of the agenda before the BOD meetings by providing a preliminary briefing session to external directors so that relevant agenda items can be fully considered before the BOD meetings.

Performance of the BOD

(Unit: times, cases, %)

Туре	2016	2017	2018

Committees under the BOD

The BOD manages five committees to guarantee efficient and engaging management. All committee members are appointed from among the external directors to ensure more independent operation of committees. In addition, independence has been strengthened to put in place a transparent and fair procedure for CEO succession and executive appointment by excluding executive directors from the Executive Nominating Committee, which carries out executive nominations, including recommendations for CEO, chairman, external directors, and members of the Audit Committee.

seminars, and we publicly disclose related information.

BNK Financial Group guarantees independence and transparency in forming the BOD, and

strives to expand expertise and diversity. In addition, we devote our utmost efforts to appoint

directors with diverse backgrounds and expertise, in line with our principles and regulations,

and strive to establish a sound corporate governance through voluntary management of the BOD. We determine if external directors are equipped with sufficient work experience and expertise in related fields - finance, economy, corporate management, accounting, law, consumer protection, and IT - by reflecting the qualifications of external directors in the Articles of Association and the internal regulations. Decisions are made to see if they are capable of conducting operations fairly in the interest of all shareholders and financial consumers conflict of interest; if they have a sense of ethics and accountability suited to the execution of their roles; and if they can afford sufficient time and effort to carry out their role as an external director. We provide each director with regular training to benefit from their contribution to sustainable development, based on their expertise their each field. Internal training is provided on the decrees and internal regulations of the BOD and on the management of the BOD upon appointment. Regular training on risk management is offered along with training based on the research materials of the BNK Financial Management Research Institute. Furthermore, we extend support for the directors to improve their individual expertise and competencies in various fields by organizing workshops, lectures by external speakers/instructors, and diverse forums and

Committee	Members	Functions	No. of meetings in 2018
Board Steering Committee	Five external directors	Efficient operations of the BOD and its subcommittees Decisions on policies to improve corporate governance	2
Risk Management Committee	Four external directors	Oversight and supervision of approval of Compliance with risk policies within the Group and its affiliates	7
Executive Nominating Committee	Five external directors	Exploration, review, and recommendation of executive candidates	4
Compensation Committee	Four external directors	Establishment of measures to raise corporate management performance Formation and evaluation of performance goals for management	7
Audit Committee	Four independent directors	Supervising job execution of directors and the management Auditing and evaluating overall tasks and operations including the internal control system	10

Performance Evaluation and Compensation of the Management

Performance evaluation of external directors takes place by comprehensively considering the quantitative evaluation based on their attendance rate in committees of the BOD and BOD meetings, and the qualitative evaluation through mutual evaluation between themselves and executives based on their contribution to corporate development through their engagement in the BOD, competencies, and expertise. Moreover, qualification evaluations are carried out anonymously to ensure fair evaluation. In cases where diagnosis of external specialists is deemed to be necessary for smooth operation of the BOD and the designation of external director roles, the internal regulations prescribe that external evaluation is to take place.

Performance Evaluation Process of the External Director

Туре		Qualitative (Multi-Dimensional)					
Туре	Self	BOD	BOD Employee				
Evaluator	External director and non-standing director	All directors except the evaluator (excluding executive director)	Division leader and part leader responsible for supporting the BOD	Attendance rate for the BOD			
Evaluation Items		Key Items • Competency and expertise • Interest and engagement in the BOD • Contribution to company growth					
Evaluation Weight	20%	50%	20%	10%			

Performance evaluation and compensation of the management are decided through evaluation and deliberation of the Compensation Committee, being subject to comprehensive evaluation based on opportunities and crisis factors in the business environment.

The Compensation Committee establishes and runs compensation policies for raising values for shareholders and stakeholders in the long term. We form our compensation system to be in line with the risk structure to fundamentally control excessive compensation for the management.

A significant portion of compensation for the management is rewarded on a variable basis, and is made based on deferred differentials for a number of years depending on performance outcome. The period of deferred payment is three or more years, and is determined by aligning the nature and risks of business operations with the activities of the management.

The payment rate for short-term outcomes is determined by the Compensation Committee through evaluation on annual management performance, key tasks of implementation and individual competencies. Short-term outcomes are paid 40% in cash compensation and 60% in stock price-linked cash compensation for the chairman. For other executives, the ratio is 60% for the former and 40% for the latter.

The payment rate is determined by the committee through evaluation of long-term outcomes in the span of three years from the contract signing date, and the ratio of cash compensation and stock price-linked cash compensation is run in the same structure with short-term outcomes.

Ethical Management

Significance of Issues

Huge fines have been recently imposed by the EU on unfair trade acts of global companies. The demand for companies to comply with fair trade and anti-corruption laws is rising globally. In Korea, various policies and regulations were announced especially by the Fair Trade Commission for 'establishing a fair market order.'

BNK's Approach

BNK Financial Group has intensified continued training and actions to root down the system for ethical management and embody the ethical mindset. We will strive further to establish a culture of ethics and compliance by managing the internal check system and reporting channels based on independence and ethics, and accompanying effective preventive measures. Moreover, we consider anti-laundering obligations that are likely to impose high risks given the nature of the financial industry, and manage them accordingly.

Future Strategies

BNK Financial Group has made multifaceted efforts to institutionalize systems for ethical and compliance management including building a standard process to prevent irregularities. We plan to continuously monitor various schemes and systems that are currently in operation. We plan to strive for prevention of legal violations and aberrations to be shared among not only employees at BNK but also those in BNK affiliates and business areas.

Ethical Management System and Reinforcement of Internal Control

Ethical Management System

BNK Financial Group's Code of Ethics

All employees at BNK Financial Group bolster the system for ethical management to achieve the management motto of "Toward the world with the region, toward a better future with customers" and the vision of "Takeoff as a global-standard financial group." We formulated the code of ethics in 2011 based on our management motto and vision, and have made numerous revisions. BNK Financial Group systematically manages the code of ethics for all its affiliates to share the values of ethical management, and do the utmost to push for substantial ethical management by complying with the code of actions and the principle of actions disclosed on the website, and running various ethical management programs.

Revised Provisions Under a Code of Ethics in 2018

Туре	Revision			
Article 35	Notifying a			
(Cross-gifting	recommended amount			
among employees)	per job rank			

Revising a Code of Ethics

BNK Financial Group has continued to revise the code of ethics at the Group level to create a sound corporate culture and raise a sense of awareness on ethical management for all employees. In 2018, we formed a sound corporate culture by revising the provision on cross-gifting among employees

Internal Control System

BNK Financial Group has set up an internal control system for ethical management to prevent legal sanctions, financial loss or damage to reputation due to violation of ethical and compliance matters. A variety of internal control activities are performed: formation of the Internal Control Committee at the Group level; operation of the Internal Control Council among the Group and affiliates; monitoring by compliance officers; and reporting to the Audit Committee on ethical and compliance violations. Moreover, we perform self-diagnosis and inspection on the ethical level at the Internal Control Council and explore areas for improvement, while intensifying independence in operations to escalate the rank of compliance officers and guarantee their tenure.

Whistleblowing System

BNK Financial Group runs the whistleblowing system for employees to report violations of a code of ethics and the action guideline to compliance officers at the Group. The aim is to prevent the occurrence of ethical and compliance violations and take immediate actions upon the occurrence of violations. BNK Financial Group runs the online and mobile app-based 'BNK Helpline,' raise accessibility for employees through continuous system development and ensure that whistleblowers' credentials could be protected. WE will further bolster ethical management by raising the use of the system through its promotion more broadly.

•BNK Financial Group shares Q&A cases on targets to be whistle-blown when employees log onto their PC on the first business day of each month in a pop-up window. Upon checking in the items for reporting, they are guided to a screen for reporting to 'BNK Help-Line', and once details to be reported are entered, they are automatically sent to the head of the Compliance Monitoring Department. The right to peruse what is reported only belongs to the person in charge, through which identity of whistleblowers is protected.

BNK Financial Group's Ethical Management Programs

Compliance Training for Employees

BNK Financial Group's seven taxation policies

- Duly reporting on earnings (income) and complying with rules on tax payment
- 2. Disclosing financial records on taxation rationally and transparently
- 3. Protecting shareholder values
- 4. Managing taxation-related risks
- 5. Exploring specialists by fostering taxationrelated human resources
- Complying with the tax law and regulations of countries with BNK's overseas sites
- 7. Complying with laws on tax adjustment across countries

Complying with the Improper Solicitation and Graft Act

BNK Financial Group prohibits improper solicitation and the receipt of money, goods, etc. prescribed in the Improper Solicitation and Graft Act, in principle. If anyone receives money, goods or gifts unavoidably, he/she should return them immediately and submit the return report to his/her supervisor by way of his/her compliance staff. If return of the goods is not possible due to other reasons, he/she should submit the return report to his/her supervisor by way of his/her compliance staff after reporting to the compliance staff and the head of the department, and donate the received money or goods to a charitable cause. Also, once the receipt of money, goods or gifts has been reported, the relevant member of the compliance staff should record their receipt in the logbook for received money, goods and gifts.

Special Training for Boosting a Compliance Mindset for Employees

Busan Bank conducted 'Special Training for Boosting a Compliance Mindset' for eight times from May to December, 2018 to raise an ethical and compliance mindset among employees, prevent financial accidents, raise awareness for legal compliance by reporting legal violations at work, and rooting down a clean corporate culture. Monthly themes are selected on various legal violations that might occur at work, and applicant laws and sanctions per theme and key cases of violations are trained so that employees could raise their ethical and compliance mindset themselves.

Organizing 'Compliance Officer Visits'

Kyongnam Bank provides training on ethical management and internal control to the branch heads of each sales division* as the compliance officer visits them in their sales strategy meeting in each region. The Bank raises awareness of the importance of ethical management and internal control by establishing the compliance officer system, and vigorously reflects suggestions from branch offices to make institutional improvement.

Reinforcing Anti-laundering Training

BNK Financial Group provides information to customers on key points of the anti-laundering scheme and related laws including the definition of the Customer Due Diligence, relevant transactions and Beneficial Owners. In addition, BNK Asset Management conducted education and training sessions for the working-level staff in charge of anti-money laundering and the management to prevent money laundering and financing of terrorism in accordance with Article 7 of the Code of Practice on Anti-Money Laundering/Combating the Financing of Terrorism. The key topics covered in 2018 include AML/CFT inspection techniques and case studies, highlights on anti-money laundering for the management and key agents for anti-money laundering.

BNK Financial Group's Taxation Strategies

BNK Financial Group duly pays various types of taxes including corporate tax, value added tax and local tax in accordance with the taxation procedure prescribed by the tax law.

The Group's tax paying policies consist of seven parts, defining tax-related risk types (tax risks and reputation risks), evaluating risk-specific levels, and categorizing into and managing three levels: moderate, significant and severe stages.

Creating Social Values

Significance of Issues

The importance of 'inclusive finance' has surfaced globally, the term defined as increasing financial accessibility for the financially underprivileged by supporting their economic activities. The Korean government emphasizes inclusive finance policies to equally spread opportunities to take part in economic activities for members of the society, which is aligned with efforts in other fields: reinforcing customized support for the financially underprivileged; expanding social investment; boosting win-win partnership in the region and revitalizing the regional economy; and creating social values through facilitation of social contribution.

BNK's Approach

BNK Financial Group has focused on raising competencies for expanding product portfolios for financial support under relevant policies for win-win partnership with regional SMEs and revitalization of the regional economy, while launching products for public interests to support the financially underprivileged in the financial authorities' directions for inclusive finance and productive finance. Furthermore, we were able to specify the creation of social values through differentiated socially accountable management, while establishing a positive corporate image to be together with the community through steadfast social contribution programs.

2018 Key Performance

BNK Financial Group plans to fulfill its inherent financial roles based on the Group's management motto that pursues shared growth and customer-centricity, and reinforce its role as a facilitator for the working class and regional SMEs. All affiliates of BNK will jointly strive for shared growth with the financially underprivileged, the local community, and the creation of social values.

Conducting Social Contribution Activities by Leveraging Business Competencies

BNK Financial Group's Strategies to Drive Social Contribution BNK Financial Group is engaged in diverse social contribution activities to share hope and achieve shared growth with the community under the management slogan of "happy finance".

The goal of social contribution for BNK Financial Group is to acquire continuity and symbolism through the completion of socially responsible management at the Group level, and inspire greater affection in the world with hopes for leading and understanding financial innovation as a leading company in social contribution through differentiated social contribution projects. To this end, we have made diversified efforts by setting four strategic directions for social contribution.

Realigning Strategies of Responsible Management for a Sustainable Society BNK Financial Group exerted a great effort to establish a system to create joint synergies at the Group by uniting once scattered social contribution competencies in each affiliate. We put in place consistent and unified social contribution strategies and integrated relevant schemes at the Group level in order to intensify its role as a control tower for social contribution, and established a cooperative consensus among the holdings company-affiliates by substantiating the operation of the social contribution council. In addition, we have poured in numerous efforts to maximize synergies in social contribution projects by expanding cross-affiliate mid-and long-term projects.

Bolstering BNK's Joint Social Contribution Programs

The importance of BNK's Joint Social Contribution Programs lies in collecting all affiliates' competencies for social contribution to generate synergies. We avoid one-time or pretentious social contribution programs, and develop genuine programs over the medium and long term.

Practicing Differentiated Socially Responsible Management Projects and Expanding the Group's Exclusive Projects

Busan Bank

Busan Bank seeks to perform social contribution to inspire hopes and happiness in the hearts of the underprivileged neighbors as a bank that stands together with the region. In 2018, Busan Bank conducted various projects with an aim to achieve differentiated affectionate social contribution with stories to tell.

At the head branch of Busan Bank, 'Work-life Balance Culture in Busan' is held as a cultural show on many themes periodically through a musical, a play and a classical performance. In 2018, a total of 11,650 citizens watched the cultural shows on 38 occasions. In addition, 'Young Artist Competition' is regularly conducted to seek regional cultural and art development and explore regional artists.

Various Outreach Programs In order to contribute to raising the birth rate in the community, Busan Bank donated various childcare items to 100 low-income households under 'Happy Mom Box.' Furthermore, the bank strives to secure the right for safety mobility for lower-grade elementary school students by providing 30,000 safety covers for their school bags.

Programs to improve the Residential Environment

Busan Bank strives to create a safe society by distributing firefighting equipment for houses to target the underprivileged that lack in such devices. In 2018, the bank provided support by installing dry powder fire extinguishers and stand-alone alarm detectors to 5,000 regional underprivileged households.

Kyongnam Bank

Kyongnam Bank is engaged in wide-ranging social contribution programs as a genuine partner of the region for the happiness of its customers. The bank's slogan for social contribution is "Happiness to Customers and Hope to the Regions".

Kyongnam Bank organizes a walkathon on the trails in the Gyeongnam region every year to support local residents lead a healthy leisurely life and spread the culture of health. In 2018, 13,500 citizens participated in the walkathon in four places including the trails around the Jinju Nam River. The bank also is engaged in forming a rest shelter for them including the Healing Forest with Hinoki Cypress in Changwon.

Various Outreach Programs The bank donated vehicles to distribute free meals (approximately KRW 150 million) to facilitate donating free meals to the underprivileged in the region. The bank organized 'Women's Essay Contest and Children's Drawing Contest' in four areas including Changwon and Ulsan, thus contributing to the regional cultural and art development (a total of 12,000 works was submitted).

BNK Financial Group

BNK Financial Group plans to continuously promote its own competency for social contribution by expanding its proprietary social contribution programs. In 2018, the Group implemented wide-ranging social contribution programs.

BNK Financial Group conducted an educational musical on preventing financial scams for senior financial consumers to stably prepare for their post-retirement life. The musical was performed three times in Busan, Changwon and Ulsan, etc. in 2018, and about 1.200 seniors watched the educational musical.

Other Outreach Programs Volunteering activities by employees in areas with a high population of seniors, various contribution and donation projects and subscribing to 'Sharing Leaders' for the first time in the financial sector to spread the culture of sharing (91 people including the management in the Group and affiliates/heads of each department/division/branch registered.)

"Happy Finance" Project
for Direct Implementation
of Productive and
Inclusive Finance

BNK Financial Group intensively carries out 'Happy Finance' project, which is BNK's exclusive community-based program with social responsibilities. The project is a social contribution program that fully leverages the nature and resources of the financial business. We plan to proactively practice productive and inclusive finance through continued execution of 'Happy Finance' project.

Productive Finance		Inclusive	Finance	Happiness Sharing Program

Developing Products of Public Interest for Contribution to Society

Inclusive Finance and developing products of public interest

Supporting the Financially **Underprivileged** including the Working

Class

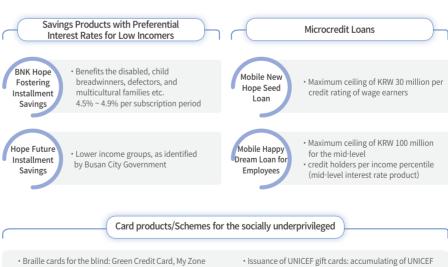

One of the top policies of the financial authorities in 2018 was 'inclusive finance.' BNK Financial Group contributes to easing the financial burden of the working class and stabilizing the economy for them through the launch of loan and deposit products for public interests, targeting different brackets including the working class, the socially underprivileged and rookies fresh out of school in line with the government's financial policy of inclusive finance.

BNK Financial Group has strived to roll out wide-ranging products for the socially underprivileged including the disabled and multicultural families. In addition, we keenly help out the financial underprivileged to be self-sufficient as they cannot easily access banking institutions due to low creditability and income levels.

Busan Bank launched products with preferential interest rates for low-incomers. 'BNK Hope Fostering Installment Savings' and 'Hopeful Future Installment Savings' are products with preferential interest rates for the socially underprivileged and lower income groups, respectively. Busan Bank ensured to provide tangible assistance for low incomers to build up their assets.

For loan products, we added product portfolios for working class customers with low creditability and income that cannot visit branches despite their need for financial support. 'New Hope Seed Loan' and 'Happy Dream Loan for Employees' launched this February following the planning phase in 2018 can be executed in 10 minutes through mobile devices. They were designed for employees in need of contingent funds to conveniently access without being constrained by the bank operating hours.

Diverse card products and schemes are also up and running to help out the socially underprivileged. Braille cards for the blind and Multicultural Love Card for assisting multicultural households are also available, and the issuance fees for debit cards for the disabled are exempted.

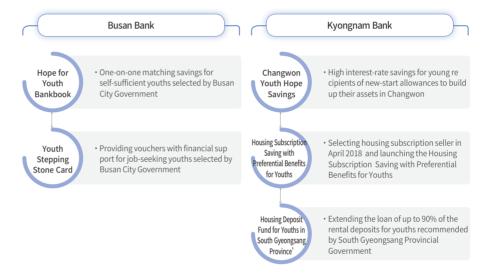

- Debit Card
- Multicultural Love Card for supporting multicultura households: credit and debit cards
- fund for the amount used for gift cards
- Exemption of the issuance fees for debit cards for the disabled (since October 2018)

Supporting Youths and Rookies Fresh Out of School

BNK Financial Group supports youths by rolling out various products for public interests for youths to be economically active despite challenging conditions. Busan Bank launched 'Hope for Youth Bankbook' for helping self-sufficient youths to build up their assets, and 'Youth Stepping Stone Card' to provide vouchers for job-seeking youths, thereby providing financial support for low income-earning youths and job-seeking ones. Kyongnam Bank rolled out 'Changwon Youth Hope Savings' to assist recipients of new-start allowances by signing an agreement with Changwon City Government. The bank began to sell housing subscription savings with preferential benefits for youths by being designed as a seller of housing subscription savings products. Meanwhile, 'Housing Deposit Fund for Youths in South Gyeongsang Province' was launched for homeless youths as heads of households from this April through the planning phase of 2018.

Youth Stepping Stone Card

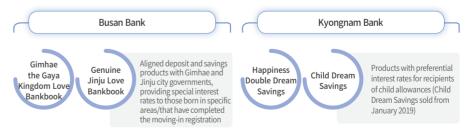

Responding to Low Birth Rate in Conjunction with Local Governments

Responding to Low Birth Rate in Conjunction with Local Governments

Other Products of Public Interests

BNK Financial Group takes proactive actions with local governments to counter another severe social problem in Korea – low birth rate. Kyongnam Bank runs products to provide special interest rates to the working class that were born in the region and completed the moving-in registration by signing an agreement with city governments of Gimhae and Jinju. The bank also sells special products with preferential interest rates for recipients of child allowances to cater to the government's child policy.

BNK Financial Group provides wide-ranging products for public interests: 'Cherished e-Nest Loan,' a non-face-to-face mortgage loan for newly-weds; 'BNK Sweet Rain(Danbi) Bankbook' to form donation funds of 0.1% from the balance in the bankbook; and 'Healthy Dulle Route Savings,' a savings product to provide preferential interest rates based on certain conditions e.g. walking on Dulle routes in the region and living a healthy life. We plan to continue to scale up the management size of such public interest products.

BNK's Efforts to Revitalize the Economy with the Community

Revitalizing SMEs and the Regional Economy through Productive Finance Another key financial policy in 2018 initiated by the financial authorities along with inclusive finance was productive finance. BNK Financial Group made wide-ranging efforts to fully support regional SMEs to practice productive finance and contribute to win-win growth with the region.

Specialized Financial Support for SMEs

Exclusive Tech-Financing Division

Busan Bank and Kyongnam Bank have formed an exclusive division, led by a tech financing taskforce, under the direct supervision of the bank presidents. This division has proactively tapped into tech financing that extends loans to financially struggling SMEs, which suffer from a shortage of funds despite having outstanding technological capabilities. In particular, SMEs with high growth potential are selectively explored by dispatching tech financing specialists to the sites. The banks systematically ensure tech financing through a thorough evaluation of technological capabilities and consultations for financial support.

FETTUS STATES

Strong Company Bankbook

Specialized Products for Local SMEs

BNK Financial Group strives to implement productive financing by extending financial support to tech-savvy companies, and lowering the interest rates for job-creating companies. In 2018, starting with the New Start Special Loan, Busan Bank has developed several specialized products, including the Busan Bank Special Tech Loan (a special loan for tech financing) and the Speed-up Special Loan, thereby extending multifaceted support to local SMEs. Kyongnam Bank offers benefits for various operations dealing with corporate bankbooks including benefits in fees for regional SMEs by launching 'Teunteun (Strong) Corporate Bankbook.' In early 2018, the bank provided a special interest rate for temporarily launching a product titled 'Tantan (Solid) Successful Savings' to celebrate winning of the Presidential Commendation in the 22nd Awards for Financial Support for Small- and Medium-Sized Startups.

BNK Financial Group: High Tech Financing Evaluation Scores

Busan Bank provides substantial financial support for the growth of promising tech start-ups in the region as a leading bank in tech finance, being ranked first in the evaluation of tech finance records in the banking sector in the first half of 2018 conducted by the Financial Services Commission. Kyongnam Bank was ranked first in the FSC performance evaluation of tech finance in the banking sector in the second half of 2017, and second in the second half of 2018. As such, BNK Financial Group has positioned itself anew as a representative bank that leads tech finance. In addition, Busan Bank acquired the accreditation of 'Level 4 in the roadmap for establishing tech credit loans' for the first time as a regional bank. The bank plans to continuously expand consulting services on tech, knowledge and properties by leveraging the relevant specialized workforce in the bank as it entered Level 3 in April 2018 and Level 4 in April 2019.

Facilitating Regional Win-win Growth and the Regional Economy

एट गहरू प्रश्नाविक पाए स्वास्त्रमध्य पाए प्रमुख्य प्रश्नित्व

Auto-Part Industry

Executing Partnership Projects with Small and Medium Business Administration of the Region

Financial Support for Suppliers Subject to Restructuring in the Regional Industries

Busan Bank extended financial support for suppliers hit hard by regional industrial restructuring in GM Korea Gunsan Plan and a medium-sized shipbuilding company from April 2018. As such, the bank has pushed for win-win growth with the region through finance by minimizing the impact on the regional economy and turning it around. From July 2018, the recipient list was expanded to include shipbuilding equipment suppliers and companies in specific areas that counter industrial crises (eight areas including Gunsan, Ulsan, Donggu and Geojae). For loans for SMEs in the region, postponement of the maturity up to maximum one year or suspension of installment payment have been applied.

Special Loans for Auto Part Makers in Busan

BNK Financial Group signed a business agreement to extend preferential guarantees for contingency funds for auto part makers in the region in conjunction with Busan Credit Guarantee Foundation in April 2018. The foundation extended special guarantees worth KRW 100 billion with special contributions of Busan City Government, and Busan Bank and Kyongnam Bank in the financial sector primarily executed the loans. Special guarantees are extended up to KRW 800 million for Busan-based auto part makers whose NICE credit rating is B- and above. By doing so, we were able to pave the way for such companies to overcome the crisis as they were financially hit by the sluggish performance of makers of finished cars.

Executing Partnership Projects with Small and Medium Business Administration of the Region

Kyongnam Bank conducts various partnership projects in conjunction with Kyongnam Small and Medium Business Administration and Ulsan Small and Medium Business Administration. The bank carried out various projects with the former including 'supporting acceleration of start-ups' and 'fostering venture capitalist specialists in the southeastern region of Korea.' With the latter, the bank conducted such projects as 'supporting traditional markets to subscribe to fire insurance' and 'procurement fair for SMEs.' Kyongnam Bank conducted 11 joint projects with the two small and medium business administrations, contributing to stimulation of the regional economy with funds worth KRW 160 million.

Support for Job Creation in the Community

Job Festival

Job creation for revitalization of the regional economy

Organizing the Job Fair (Job Festival)

Busan Bank organized '2018 Busan Job Festival with BNK' inviting 170 companies to recruit 900 new hires in total in partnership with Busan City Government, Dong-Eui Institute of Technology, Sunbo Industries Co., Ltd. and the Busan Customized Training Council. The bank proactively contributes to job creation in the community by inducing job creation through one-stop support for landing jobs, raising the employment rate and extending financial support for companies that create jobs.

Signing and Implementing a Business Agreement for Funds for Job Creation and Shared Growth with SMEs

Busan Bank signed a business agreement for Funds for Job Creation and Shared Growth with SMEs to intensify roles of regional banks in job creation and revitalization of the local economy. The fund is worth a total of KRW 20 billion available for helping out SMEs striving for job creation in the region. For an eligible company, a congratulatory cash gift (worth KRW 200,000) is paid for each occasion of recruiting a new hire.

Talent Management

Significance of Issues

Employee competency equals corporate competitiveness. Raising employee competitiveness has become essential for boosting corporate competitiveness, especially in the era of the Fourth Industrial Revolution. BNK Financial Group was able to reap continued growth despite the rapidly changing business environment thanks to its employees. Meanwhile, guaranteeing a higher quality of life and forming a happy workplace for employees is a continuous source of both corporate competitiveness and improved social benefits. Society is moving towards a focus on work-life balance, as seen in the recent implementation of the '52-hour workweek.'

BNK's Approach

BNK Financial Group recognizes that talent development is a key prerequisite for boosting competitiveness in the future. As such, the Group HR Development Institute was launched under the leadership of the chairman as the Group strives to facilitate enterprise-wide talent development and secure diverse training programs. Moreover, the Group has realigned it's work-life balance scheme and reinforced employee welfare benefits in order to create a 'great workplace.'

Future Directions

BNK Financial Group reinforces its sustainability through the execution of advanced talent management. To this end, the Group will further strive to foster creative talents for stronger future competitiveness and intensify welfare benefits for employees. Furthermore, it will create an employee-friendly company by realigning its HR scheme to focus on job functions and performance and expanding its culture of communication with employees.

Intensifying Training for Talent Development

Strategies for Talent Development

BNK Financial Group fosters financial experts that can induce innovation through challenges and create new values by realizing the management vision of 'taking off as a global-standard financial group.' Ideal employees of BNK Financial Group are individuals who are passionate about what they do, as demonstrated through pioneering and innovative thinking and action and who challenge themselves with passion and creativity. They are also required to proactively take part in new tasks by utilizing their expertise as financial specialists.

BNK HR Development Institute

On January 10, 2018, BNK Financial Group opened the BNK HR Development Institute under the direct leadership of its chairman to strengthen its future competitiveness and nurture the growth of financial specialists. The institute conducts diverse training programs ranging from joint training for all BNK affiliates to specialized training in four core areas of the Group and rank-specific competency buildup programs. We will generate synergy as "one company," with all affiliates are united through the institute. Since the opening of the institute, employee training has been fully activated, and outstanding achievements have been made in accrued number of participants enrolled in the training and in training performance.

Global MBA Sponsorship Program

BNK Financial Group has conducted the 'Global MBA Sponsorship Program' for employees to reinforce employee' competency and development global talents. Through this program, three employees from Busan Bank and Kyongnam Bank were able to enter MBA programs at Rice University in the U.S., Hong Kong University of Science and Technology and the National University of Singapore. Moreover, 11 employees entered domestic MBA courses at Pusan National University and Korea Maritime University, reaping the opportunities to develop their competencies.

BNK Training Mileage Points

BNK Financial Group came up with 'BNK Training Mileage Points' in March 2018 to create a corporate culture that encourages self-development by reflecting the CEO's management philosophy. We give mileage points to employees for self-development activities and encourage them to engage in voluntary competency buildup programs by incentivizing them through overseas study and gift vouchers once they reach a certain threshold.

Programs for Fostering Financial Specialists

Intensifying Competency Buildup Programs in Four Key Areas of the Group

BNK Financial Group is working to strengthen its training programs to boost its future competitiveness by nurturing key talent in employees that will lead its four key business areas: CIB (corporate investment banking), WM (wealth management), digitalization, and globalization. In 2018, 435 employees completed training in these areas to grow as futures talents of the Group.

Financial specialist education

Kyongnam Bank, Developing core talents

Establishing a Roadmap for Core Specialist Development through the C-HRD Conference

Busan Bank's key direction for training was designated to ensure that the acquisition of competency would generate the continuous performance to sustain the bank for the next century. Based on this, Busan Bank established a roadmap for fostering diverse financial specialists. The Core-HRD (C-HRD) Conference is a collaborative training system that aims to systematically foster personnel based on the roadmap, while developing customized training courses through department-specific roadmaps for the fostering of core specialists. The conference, held several times a month, raises effectiveness in training by establishing and managing annual training plans for core personnel through collaboration with the institute and designating trainers for each department.

Kyongnam Bank, Developing Core Talents for Responding to Future Finance

In 2019, Kyongnam Bank continues to conduct specialist training in digital finance for new hires and current employees in the field of D-IT to develop specialists in big data and machine learning. Moreover, the bank opened the BNK Leaders School (with junior, professional and master levels) to foster talents that have a high understanding of CIB and new industries. To further enable preemptive responses to changes in the business environment, the bank also hosts frequent, special lectures (Understanding Millennials, Collaborative Leadership, etc.) to manage employee development.

Management of Working Level-Competency Buildup Programs

Securing Competencies for Financial Total Care

Busan Bank has strived to secure 'financial total care competency,' aiming to specialize in practical knowledge and strengthen customer communication. 'Bandi Academy' was opened as an after-work self-development program running a wide range of courses to boost employees' practical competencies and productivity at work. Opportunities for voluntary self-development were offered to 2,020 employees through 56 courses in 11 sections in Seoul, Busan and Gyeongnam. Moreover, an intensive course titled 'Building up Sales Competency of Window Staff' was launched for each level in order to preemptively respond to the changing business environment including the expansion of non-face-to-face channels. The bank was able to raise its capabilities in customer communication by intensifying customer counseling competency for 414 employees, sharing sales know-how in non-face-to-face channels and raising the level of product understanding.

Creating a Corporate Culture That Guarantees a Work-Life Balance

Realizing a 'Work-Life Balance' and Managing the Welfare Benefit Scheme

BNK Financial Group is at the forefront of establishing a family-friendly corporate culture for employees to strike a proper balance between work and family life. We run wide-ranging customized welfare benefits for employees to feel a sense of joy and reward through a happy work life. We also strive to improve accessibility to these schemes so that all employees can freely take part.

Kyongnam Bank, Baseball watching event

Maternal and Childcare Support

In order to address the issue of the low birth rate, which has been spotlighted as a severe social problem, BNK Financial Group proactively supports childbirth and childcare for female employees.

Supporting Employees' Health Management

Employee health check-up

BNK Financial Group runs a number of employee health management programs, paying extra attention to not only their physical health but also psychological health.

Fair Performance Management and a Communication-Driven Corporate Culture

Recruitment and Evaluation & Compensation

Kyongnam Bank, Career briefing session

Recruitment

We seek to bolster BNK by recruiting new and experienced hires with global competency and expertise. We run a fair recruitment process, during which no applicants are subject to unfair discrimination for reasons of nationality, gender or religion. In addition, Busan Bank shifted 18 contract-based employees to regular status in 2018 to create stable employment for irregular employees, and strives to expand support for jobseekers in the community.

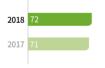

MBO (Management by Objectives)-based Performance Management and Evaluation & Compensation

In order to manage the organization in a stable manner, BNK Financial Group has established a policy direction of looking at long-term performances when conducting evaluations, not short-term results. Furthermore, we provide remuneration and compensation including profit sharing, rewards and other incentives to employees based on their contribution to performance as well as the outcome of systematic performance evaluations, thereby fostering a performance-driven corporate culture.

Establishing a Communication-Driven Corporate Culture

Employee Satisfaction Surveys

Communication with the CEO

Employee Satisfaction Surveys

BNK Financial Group conducts employee satisfaction surveys and questionnaires in line with evaluations by the Great Place to Work Institute (GPTW), a global consultancy on 'Great Workplaces.' Results from the 2018 satisfaction survey showed an increase from the previous year, to 72 points.

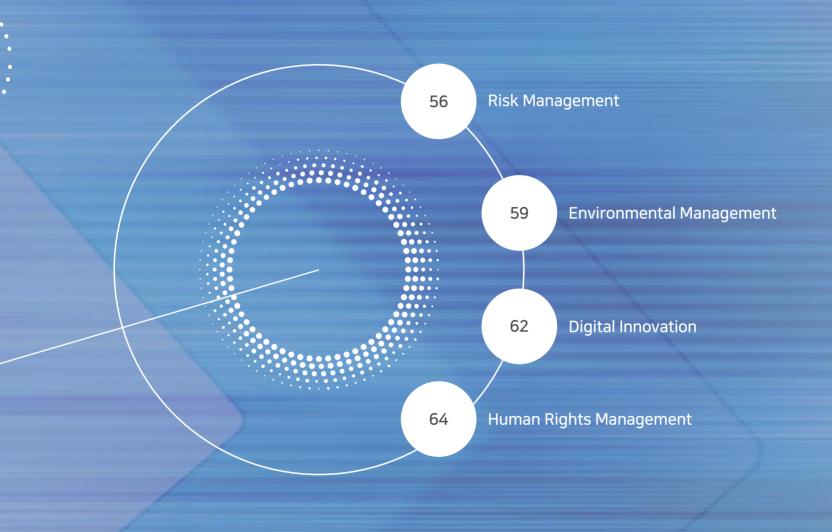

Cooperative Labor-Management Relations

Periodic meetings between the Labor Council and abor union are held to forge cooperative ties based on trust between labor and management. Communication channels among employees are facilitated to discuss and negotiate key matters on corporate management, employee treatment and welfare benefits. The diverse employee feedback is reflected in corporate management.

Communication with the CEO

BNK is creating various opportunities to promote communication between management and employees. Busan Bank is facilitating communication between the CEO and employees by holding the "Cultural Event with the CEO" and the "Meal for All Five Senses", among other initiatives. For its part, Kyongnam Bank holds "Talk to Get Close" and the CEO's Special Lecture to help build employee trust in the CEO.

Sustainability Management

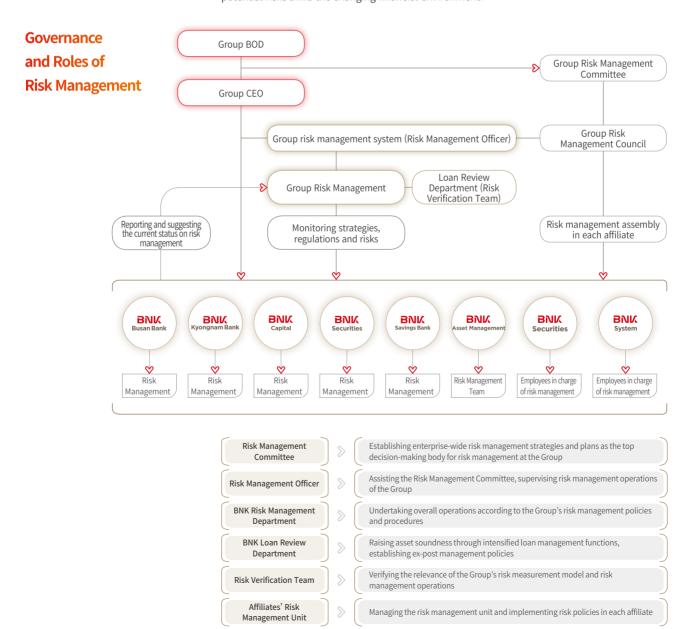

Risk Management

Enterprise-Wide Risk Management System

Based on its risk management principle, which stipulates that "all members of the Group seek the continued growth and development of the Group by maintaining a balance between risk and profit when conducting business activities", BNK Financial Group efficiently manages risks that can occur at the overall level of Group operation. For systematic management, the Group recognizes, measures, reports, and controls potential risks according to its risk management policy. Risk management takes place through a procedure where all critical risks that might occur in sales and management are recognized, perceived risks are measured and evaluated, evaluation outcomes are monitored and controlled, and then the outcomes are reported to the BOD (Risk Management Committee) of the Group and the management. Each year, the Risk Management Committee sets risk management strategies and the Group's risk ceilings are aligned with management directions and plans in order to facillitate preemptive responses to potential risks amid the changing financial environment.

Key Risk Management by Type

BNK Financial Group has established a BIS ratio (the capital adequacy ratio vis-à-vis risk assets of a bank) as a standard methodology to proactively respond to changes in the capital regulatory environment. Since February 2016, we have been running a project for the adoption of an internal rating method for the Group to improve its BIS ratio calculation system and risk management system.

Through the project, we have established a single credit rating model at the Group with its two-bank system for the first time in the domestic financial sector. We have advanced the risk control structure at the Group through this consistent credit rating systems for Busan Bank and Kyongnam Bank. Subsidiaries of the banks have established measurement systems for key risks (credit, market, operational and interest rate & liquidity risks) and periodic and systematic risk evaluation.

Type of Key Risks	Bank Subsidiaries' System	Key Functions
Credit Risk	Retail credit evaluation model	Calculating credit ratings of retail borrowers, etc.
-	Non-retail credit evaluation model	Calculating credit ratings of non-retail borrowers, etc.
	Credit risk management	Credit risk calculation, monitoring and crisis analysis based on regulatory/internal capital
Market Risk Market risk management Credit risk calculation,		Credit risk calculation, monitoring, crisis analysis and sensitivity analysis based on regulatory/internal capital
Operational Risk	Operational risk management	Calculation of operational risks based on the regulatory capital, self-diagnosis of operational risks and setup of an evaluation system, and management of loss data
Interest Rate/Liquidity Risk	ALM management	Calculation of interest rate/liquidity risks, simulation of interest rate/liquidity maturity (gap) and NII, LCR calculation and crisis analysis, etc.

BNK Financial Group Risk Management Direction

Lower corporate productivity and higher household debts have topped the social agenda amid the latest low growth phase of the domestic economy. Digital technologies developing at a rapid pace have intensified competition amongst companies and make it difficult to explore new growth engines. Emerging risks that may affect the future business of BNK Financial Group raise credit risk and intensify competition in the financial industry.

First, the rapidly advancing digital ecosystem, a part of the Fourth Industrial Revolution, exerts a certain impact on the intensified competition in the financial industry. This is because non-face-to-face business has expanded due to the increase in the amount of data being used for financial operations. Without adequate technical responses, there may be negative impacts on business, including customer churn, due to such issues as information security. BNK Financial Group is making enormous efforts in the development of digital technologies including fintech, blockchain, ICTfinancial convergence and the advancement of digital platforms.

Meanwhile, we are strengthening our system for responding to climate change, which is expected to pose a big threat to the international community over the long term. As changes in the risk exposure of the investment business and a drop in returns on investment are expected-amid stronger regulations on climate change, BNK Financial Group is currently applying risk management techniques in diverse environmental fields. We are intensifying environmental management, expanding eco-friendly finance and implementing an environmental impact assessment for executing project financing (PF) in preparation for a higher consumer demand for green financial services as well as for the shift towards a low-carbon economy.

Strategies for Managing Information Security Risks

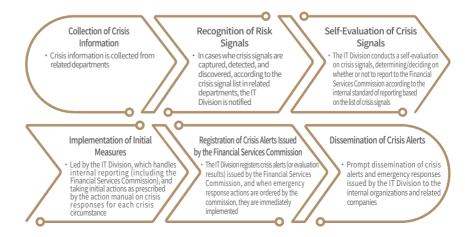

BNK IT Center

BNK Financial Group works to strengthen risk management for information security based on four strategies for promoting information security: perfect compliance; tight prevention of the leakage of personal (credit) information and its protection; tighter inspections to prevent e-intrusions; and preemptive response to weaknesses. First, we will make preemptive responses after identifying various threats that might impact the confidentiality, integrity, and availability of major information systems, including servers and networks, by systematizing the procedure for diagnosing and managing weaknesses in information security. We are in the processof installing an integrated security control system, network access control and intrusion blocking systems, and more at the IT Development Center. The flow of personal information leakage is monitored in real time through the use of personal profiling. White hat hackers are employed to test security and identify risks to ensure a tight system for personal (credit) information protection and leakage prevention.

Risk Management for Information Security Processes

BNK Financial Group has appointed a Chief Information Security Officer (CISO), and information security operations are split between the security planning, intrusion response and internal control and personal (credit) information protection divisions, which are overseen by the Information Protection Department. In addition, an information security and crisis response manual is followed in times of crisis to ensure effective risk response according to a six-stage process, ranging from information collection to information dissemination.

System

Having established an environmental management system at the Group-level in 2016, BNK Financial Group collects environmental data from all of its eight affiliates, including data on GHG emissions, energy and water consumption, and waste discharge, as well as the distance of travel for business trips. Departments in charge of environmental impact at BNK Financial Group and its eight affiliates efficiently manage environmental data, based on which environmental management can be efficiently practiced energy saving measures.

BNK Financial Group's Eco-friendly Activities

Eco-friendly Campaign and the Spread of an Eco-friendly Culture

BNK Financial Group strives to spread a culture where employees voluntarily save energy and practice eco-friendly acts through an enterprise-wide campaign for energy saving and eco-friendliness. We have extended the '5GO campaign for saving energy and supplies,' first conducted in 2017, to encourage employees to voluntarily go green. Other green efforts to help an eco-friendly culture take root are a campaign for 'Moderate Indoor Temperature in Summer' and taking part in the lights-off event on the Energy Day.

Energy saving activities

Energy Resource-Saving Activities

BNK Financial Group seeks to contribute to resource saving and environmental conservation by reducing energy and waste generated from doing business. Fees are exempted and other incentives such as preferential interest rates are offered enterprise-wide to customers who opt out of paper documents including bankbooks and documentation product terms and agreements. Additionally, we plan to expand our paperless digital bank branches by facilitating non-face-to-face transaction channels such as Internet and mobile banking and opening smart ATM and tablet-based branches.

Other activities for energy and resource saving at BNK Financial Group are as follows:

Busan Bank

- Conducting the Clear Day for general and office goods
- Identifying the stock level for general goods and returning any overstock
- Work Die
- Facilitating e-payment and reducing document printouts
- · Introducing open desks
- No partitions and higher energy efficiency
- Introducing eco-friendly corporate vehicles
 Operating (1) electric vehicle and (31) hybrid vehicles
- Saving disposable items
- Distributing tumblers and installing devices to remove rainwater from umbrellas, etc.
- Introducing eco-friendly paper cups for customers, etc.

Kyongnam Bank

- Recycling equipment
- Recycling existing counters when remodeling branches
- Checking and adjusting the volume of contracted power in branches
 - Adjusting the volume of contracted power in branches that use high-voltage power
- Completely clearing out unused general goods
- Removing unused printouts and general goods, etc.
- Completely clearing out unused critical certificates (Work-out)
- Completely clearing out critical certificates that have become invalid, and collecting and reusing some critical certificates
- Replacing imported items from abroad with recycled ones, etc.

On-Site Energy-Saving Consultation

Busan Bank requires branches to maintain low energy usage in summer and to submit a plan to reduce their electricity bill, and encourages them to conduct internal training. Branches selected to undergo this process three times or more per year may be subject to intensive management. Branch office employees are to receive regular on-site training and consulting to raise awareness of energy saving and shar ways to save. Kyongnam Bank implemented measures for energy and material saving through monthly management of the budget for electricity bills and general goods in 2018. In summer, various channels are used to raise awareness about energy saving, including PR posters and bulletin boards in groupware.

BPX を対す物 会務力 SSR 初の 信号型

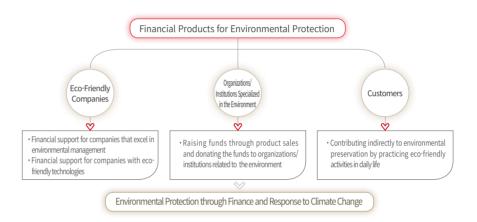

Busan Bank, day-based car usage system agreement ceremony

Day-Based Car Usage System for Commuting

We encourage active participation of employees in the day-based car usage system for commuting in order to facilitate efforts to save energy and use more public transit. Notably, we signed a contract with Busan City Government, the Transportation Corporation, and the Bus Operation Business Alliance to take part in reducing fine dust emissions and traffic volume, and encouraging public transportation and walking for commutes, thereby establishing a sound corporate culture.

Expansion of Financing for Eco-Friendly Activities

BNK Financial Group provides such benefits as financial support, lower interest rates, and premium banking charges to companies seeking to conduct eco-friendly projects and purchase eco-friendly equipment. When extending loans and investment for PF (Project Financing), Busan Bank seeks to generate business opportunities associated with the environment and climate change. Therefore, we make it mandatory to identify whether developers have conducted an environmental impact assessment pursuant to the Environmental Impact Assessment Act, indirectly reflecting the results of such assessments in our projects.

Developing Products for Green Finance

Busan Bank offers products with preferential benefits such as interest rate reduction for loans to eco-friendly and green-certified companies. 'BNK Preferential Loan for Clean Green Companies' provides a 0.5% reduction in interest rates for the following companies under the ceiling of KRW 200 billion in total: those that have acquired 60+ points in the eco-friendly company review and evaluation; companies specialized in new and renewable energies; companies specialized in energy saving; and companies of excellence in the eco-friendliness evaluation. In addition, the bank offers the 'BNK Auto Loan,' which provides the benefit of lower interest rates for customers purchasing eco-friendly cars (compact cars, hybrid cars and electric vehicles, etc.), and the 'BNK Compressed Natural Gas (CNG) Bus Purchase Loan' to extend funds for the purchase of buses emitting less exhaust. Kyongnam Bank is no exception in making full efforts to develop and retain eco-friendly financial products. Its 'High-Tech Loan,' launched in 2007, is a financial product designed to foster SMEs recommended by institutions according to the agreement for financial support with Gyeongnam Techno Park and Ulsan Techno Park. It provides an interest rate discount of around 1% per year for SMEs involved in eco-friendly energy management. The bank also launched 'Solar Panel Eco Corporate Loan' to foster and support eco-friendly alternative energy projects. This product can be extended up to a 15-year maturity and 90% of facility costs for business operators who sign a long-term, fixed-price contract with an electricity supplier.

Developing Products for Spreading the Eco-friendly Culture

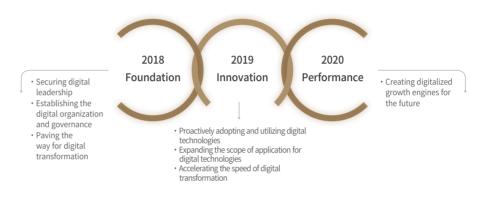

BNK Financial Group sells 'Green Cards,' which provide benefits in proportion to eco-friendly activity records including customers' energy saving activities. The card enables customers to accumulate a maximum of one percent of money spent at nationwide membership stores as 'eco-money' points, and a maximum of 25% just from using public transportation. Moreover, eco-money can be accumulated from using online shopping malls and using automatic money transfers for the payment of telecommunication and utility bills. Furthermore, it induces customers to lead an eco-friendly lifestyle by offering diverse benefits including free admission or discounted tickets for cultural and sporting facilities.

Digital Innovation

Directions for BNK Financial Group's Digital Strategies

Rapid development of digital technologies is transforming the overall landscape of the financial business and its processes, which pushes many financial companies to focus on digital innovation and development of in-house financial infrastructure. BNK Financial Group also heralded its transition to a customer-centered digital financial group through its new management vision of 'GROW 2023.' As such, we are getting ourselves prepared for upcoming changes, while newly aligning the Group's directions for digital strategies.

Establishing Digitalized Customer Channels

Setting Up the Group's Integrated Mobile Platform

Banks need to be equipped with digital service competencies suited to the changes in the times amid the accelerated innovation in digital channels. Against this backdrop, BNK Financial Group has implemented a complete renewal of mobile banking, touting the highest customer utilization rate and integration of mobile platforms in the industry at Busan Bank and Kyongnam Bank. In 2018, we completed consulting on devising directions for the Group's integrated mobile platform strategy, and BNK's financial platform is expected to be integrated within $1{\sim}2$ years. In addition, there are ongoing efforts to raise the level of digital services at BNK including streamlining product and service processes through the continued development of UI/UX.

Strengthening Competitiveness in Non-Face-to-Face Channels

BNK Financial Group completed the setup of a conversational digital marketing system in 2018 and plans to offer customized financial consultation services starting in 2019, following some complementary work. The conversational digital marketing system is a system for curating necessary products or financial services for all customers, regardless of time or place, by utilizing AI and mobile banking technologies. It is expected to contribute to stronger competitiveness in the two banks' non-face-to-face channels and exclusive products for such channels.

Busan Bank has further sophisticated the currently available SUM Bank, a mobile bank, to improve user-focused conveniences. While focusing on improving SUM Bank and usability, the bank has improved its SUM path (QR/POS payment) and set up a system to connect transport cards with mobile Cashbee.

Kyongnam Bank has provided simpler and easier payment services by introducing QR pay and zero-pay systems for traditional markets that use 'To You Bank,' its mobile platform. The bank also focused on advancing systems for user convenience including its one-click finance management service and a service for extending maturity without meeting face-to-face.

BNK Capital launched 'Auto Moa,' a second car trading platform, and implemented advanced channels by setting up separate apps for customers and employees, and realigning the website.

Digitalizing Business Innovation

Automating the Business Process and Realizing a Smart Work Environment

BNK Financial Group strives to create a smart work environment for employees through digital innovation. We have established a business infrastructure that enables collaboration anytime, anywhere time or space through cloud computing of the work system and the formation of diverse accessible environments. We are spreading work automation with the introduction of Robot Process Automation (RPA), with a focus on operations at the headquarters. This serves as a driver for a smart work environment and corporate culture at BNK.

Setting up a Future-Oriented Contact Center

Digital innovation greatly impacts the advance of customer channels including business innovation and platforms and upgrading responses to the Voice of the Customer (VoC) at customer centers. BNK Financial Group completed the setup of a customer behavior analysis system and a counseling analysis system for the establishment of a future-oriented contact center, and is in the middle of advancing its knowledge management system. Once the system setup is completed, data on customer behavior and the content of counseling will be analyzed by AI and optimized products and services will be provided to customers. It is expected that establishing such a future-oriented contact center will be significantly conducive to innovation in digital operations.

Revitalizing the Digital Financial Ecosystem Amid the accelerated financial digitalization, more and more customers are using apps from fintech companies instead of those from banks. Activities that were traditionally regarded as the domain of banks, such as money transfers and financial management, are no longer seen that way. As such, BNK Financial Group is making numerous efforts to revitalize the digital financial ecosystem for mutual benefit with fintech companies, while promoting products and services of Busan Bank and Kyongnam Bank through partnership with fintech companies that have a high penetration rate among customers in order to realize broader contact with customers.

In fact, we issued coupons for deposits/savings in partnership with Timon, an online shopping mall, and cooperate with diverse service providers by launching exclusive products aligned with asset management apps (TEAM Wink's 'Alda' and Rainist's 'Banksalad,' etc.). In addition, we have keenly expanded collaboration with such offline channels as convenience stores through the simplification of payment services and expansion of aligned coupons.

Human Rights Management

Human Rights
Management of
BNK Financial Group

BNK Financial Group endorses the 'UN Universal Declaration of Human Rights' and 'UN Guiding Principles on Business and Human Rights' of the United Nations Commission on Human Rights, and complies with national and regional labor laws in all areas where it conducts business. We established 'Human Rights Management Policies of BNK Financial Group', and we practice the equal application of our human rights management policy in order to respect and protect the human rights of all employees in the Group.

- We allow no wrongful discrimination on the basis of academic or regional ties, age, gender, race, or religion in all personnel management, including recruitment, retention of employment, evaluation, promotion, and wage payment, and we respect diversity.
- 3. We conduct periodic training to prevent infringements on the human rights of our employees, and devote efforts to improve their awareness of human rights issues.
- 4. We conduct periodic investigations to evaluate the implementation of our human rights management policy, perform inspections and work to prevent cases of human rights infringement, and operate channels for reporting on human rights-related cases once they occur, as per a predefined manual.
- 5. Employees, customers, partners, and community stakeholders can report human rights-related issues through designated channels, and we take appropriate action lest similar cases should reoccur.
- 6. We strive to enhance the financial accessibility of the underprivileged in using financial products and services, and do not discriminate against customers for reasons of race, gender, age, or disability.
- 7. We take action to prevent possible infringements on human rights resulting from the leakage of customers' personal information, thoroughly manage personal information in doing business, and collect only the minimum amount of information required for financial activities.
- 8. We consider possible human rights infringement factors, including forced labor and child labor, when making investment decisions, including the provision of financial products and services such as project financing.

3

BNK Financial Group's Activities for Human Rights Management

Operating the Ombudsman Process

BNK Financial Group runs a counseling channel for personal grievances as part of its efforts to listen to its employees' problems and help resolve them. Busan Bank conducts in-depth interviews on reported grievances in a procedure where problem-solving leads to making improvements. In 2018, a total of 210 grievances were handled through 'Healing Mind' and 'OneHR' counseling. In particular, BNK Busan Bank's Dudeorim, a mobile channel, was opened to handle employee grievances at any time or place.

Kyongnam Bank runs a grievance handling unit for handling employees' grievances, striving to vigorously address them. In 2018, 134 cases of grievance were registered through the 'Labor Union 119' channel, and 67 were handled.

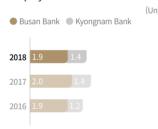

Protecting the Rights of Stakeholders through Self-Inspection

BNK Financial Group preemptively identifies any human rights issues for stakeholders that might occur in the course of doing business, and strives to manage stakeholder risks that might lead to potential issues. Including headquarters, 264 Busan banks and XXX branches of Kyongnam Bank are audited for personnel management, and human rights violation issues that may occur inside and outside of the bank are being investigated.

Intensifying Training for the Prevention of Sexual Harassment

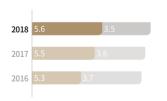

BNK Financial Group conducted practical preventive training against sexual harassment at its head branch. Specialized instructors were invited for executives and heads of departments and branches to raise awareness among employees about the socially spotlighted issue of sexual harassment. In addition, a preventive training about sexual harassment was produced for employees (running time of 6 minutes, aired four times) to provide training on the roles of counselors when such cases arise and the reporting and handling procedures. Guidance was provided on sexual harassment laws and procedures for the grievance counseling and handling of victims, providing a trigger to change the mindset of employees.

Employment ratio of the disabled

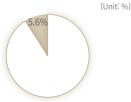

Employment ratio of patriots and veterans (Unit: %)

Busan BankKyongnam Bank

Ratio of the socially vulnerable among total employees: Group

* The socially vulnerable group is defined as people with disabilities, verterans, and foreigners

Guaranteeing Non-Discrimination and Diversity

As of the end of 2018, approximately 47.2% of all permanent employees of the Group are female and there is no discrimination in employee performance evaluations or the provision of training opportunities. BNK complies with the Labor Standards Act and the Equal Opportunities and Work-Family Balance Assistance Act and ensures that no employee is discriminated against on the basis of gender, disability or religion. The Group offers diverse welfare benefits to enable diversity in jobs, expansion in training and a work-life balance.

Expanding Employment for the Socially Under-Represented

Busan Bank shifted 18 contract-based employees into regular positions in 2018 to ensure the job security of non-regular employees. In addition, the bank provides recruitment-oriented counseling by steadily taking part in local job fairs organized by the Office of Patriots and Veterans Affairs and Busan City Government to help jobseekers in the community land on a job. In November 2018, the Bank took the lead in recruiting local talents by hosting BNK's '2018 Busan Job Festival.'

Protecting the Human Rights of Counselors Involved in Emotional Labor

In order to protect the human rights of employees at bank counters who handle face-to-face customer service at Busan Bank and Kyongnam Bank, we distribute a booklet of Guidelines to Respond to Consumers with Problematic Behaviors, published by the Korea Federation of Banks, to all branches, and encourage training for all employees accordingly. As such, BNK Financial Group thoroughly manages to prevent the violation of employees' human rights by problematic customers. Additionally, we strive to protect the human rights of counselors at customer centers, as they must perform intense emotional labor. First of all, we made a 'manual for responding to black consumers,' and are equipped with a system of segmenting the types of aggressive customers, to protect call center employees from black consumers who are insulting, sexually harass employees, or hamper others from concentrating on their work. Moreover, 'healing' lectures are delivered by professionals to ease the emotional burden of customer service work. Other Various other programs are being offered as welfare schemes specialized for call center counselors are expanded, including Movie Day, picnics and overseas travel for top-performing employees.

Key Management Performance

Strategic Tasks Core Activities Key Content

Initiating customer-centered business based on trust

- Practicing management that touches the hearts of customers
- Intensifying synergies of the Group
- Reinforcing functions to protect financial consumers

We seek to change the employee paradigm in order to provid differentiated services and ensure a management that can touch the hearts of consumers. We also plan to continuously expand our impact in the region by offering localized products and services. We do our utmost to secure customer trust by providing total financial services suited to customer needs through strong collaboration within the Group and protecting financial consumers preemptively.

Acquiring growth engines for the future with stronger digital competencies

- Converging digital finance and channels
- Fostering core talents/acquiring outstanding talents
- Realigning the organizational system
- Establishing a digital culture

We focus our abilities on intensifying SUM bank platforms, chatbot adoption and stronger digital financial service competencies by utilizing big data. Moreover, we are realigning our HR schemes and organizational system to better prepare for digital finance. We are pushing for diverse and continued innovative projects to help us transform by coming up with innovative programs for intensifying collaboration and communication among departments at the headquarters and branches.

Establishing a system for sustainable growth through intensified risk management

- Improving asset portfolios and ensuring substantial management focused on soundness
- Raising transparency in the decision-making process
 Improving loan practices

We are in the process of completing improvement in asset portfolios, in terms of liquidity and profitability, and soundness-driven substantial management. In addition, we plan to raise transparency and fairness in the decision-making process by improving our mode of operating meetings and intensifying monitoring for solicitation-based decision-making. Furthermore, we are pouring our utmost efforts into raising review competencies by acquiring independence in loan reviews, and improving loan business practices.

Intensifying its role as a community- leader

- Driving productive and inclusive finance
- Initiating community-based social contributions
- Contributing to the revitalization of the regional economy

We are intensifying our support for high-performing SMEs and venture enterprises in order to scale up inclusive finance and pushing for recruitment of the underprivileged in the region including the disabled. We also align social contribution programs authentically, while striving to implement a happy community. Moreover, we are proactively engaged in regional economic development projects spearheaded by the central and local governments. We plan to devise diverse policies and institutions to substantially revitalize the regional economy.

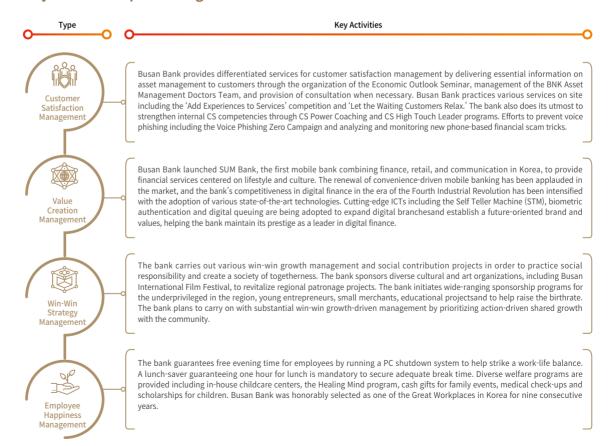

Company Introduction

Busan Bank is a representative regional financial institution established In October 1967 with the mission of revitalizing the regional economy and a strong backing from Busan citizens and regional businesses. For half a century, the bank has shown solid growth thanks to its unique potentials and its ability to overcome numerous challenges, including the 1997 financial crisis and the global financial crisis. As a result of such steady growth over a long period of time, Busan Bank has become one of the nation's top regional banks with KRW 65.7854 trillion in total assets (including trust accounts), a net income of KRW 346.7 billion, 254 branches and 3,271 employees. Busan Bank will seek for new growth drivers through unprecedent, dramatic innovation in the rapidly changing financial environment. Furthermore as a leading bank in digitization, Busan Bank will seek sustainable growth while providing more convenient and safer financial services.

Key Management Performance

Strategic Tasks Core Activities Key Content

Achieving Substantial, Balanced Growth

- Achieving balanced growth for SME loans and retail loans
- · Focusing on non-interest income
- Managing NIM at an appropriate level
- Preemptive risk management

The Bank will achieve balanced growth in SME loans and retail loans by expanding financial support to local SMEs, and continue to improve on its profit structure, which is tilted toward interest income, by intensifying its IB capabilities and aligning them with the Group's CIB units and competencies in the fee business. Continuous efforts will be poured into implementing management tasks, including managing asset soundness and adequate NIM management, in order to bolster substantial balanced growth in the region despite economic challenges.

Responding to
Financial Digitalization
and Establishing
Comprehensive
Financial Services

- Selling products 24/7 throughout the year
- Accelerating digital transformation
- Intensifying competencies for a one-stop, comprehensive financial counseling service

Kyongnam Bank is seeking prompt and convenient financial transactions by enabling 24/7 transactions through non-face-to-face channels. The bank will accelerate its digital transformation by improving the process to expand all financial transactions to non-face-to-face channels. In addition, the bank is intensifying employee competencies to enable one-stop comprehensive financial counseling by removing role distinction and classification through the expansion of cross-job functions of loan and deposit and foreign exchange personnel.

Becoming a Better Partner to the Community for the Next 50 Years

- Spearheading regional productive and inclusive finance
- Serving as a genuine regional partner

The Bank is expanding a variety of projects to support struggling SMEs, and will spearhead regional productive finance through the timely supply of liquidity amid changes in the ecosystem, including industrial growth and maturity. Moreover, as a company that strives to fulfill its social responsibilities in the region, the Bank will put sharing into action for the underprivileged and expand local events for residents to improve their happiness.

Establishing a People-Oriented Corporate Culture

- Forming a sound corporate
 culture
- culture
 Striking a work-life balance
- Boosting the morale of employees by improving the vacationing culture
- Strengthening competencies to respond to future finance

The Bank is creating a new corporate culture in which employees can work better voluntarily through barrier-less communication and mutual praise and encouragement. In addition, the Bank will put into place sound and transparent practices by applying more stringent ethical yardsticks than is socially required in overall job functions, while vigorously initiating diverse projects to improve the health of employees.

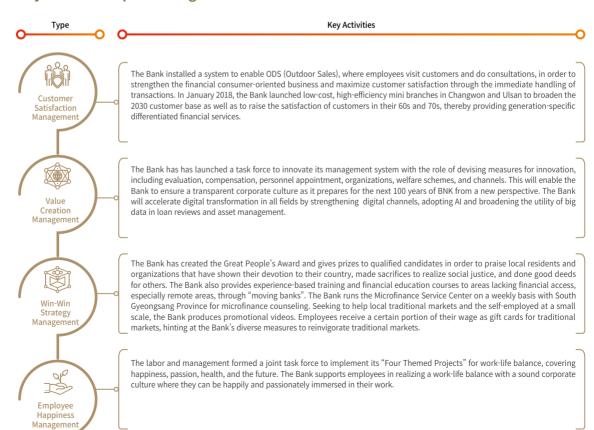

Company Introduction

Kyongnam Bank is a representative regional bank based in Gyeongnam and Ulsan, and has grown as BNK Financial Group's representative regional bank thanks to the unwavering love and support of customers and the community since its foundation in 1970. Kyongnam Bank has made wide-ranging efforts to help customers conveniently access financial services anytime and anywhere through digital transformation suited to the rapidly changing financial environment. As a local bank, it extends full support to SMEs and pays back the regional trust through diverse regional contribution projects. Moreover, Kyongnam Bank strives to touch the hearts of all customers to the fullest by expanding specialized financial consulting by corporate and retail financial experts, a service which was only provided at a limited number of branches in the past. Kyongnam Bank promises to offer a better future for the region and customers as a regional representative bank.

Management's Discussion and Analysis

1. Outline

BNK Financial Group, with a focused business presence in Busan, Ulsan, and Kyongnam, showed that the profitability and soundness indicators of the fourth quarter of last year fell short of the management plan because of the sluggish local economy, especially in the shipbuilding, shipping, and auto industries, and the impact of the financial authorities' more stringent standards for non-performing loan allowances. And yet, it seems that improvements were made for raising profitability of the Group over the medium and long term where the non-banking sector significantly intensified with a focus on securities and asset management under the management strategy of "intensifying the non-banking sector and expanding non-interest income" and fee income of the Group especially in IB significantly increased compared to the previous year.

Despite the deficit recorded in the last fourth quarter due to a year-on-year larger-scale voluntary resignation and the conservative allowance reserves amid more stringer standards for allowances of the financial authorities, the net income achieved the highest-ever amount of KRW 502.1 billion. This is attributable to an increase of KRW 62.9 billion in interest income and that of KRW 44.3 billion in fee income, and a drop of KRW 41.4 billion in bad debt expense. A steady increase in interest income is due to the growth in loans mostly in retail finance and high-yield borrowers for qualitative improvement of loan portfolios despite the regional economic downturn.

By contrast, this resulted in a relatively lower growth rate in loans in Korean Won compared to other companies, and a lower net interest margin in the banking sector represented by NIM. Growth rate of approximately 28% occurred in the fee income. This is presumably attributable to the intensive development policy of capital investment of KRW 200 billion in BNK Securities under the Group's management strategy of expansion of non-interest income.

BNK Financial Group will do the utmost to rise higher as globally competitive Korea's No.1 regional financial group by fulfilling preemptive risk management functions.

C. BIS ratio

(Unit: KRW billion, %)

Classification	2018	2017	Change
Equity capital	92,955	87,228	5,727
Core capital	77,651	70,829	6,822
Core Tier I capital	67,490	64,089	3,401
Risk-weighted Asset	706,946	667,239	39,707
BIS ratio	13.15	13.07	0.08
Tier I	10.98	10.62	0.36
CET1 ratio	9.55	9.61	▽ 0.06

The BIS ratio is intended to raise financial soundness by enabling the shareholders' equity of a financial institution to be maintained in a designated scope of assets. If the ratio is not properly handled, it would difficult to borrow overseas, or it would have to pay a high procurement cost. The BIS ratio is used as a criterion for judging a financial institution's soundness including comprehensive finance and credit coffer as well as that of a bank.

The common equity Tier 1 ratio dropped 6bp year on year due to an increase in risk-weighted assets due to asset growth, stronger regulations, a deficit in the fourth quarter and the impact of the dividend, etc. in 2018. In addition, As of December-end, 2018, the BIS ratio stood at 13.15% and Tier I ratio reached 10.98%, which are up 0.08%p and 0.36%p, respectively.

Due to the application of the credit conversion factor according to the BCBS recommendations of the Financial Supervisory Service (FSS) in 2019, the RWA is estimated to increase KRW 610 billion, which lower the common equity Tier 1 ratio by 8bp. However, the common equity Tier 1 ratio is expected to improve by 100bp upon applying the Group's internal rating method which is being reviewed to be approved by the FSS. And the common equity Tier 1 ratio as of 2019-end, considering this, is believed to rise up to the mid-10% range.

In 2019, we will do the utmost for raising capital adequacy by striking a balance in the banking and non-banking sectors.

Independent Auditors' Report

To the Board of Directors and Shareholders of BNK Financial Group Inc.

Opinion

We have audited the accompanying separate financial statements of BNK Financial Group Inc. (the Company), which comprise the separate statements of financial position as at December 31, 2018 and 2017, and the separate statements of comprehensive income, separate statements of changes in equity and separate statements of cash flows for the years then ended, and notes to the separate financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying separate financial statements present fairly, in all material respects, the separate financial position of the Company as at December 31, 2018 and 2017, and its separate financial performance and its separate cash flows for the years then ended in accordance with International Financial Reporting Standards as adopted by the Republic of Korea (Korean IFRS).

Basis for Opinion

We conducted our audits in accordance with Korean Standards on Auditing. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Separate Financial Statements section of our report. We are independent of the Company in accordance with the ethical requirements of the Republic of Korea that are relevant to our audit of the separate financial statements and we have fulfilled our other ethical responsibilities in accordance with the ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Key Audit Matter

We determined that there is no key audit matter to be reported in our audit of the separate financial statements of the current period.

Other Matter

Auditing standards and their application in practice vary among countries. The procedures and practices used in the Republic of Korea to audit such separate financial statements may differ from those generally accepted and applied in other countries.

Responsibilities of Management and Those Charged with Governance for the Separate Financial Statements

Management is responsible for the preparation and fair presentation of the separate financial statements in accordance with Korean IFRS, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Separate Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Korean Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Korean Standards on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the separate financial statements, including the disclosures, and whether the separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit. We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Won-Dae Kim, Certified Public Accountant.

Seoul, Korea March 20, 2019

This report is effective as of March 20, 2019, the audit report date. Certain subsequent events or circumstances, which may occur between the audit report date and the time of reading this report, could have a material impact on the accompanying separate financial statements and notes thereto. Accordingly, the readers of the audit report should understand that there is a possibility that the above audit report may have to be revised to reflect the impact of such subsequent events or circumstances, if any.

BNK Financial Group's measures for political engagement

BNK Financial Group cannot donate political funds to foreigners and corporations and organizations at home and abroad as per Chapter 6 and Article 31 of the Political Fund Act. It is also prescribed that no one should be allowed to donate political funds with funds related to corporations and organizations at home and abroad. Therefore, BNK Financial Group is not involved in any political activities according to laws, and employees may participate in politics, but are prohibited from conducting any suspicious activities causing misunderstanding at the corporate level. However, we donate to associations and areas of public interest which are not related to political engagement, in which case, the current status of donations is strictly managed to fundamentally block possibilities of corruption and irregularities.

Third - Party Assurance Report

Independent Assurance Statement on the 'BNK FINANCIAL GROUP SUSTAINABILITY REPORT 2018'

Responsibility and Independence

KFQ was engaged by BNK Financial Group to provide limited assurance on the BNK FINANCIAL GROUP SUSTAINABILITY REPORT 2018 (further 'the Report'). Our responsibility is to perform a limited assurance engagement and to express a conclusion based on the work performed. We conducted its assurance based on completeness of the data and information that BNK Financial Group provided. BNK Financial Group is responsible for all contents within the Report including the reporting principles and standards. KFQ does not have any other interest in BNK Financial Group business activities, nor does it take any responsibility for stakeholders other than BNK Financial Group in its assurance conclusions. We have also no biased opinion on stakeholders of BNK Financial Group.

Assurance Standards

This assurance was planned and performed based on AA1000 AS (2008), AA1000 APS (2008) and GRI Standards. KFQ identified the followings as its scope

- Sustainable activities and achievements for BNK Financial Group headquarters and all domestic sites described in the Report
- Compliance with the guidelines according to GRI Standards 'Core Option'
- GRI Standards compliance assessment regarding contents of the Report and assurance principles of reporting quality
- Application of Type 1* assurance approach according to AA 1000 APS 2008 and AA 1000 AS 2008 to assess compliance with inclusiveness, materiality and responsiveness principles and reliability of sustainability performance information.

Assurance Procedures

KFQ designed procedures to have reasonable assurance of the Report's critical errors or inappropriate information. We verified the reliability of the contents, processes and systems of data generation and report preparation.

i. Document Review

We reviewed the reliability of non-financial data in respect of the 'Sustainability' by cross-checking the Report with GRI Standards, quantitative data of BNK Financial Group, and internet & media research information. We also confirmed that the financial information has been appropriately extracted from the financial statements of the business report of the following system (http://dart.fss.or.kr).

ii. On-site Verification

We visited BNK Financial Group headquarter and conducted on-site verification to confirm reliability of the sustainability activities and performance data contained in the Report and to evaluate the effectiveness of the reporting process. We performed verification in the accuracy topic of the aggregated data from BNK Financial Group. These procedures included the following:

- · Materiality assessment process, stakeholders inclusiveness, key issues, internal response procedures, and etc.
- Assessment of data analysis and descriptions and sustainable management performance in the Report
- Consistency between the financial data contained in the Report and the audited financial statements 2018
- \bullet Interviews with relevant staff responsible for providing information in the Report

iii. Resolution of Findings

We confirmed that some errors, inappropriate information, and ambiguous expressions found during on-site visit were properly reflected in the final Report. In addition to evaluating the reporting principles for the Report as described above, we conducted a reliability check of data and information on some specific performance indicators (Greenhouse Gas Emissions, Energy Consumption, Water Consumption, and Waste Volume).

^{*} For some environmental data, Type 2 method verification was performed.

iv. Limitations

The Report has been prepared solely for BNK Financial Group in accordance with the terms of our engagement. We do not accept or assume responsibility to anyone other than BNK Financial Group for our conclusions we have reached in the statement. Completeness and responsiveness of sustainability performance information presented in the Report have inherent limitation due to their nature and the methodology used for determining, calculating and estimating such data.

Conclusion

Based on the assurance activities stated herein, KFQ confirmed that the Report meets the GRI Standards 'Core Option'. According to the principles of AA 1000 APS 2008 and AA 1000 AS 2008, inclusiveness, materiality and responsiveness, sustainability performance information were assessed and we could secure reasonable grounds to provide Type 1 level of assurance with the following confirmation:

Stakeholders Inclusiveness

BNK Financial Group subdivided five stakeholders groups related to the major issues of sustainable management. To hear any concerns and opinions from them, BNK Financial Group had a customized communication strategy for each stakeholder group and reflected their responses and opinions to its sustainable management activities.

Sustainability Context

In terms of sustainability, BNK Financial Group has continuously created sustainable economic performance across all major business segments. BNK Financial Group is actively responding and endeavoring to respond to key topics raised by stakeholders such as customer satisfaction, ethics, social value, and environmental management.

Materiality

BNK Financial Group established issue pools and reviewed by internal guidelines and external assessment criteria (internal standards, GRI Standards, DJSI, UN SDGs, media coverage and benchmark) incompliance with the materiality assessment process. As a result, BNK Financial Group appropriately reflected that ten material topics derived from the process along with key performance in 2018.

Completeness

BNK Financial Group applied reporting scope, boundary and temporal criteria. KFQ confirms that the Report is suitable for stakeholders to assess sustainability performance.

Recommendation

For further advanced sustainable management, BNK Financial Group needs to review the sustainable management vision, strategy and execution of the sustainable management in a mid and long-term perspective, and the result should be reflected on its management activities. Ethical management systems are being strengthened around the world. We recommend that BNK Financial Group establish a global-level ethical management system and raise ethical awareness among its employees to further strengthen its social sustainability management system.
