### **Independent Auditor's Report**

(English Translation of a Report Originally Issued in Korean)

To the Board of Directors and Shareholders of BNK Financial Group Inc.

### **Opinion**

We have audited the accompanying consolidated financial statements of BNK Financial Group Inc. and its subsidiaries (collectively referred to as the "Group") which comprise the consolidated statements of financial position as at December 31, 2018 and 2017, and the consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at December 31, 2018 and 2017, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with International Financial Reporting Standards as adopted by the Republic of Korea (Korean IFRS).

### **Basis for Opinion**

We conducted our audits in accordance with Korean Standards on Auditing. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the ethical requirements of the Republic of Korea that are relevant to our audit of the consolidated financial statements and we have fulfilled our other ethical responsibilities in accordance with the ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### **Key Audit Matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

### (1) A credit loss allowance to be individually assessed for loans at amortized cost

### **Key Audit Matter**

'Impairment' standard in accordance with Korean IFRS 1109 *Financial Instruments* applying from January 1, 2018, is comparatively more complicate than Korean IFRS 1039 and requires more interpretation and judgment of the management.

The Group recognizes expected credit losses for loans at amortized cost using individual and collective assessment method and records provision for impairment of loans at amortized cost amounting to  $\forall$  76,926,742 million and  $\forall$  980,013 million, respectively. Individually assessed expected credit losses are calculated using present value of the future recoverable cash flows of financial assets that is individually significant and this assessment implies uncertainty and includes several assumptions and estimates. We focus on this area due to the significance of amount to be individually assessed in the consolidated financial statements, taking into account the impact of the individually assessed expected credit losses in the consolidated financial statements and management's estimates and judgments. Meanwhile, Busan Bank and Kyongnam Bank are the most affected companies from those impacts among subsidiaries.

### How our audit addressed the Key Audit Matter

We understood the following to provide a basis for identifying and assessing the risk of material misstatement of accounting estimates related to individually assessed expected credit losses recognized by the Group:

- Method of selecting loans to be individually assessed by the Group
- Data applied when calculating individually assessed expected credit losses performed by the Group

We evaluated the level of uncertainty of the estimates related to individually assessed expected credit losses and determined the following based on the assessed risk of material misstatement:

- Whether the Group has appropriately applied the requirements of Korean IFRS in relation to the estimates of expected credit losses for individual assessment
- Whether the method of estimating provision for impairment on the basis of individual assessment used by the Group is appropriate and has been applied consistently

We also performed the following test of controls to determine operating effectiveness in relation to the estimates of expected credit losses for individual assessment:

- Test of control for verifying completeness of loans to be individually assessed
- Test of control for verifying accuracy of basic information for calculating individually assessed expected credit losses
- Test of control for the Group's approval procedures on the results of calculating individually assessed expected credit losses
- Test of control for reviewing accuracy of estimates of expected cash flows of debtor to be individually assessed
- Test of control for reviewing appropriateness of effective interest rate to be applied in individual assessment

We performed the following analytical procedures to estimate expected credit losses for individual assessment:

- We determined completeness and accuracy of loans to be individually assessed
- We determined accuracy of the amount of individually assessed expected credit losses
- We identified subsequent events after the date of financial statements

### (2) Intangible assets that are separately identifiable from goodwill

### **Key Audit Matter**

As explained in Note 20 to the consolidated financial statements, the Parent Company acquired 56.97% of equity shares of Kyongnam Bank at  $\forall$  1,226,908 million on October 10, 2014. As a result, the Parent Company obtained control over Kyongnam Bank and recognized core deposits of Kyongnam Bank as intangible assets separately from goodwill. In relation to this, the balance of core deposits as at December 31, 2018, is  $\forall$  98,559 million (2017:  $\forall$  116,077 million).

Intangible assets identified separately from goodwill shall be tested for impairment annually and the Parent Company internally reviewed whether the core deposits are impaired by assuming the customer bounce rate and the account transfer rate. We included such items in the key audit matter considering the size of intangible assets recognized in connection with the business combination and significant management's judgment related to the impairment test.

### How our audit addressed the Key Audit Matter

We understood the following so as to provide the basis for identifying and assessing the risk of material misstatement of accounting estimates related to impairment of core deposits identified separately from goodwill by the Parent Company:

- How to calculate and what key assumptions the Parent Company applied at the initial recognition of core deposits
- How to determine impairment indicators and applicable data regarding core deposits conducted by the Parent Company annually

We evaluated the level of uncertainty of estimates related to impairment of core deposits and determined the following based on the assessed risk of material misstatement:

- Whether the Parent Company appropriately applied the requirements of Korean IFRS in relation to impairment test
- Whether the assessment for impairment indicators of core deposits used by the Parent Company is appropriate and has been applied consistently

We conducted recalculation on judgment of core deposits' impairment indicators performed by the Parent Company. In addition, we verified the accuracy of underlying data used to estimate key variables such as bounce rates and reviewed the adequacy of other variables such as discount rates.

### **Other Matter**

Auditing standards and their application in practice vary among countries. The procedures and practices used in the Republic of Korea to audit such consolidated financial statements may differ from those generally accepted and applied in other countries.

### Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with Korean IFRS, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

### Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Korean Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Korean Standards on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements.
   We are responsible for the direction, supervision and performance of the Group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Won-Dae Kim, Certified Public Accountant.

Seoul, Korea March 20, 2019

This report is effective as of March 20, 2019, the audit report date. Certain subsequent events or circumstances, which may occur between the audit report date and the time of reading this report, could have a material impact on the accompanying consolidated financial statements and notes thereto. Accordingly, the readers of the audit report should understand that there is a possibility that the above audit report may have to be revised to reflect the impact of such subsequent events or circumstances, if any.

Notes to the Consolidated Financial Statements December 31, 2018 and 2017

### 1. General Information

General information of BNK Financial Group Inc. ("BNK Financial Group" or the "Parent Company"), which is a controlling entity in accordance with Korean IFRS 1110 *Consolidated Financial Statements*, and its subsidiaries (collectively referred to as the "Group"), is as follows:

### 1.1 BNK Financial Group

BNK Financial Group was incorporated on March 15, 2011, in accordance with the provisions of the Financial Holding Company Act, whereby holders of the ordinary share of Busan Bank; BNK Securities Co., Ltd.; BNK Capital Co., Ltd.; and BNK Credit Information Co., Ltd. transferred all of their shares to the Parent Company and in return received shares of the Parent Company's ordinary share in order to control, manage and provide financial support to subsidiaries engaged in financial business or financial industry-related subsidiaries. Meanwhile, BNK Financial Group established BNK Information System Co., Ltd. and BNK Savings Bank Co., Ltd. as its subsidiaries with 100% investment in 2011. The Parent Company obtained control of Kyongnam Bank by acquiring 56.97% of its shares in October 2014 and ultimately acquired 100% of shares of Kyongnam Bank through comprehensive exchange of shares on June 4, 2015. In July 2015, the Parent Company also obtained 51.01% of shares in BNK Asset Management Co., Ltd. and established it as its subsidiary through paid-in capital increase and acquisition of ownership. In December 2017, the Parent Company took over the rest of BNK Asset Management Co., Ltd.'s shares, accordingly, it became a wholly-owned subsidiary. The headquarters of BNK Financial Group is located at Busan Nam-gu Munhyeongeumyu-ro, 30. Meanwhile, the Parent Company's share capital as at December 31, 2018, amounts to ₩1,629,676 million with 325,935,246 outstanding shares.

### 1.2 Consolidated Subsidiaries

BNK Auto First Securitization Specialty Co., Ltd.	Liquidation of BNK Capital Co., Ltd.'s SPC

Reason

Liquidation of Kyongnam Bank Co., Ltd.'s SPC

There were no subsidiaries newly included and excluded in the consolidation for the year ended December 31, 2017.

### 2. Significant Accounting Policies

Consus 6th LLC

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

### 2.1 Basis of Preparation

The Group maintains its accounting records in Korean won and prepares statutory financial statements in the Korean language (Hangul) in accordance with International Financial Reporting Standards as adopted by the Republic of Korea (Korean IFRS). The accompanying consolidated

### Notes to the Consolidated Financial Statements

**December 31, 2018 and 2017** 

financial statements have been condensed, restructured and translated into English from the Korean language financial statements.

Certain information attached to the Korean language financial statements, but not required for a fair presentation of the Group's financial position, financial performance or cash flows, is not presented in the accompanying consolidated financial statements.

The consolidated financial statements of the Group have been prepared in accordance with Korean IFRS. These are the standards, subsequent amendments and related interpretations issued by the International Accounting Standards Board (IASB) that have been adopted by the Republic of Korea.

The preparation of financial statements requires the use of critical accounting estimates. Management also needs to exercise judgement in applying the Group's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 3.

### 2.2 Changes in Accounting Policies and Disclosures

(a) New and amended standards adopted by the Group

The Group has applied the following standards and amendments for the first time for their annual reporting period commencing January 1, 2018. The adoption of these amendments did not have any material impact on the financial statements.

- Amendment to Korean IFRS 1028 Investments in Associates and Joint Ventures

When an investment in an associate or a joint venture is held by, or is held indirectly through, an entity that is a venture capital organization, or a mutual fund, unit trust and similar entities including investment-linked insurance funds, the entity may elect to measure each investment separately at fair value through profit or loss in accordance with Korean IFRS 1109. The amendment does not have a significant impact on the financial statements because the Group is not a venture capital organization.

- Amendment to Korean IFRS 1040 Transfers of Investment Property

The amendment to Korean IFRS 1040 clarifies that a transfer to, or from, investment property, including property under construction, can only be made if there has been a change in use that is supported by evidence, and the list of evidence for a change of use in the standard was recharacterized as a non-exclusive list of example.

- Amendment to Korean IFRS 1102 Share-based Payment

Amendments to Korean IFRS 1102 clarify accounting for a modification to the terms and conditions of a share-based payment that changes the classification of the transaction from cash-settled to equity-settled. Amendments also clarify that the measurement approach should treat the terms and conditions of a cash-settled award in the same way as for an equity-settled award.

### Notes to the Consolidated Financial Statements

**December 31, 2018 and 2017** 

- Enactment of Interpretation 2122 Foreign Currency Transaction and Advance Consideration

According to the enactment, the date of the transaction for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income (or part of it) is the date on which an entity initially recognizes the non-monetary asset or non-monetary liability arising from the payment or receipt of advance consideration.

#### - Korean IFRS 1109 Financial Instruments

The Group has applied Korean IFRS 1109 *Financial Instruments* on January 1, 2018, the date of initial application. In accordance with the transitional provisions in Korean IFRS 1109, comparative figures have not been restated, and the differences between previous carrying amounts and carrying amounts at the date of initial application are recognized to retained earnings (or other comprehensive income). See Note 49 for further details on the impact of the application of the standard.

#### - Korean IFRS 1115 Revenue from Contracts with Customers

The Group has applied Korean IFRS 1115 Revenue from Contracts with Customers. In accordance with the transition provisions in Korean IFRS 1115, comparative figures have not been restated. The Group elected the modified retrospective approach, and recognized the cumulative impact of initially applying the revenue standard as an adjustment to retained earnings as at January 1, 2018, the period of initial application. See Note 49 for further details on the impact of the application of the standard.

### (b) New standards and interpretations not yet adopted by the Group

Certain new accounting standards and interpretations that have been published that are not mandatory for annual reporting period commencing January 1, 2018 and have not been early adopted by the Group are set out below.

#### - Enactment of Korean IFRS 1116 Leases

Korean IFRS 1116 *Leases* issued on May 22, 2017 is effective for annual periods beginning on or after January 1, 2019, with early adoption permitted. This standard will replace Korean IFRS 1017 *Leases*, Interpretation 2104 *Determining whether an Arrangement contains a Lease*, Interpretation 2015 *Operating Leases-Incentives*, and Interpretation 2027 *Evaluating the Substance of Transactions Involving the Legal Form of a Lease*. The Group will apply the standards for annual periods beginning on or after January 1, 2019.

At inception of a contract, the entity shall assess whether the contract is, or contains, a lease. Also, at the date of initial application, the entity shall assess whether the contract is, or contains, a lease in accordance with the standard. As practical expedient, the entity elected to apply Korean IFRS only to contracts entered into (or changed) on or after the date of initial application.

For a contract that is, or contains, a lease, the entity shall account for each lease component within the contract as a lease separately from non-lease components of the contract. A lessee is

# Notes to the Consolidated Financial Statements December 31, 2018 and 2017

required to recognize a right-of-use asset representing its right to use the underlying leased asset and a lease liability representing its obligation to make lease payments. The lessee may elect not to apply the requirements to short-term lease (a lease term of 12 months or less at the commencement date) and low value assets. In addition, as a practical expedient, the lessee may elect, by class of underlying asset, not to separate non-lease components from lease components, and instead account for each lease component and any associated non-lease components as a single lease component.

The accounting treatment as a lessor did not change significantly from the one under IAS 1017 *Leases*.

### 1 Lessee accounting

### Method of Applying Korean IFRS 1116 Leases

A lessee shall apply this standard to its leases either:

- retrospectively to each prior reporting period presented applying Korean IFRS 1008
   Accounting Policies, Changes in Accounting Estimates and Errors (Full retrospective application); or
- retrospectively with the cumulative effect of initially applying the standard recognized at the date of initial application.

The Group plans to apply Korean IFRS 1116 retrospectively with the cumulative effect of initially applying the standard as at January 1, 2019. The Group will not restate any comparative information. Instead, the cumulative effect of applying the standard will be recognized as an adjustment to the opening balance of retained earnings (or another component of equity, as appropriate) at the date of initial application.

### Financial effects of Korean IFRS 1116 Leases

The total minimum lease payment expected to be paid by the Group in relation to operating leases before discounted to their present value is  $\forall$  49,520 million. When the payment is discounted at incremental borrowing rate of the lessee, the total minimum lease payment amounts to  $\forall$  44,997 million. For a contract that is, or contains, a lease, the Group plans to apply the practical expedient to account for each lease component and any associated non-lease components as a single lease component.

As a result of the financial effects on the financial statements analyzed, the Group expects the underlying leased asset and a lease liability as at January 1, 2019 to be increased by  $\forall$  44,991 million and  $\forall$  44,997 million, respectively. Comparing to 2019, operating lease expenses are expected to be decreased by  $\forall$  21,894 million while depreciation expenses for the underlying leased assets and interest expenses for the lease liability are expected to be increased by  $\forall$  21,529 million and  $\forall$  544 million, respectively. On the other hand, the results of the assessment may change due to additional information that the Group may obtain after the assessment.

# Notes to the Consolidated Financial Statements December 31, 2018 and 2017

### 2 Lessor Accounting

The Group expects the effect on the financial statements applying the new standard will not be significant as accounting for the Group, as a lessor, will not significantly change.

If the Group, as an intermediate lessor, classified the sublease as an operating lease before the date of initial application, the Group shall reclassify the sublease as a finance lease or an operating lease in accordance with Korean IFRS 1116. When the Group determines the sublease as a finance lease, the Group shall account for the lease as a new lease entered on the date of initial application. As at January 1, 2019, the sub-lease contract held by the Group, as an intermediate lessor, is not significant.

### - Korean IFRS 1109 Financial Instruments

The narrow-scope amendments made to Korean IFRS 1109 *Financial Instruments* enable entities to measure certain prepayable financial assets with negative compensation at amortized cost. When a modification of a financial liability measured at amortized cost that does not result in the derecognition, a modification gain or loss shall be recognized in profit or loss. These amendments will be applied for annual periods beginning on or after January 1, 2019, with early adoption permitted.

### - Amendments to Korean IFRS 1019 Employee Benefits

The amendments require that an entity shall calculate current service cost and net interest for the remainder of the reporting period after a plan amendment, curtailment or settlement based on updated actuarial assumptions from the date of the change. The amendments also require that a reduction in a surplus must be recognized in profit or loss even if that surplus was not previously recognized because of the impact of the asset ceiling. The amendments are effective for plan amendments, curtailments and settlements occurring in reporting periods that begin on or after 1 January 2019.

### - Amendments to Korean IFRS 1028 Investments in Associates and Joint Ventures

The amendments clarify that an entity shall apply Korean IFRS 1109 to financial instruments in an associate or joint venture to which the equity method is not applied. These include long-term interests that, in substance, form part of the entity's net investment in an associate or joint venture. These amendments will be applied for annual periods beginning on or after January 1, 2019, with early adoption permitted. In accordance with the transitional provisions in Korean IFRS 1109, the restatement of the comparative information is not required and the cumulative effects of initially applying the amendments retrospectively should be recognized in the beginning balance of retained earnings (or other components of equity, as appropriate) at the date of initial application.

### - Enactment to Interpretation of Korean IFRS 2123 Uncertainty over Income Tax Treatments

The Interpretation explains how to recognize and measure deferred and current income tax assets and liabilities where there is uncertainty over a tax treatment, and includes guidance on how to determine whether each uncertain tax treatment is considered separately or together. It also

### Notes to the Consolidated Financial Statements

**December 31, 2018 and 2017** 

presents examples of circumstances where a judgement or estimate is required to be reassessed. This Interpretation will be applied for annual periods beginning on or after January 1, 2019, and an entity can either restate the comparative financial statements retrospectively or recognize the cumulative effect of initially applying the Interpretation as an adjustment in the beginning balance at the date of initial application.

### 2.3 Consolidation

The consolidated financial statements incorporate the financial statements of the Parent Company and entities (including structured entities) controlled by the Parent Company (and its subsidiaries). Control is achieved where the Group 1) has the power over the investee; 2) is exposed, or has rights, to variable returns from its involvement with the investee; and 3) has the ability to use its power to affect its returns. The Parent Company reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

When the Group has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Group considers all relevant facts and circumstances in assessing whether or not the Group's voting rights in an investee are sufficient to give it power, including:

- the size of the Group's holding of voting rights relative to the size and dispersion of holdings
  of the other vote holders;
- potential voting rights held by the Group, other vote holders or other parties;
- · rights arising from other contractual arrangements; and
- any additional facts and circumstances that indicate that the Group has, or does not have, the
  current ability to direct the relevant activities at the time that decisions need to be made,
  including voting patterns at previous shareholders' meetings.

Income and expenses of subsidiaries acquired or disposed of during the year are included in the consolidated statements of comprehensive income from the date the Group gains control until the date when the Group ceases to control the subsidiary. Profit or loss and each component of other comprehensive income are attributed to the owners of the Group and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Group and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies in line with the Group's accounting policies.

All intragroup transactions and related assets and liabilities, income and expenses are eliminated in full on consolidation.

# Notes to the Consolidated Financial Statements December 31, 2018 and 2017

Changes in the Group's ownership interests in subsidiaries that do not result in the Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Group's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to owners of the Group.

When the Parent Company loses control of a subsidiary, a gain or loss on disposal is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the previous carrying amount of the assets (including goodwill) and liabilities of the subsidiary and any non-controlling interests. When assets of the subsidiary are carried at revalued amounts or fair values and the related cumulative gain or loss has been recognized in other comprehensive income and accumulated in equity, the amounts previously recognized in other comprehensive income and accumulated in equity are accounted for as if the Group had directly disposed of the relevant assets (i.e., reclassified to profit or loss or transferred directly to retained earnings). The fair value of any investment retained in the former subsidiary at the date when control is lost is recognized as the fair value on initial recognition for subsequent accounting under Korean IFRS 1109 *Financial Instruments* or, when applicable, the cost on initial recognition of an investment in an associate or a joint venture.

#### 2.4 Business Combination

Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the fair values of the assets transferred by the Group, liabilities incurred by the Group to the former owners of the acquiree and the equity interests issued by the Group in exchange for control of the acquiree. Acquisition-related costs are generally recognized in profit or loss as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognized at their fair value at the acquisition date, except that:

- deferred tax assets or liabilities and liabilities or assets related to employee benefit
  arrangements are recognized and measured in accordance with Korean IFRS 1012 –
  Income Taxes and Korean IFRS 1019 Employee Benefits, respectively;
- liabilities or equity instruments related to share-based payment arrangements of the acquiree or share-based payment arrangements of the Group entered into to replace share-based payment arrangements of the acquiree are measured in accordance with Korean IFRS 1102
   Share-Based Payment at the acquisition date; and
- assets (or disposal groups) that are classified as held for sale in accordance with Korean IFRS 1105 – Non-Current Assets Held for Sale and Discontinued Operations are measured in accordance with that standard.

Goodwill is measured as the excess of the sum of a) the consideration transferred, b) the amount of any non-controlling interests in the acquiree and c) the fair value of the acquirer's previously held equity interest in the acquiree (if any), over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after reassessment, the net of the

# Notes to the Consolidated Financial Statements December 31, 2018 and 2017

acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of a) the consideration transferred, b) the amount of any non-controlling interests in the acquiree and c) the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognized immediately in profit or loss as a bargain purchase gain.

Non-controlling interests that present ownership interests and entitle their holders to a proportionate share of the entity's net assets in the event of liquidation may be initially measured either at fair value or at the non-controlling interests' proportionate share of the recognized amounts of the acquiree's identifiable net assets. The choice of measurement basis is made on a transaction-by-transaction basis. Other types of non-controlling interests are measured at fair value or, when applicable, on the basis specified in another Korean IFRS.

When the consideration transferred by the Group in a business combination includes assets or liabilities resulting from a contingent consideration arrangement, the contingent consideration is measured at its acquisition-date fair value and included as part of the consideration transferred in a business combination. Changes in the fair value of the contingent consideration that qualify as measurement-period adjustments are adjusted retrospectively, with corresponding adjustments against goodwill. Measurement-period adjustments are adjustments that arise from additional information obtained during the 'measurement period' (which cannot exceed one year from the acquisition date) about facts and circumstances that existed at the acquisition date.

The subsequent accounting for changes in the fair value of the contingent consideration that do not qualify as measurement-period adjustments depends on how the contingent consideration is classified. Contingent consideration that is classified as equity is not remeasured at subsequent reporting dates and its subsequent settlement is accounted for within equity. Contingent consideration that is classified as an asset or a liability is remeasured at subsequent reporting dates in accordance with Korean IFRS 1109 – Financial Instruments or Korean IFRS 1037 – Provisions, Contingent Liabilities and Contingent Assets, as appropriate, with the corresponding gain or loss being recognized in profit or loss.

When a business combination is achieved in stages, the Group's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date and the resulting gain or loss, if any, is recognized in profit or loss. Amounts arising from interests in the acquiree prior to the acquisition date that have previously been recognized in other comprehensive income are reclassified to profit or loss, where such treatment would be appropriate if that interest were disposed of.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period (see above), or additional assets or liabilities are recognized, to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognized at that date.

### 2.5 Investments in Associates and Joint Ventures

Associates are entities over which the Group has significant influence but not control or joint

### Notes to the Consolidated Financial Statements

**December 31, 2018 and 2017** 

control. Investments in associates are accounted for using the equity method of accounting, after initially being recognized at cost. Unrealized gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates. If there is an objective evidence of impairment for the investment in the associate, the Group recognizes the difference between the recoverable amount of the associate and its carrying amount as impairment loss

### 2.6 Goodwill

Goodwill resulting from an acquisition of a business is carried at cost as established at the date of acquisition of the business, less accumulated impairment losses, if any.

For the purpose of impairment testing, goodwill is allocated to each of the Group's cash-generating units (CGUs) (or groups of CGUs) that is expected to benefit from the synergies of the combination.

A CGU to which goodwill has been allocated is tested for impairment annually, or more frequently, when there is an indication that the unit may be impaired. If the recoverable amount of the CGU is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit on a pro rata basis based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognized directly in profit or loss in the consolidated statements of comprehensive income. An impairment loss recognized for goodwill is not reversed in the subsequent periods.

On disposal of the relevant CGU, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

### 2.7 Foreign Currencies

The individual financial statements of each entity in the Group are presented in the currency of the primary economic environment in which the entity operates (its functional currency). For the purpose of the consolidated financial statements, the results and financial position of each entity are expressed in currency units (KRW), which is the functional currency of the Parent Company and the presentation currency for the consolidated financial statements.

In preparing the financial statements of the individual entities, transactions in currencies other than the entity's functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences are recognized in profit or loss in the period in which they arise, except for:

# Notes to the Consolidated Financial Statements December 31, 2018 and 2017

- exchange differences on foreign currency borrowings related to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings;
- exchange differences on transactions entered into in order to hedge certain foreign currency;
   and
- exchange differences on monetary items receivable from or payable to a foreign operation for
  which settlement is neither planned nor likely to occur (therefore, forming part of the net
  investment in the foreign operation), which are recognized initially in other comprehensive
  income and reclassified from equity to profit or loss on disposal or partial disposal of the net
  investment.

For the purpose of presenting consolidated financial statements, the assets and liabilities of the Group's foreign operations are expressed in currency units using exchange rates prevailing at the end of the reporting period. Income and expense items are translated at the average exchange rates for that period, unless exchange rates fluctuated significantly during that period, in which case the exchange rates at the dates of the transactions are used. Exchange differences arising, if any, are recognized in other comprehensive income and accumulated in equity (attributed to non-controlling interests, as appropriate).

#### 2.8 Cash and due from banks

Cash and due from banks consist of cash on hand, demand deposits and highly liquid investment assets that are readily convertible to known amounts of cash and subject to an insignificant risk of changes in value.

### 2.9 Financial Assets

### (a) Classification

From January 1, 2018, the Group classifies its financial assets in the following measurement categories:

- those to be measured at fair value through profit or loss
- those to be measured at fair value through other comprehensive income, and
- · those to be measured at amortized cost.

The classification depends on the Group's business model for managing the financial assets and the contractual terms of the cash flows.

For financial assets measured at fair value, gains and losses will either be recorded in profit or loss or other comprehensive income. For investments in debt instruments, this will depend on the business model in which the investment is held. The Group reclassifies debt investments when, and only when its business model for managing those assets changes.

For investments in equity instruments that are not held for trading, this will depend on whether the Group has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income.

# Notes to the Consolidated Financial Statements December 31, 2018 and 2017

### (b) Measurement

At initial recognition, the Group measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

#### A. Debt instruments

Subsequent measurement of debt instruments depends on the Group's business model for managing the asset and the cash flow characteristics of the asset. The Group classifies its debt instruments into one of the following three measurement categories:

- Amortized cost: Assets that are held for collection of contractual cash flows where those
  cash flows represent solely payments of principal and interest are measured at amortized
  cost. A gain or loss on a debt investment that is subsequently measured at amortized
  cost and is not part of a hedging relationship is recognized in profit or loss when the asset
  is derecognized or impaired.
- Fair value through other comprehensive income: Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at fair value through other comprehensive income. Movements in the carrying amount are taken through other comprehensive income, except for the recognition of impairment loss (reversal of impairment loss), interest income and foreign exchange gains and losses which are recognized in profit or loss. When the financial asset is derecognized, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss.
- Fair value through profit or loss: Assets that do not meet the criteria for amortized cost or fair value through other comprehensive income are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss and is not part of a hedging relationship is recognized in profit or loss.

### B. Equity instruments

The Group subsequently measures all equity investments at fair value. Where the Group's management has elected to present fair value gains and losses on equity investments, which held for long-term investment or strategic purpose, in other comprehensive income, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividend income from such investments continue to be recognized in profit or loss when the right to receive payments is established.

### Notes to the Consolidated Financial Statements

**December 31, 2018 and 2017** 

Changes in the fair value of financial assets at fair value through profit or loss are recognized in profit or loss in the statement of profit or loss as applicable. Impairment loss (reversal of impairment loss) on equity investments measured at fair value through other comprehensive income are not reported separately from other changes in fair value.

### (c) Impairment

The Group assesses on a forward looking basis the expected credit losses associated with its debt instruments carried at amortized cost and fair value through other comprehensive income. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

For debt securities at fair value through other comprehensive income and financial assets measured at amortized costs, expected credit losses are measured at estimation of probability weighted present value calculated as the difference between its cash flows which are contractually expected to receive during over the life of financial instruments and actually expected to receive discounted at the original effective interest rate.

Lifetime expected losses will be recognized on assets for which there is a significant increase in credit risk after initial recognition. The Group recognizes 12-month expected credit losses in profit or loss where credit risk did not increase significantly.

### (d) Recognition and Derecognition

Regular way purchases and sales of financial assets are recognized or derecognized on tradedate, the date on which the Group commits to purchase or sell the asset. Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all the risks and rewards of ownership. If a transfer does not result in derecognition because the Group has retained substantially all the risks and rewards of ownership of the transferred asset, the Group continues to recognize the transferred asset in its entirety and recognizes a financial liability for the consideration received.

### 2.10 Financial Liabilities and Equity Instruments

### (a) Classification as debt or equity

Debt and equity instruments issued by the Group are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement and the definitions of financial liability and an equity instrument.

### (b) Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Group are recognized at the proceeds received, net of direct issue costs.

### Notes to the Consolidated Financial Statements

**December 31, 2018 and 2017** 

Repurchase of the Company's own equity instruments is recognized and deducted directly in equity. No gain or loss is recognized in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

### (c) Hybrid Capital Instruments

The Group classifies issued capital instrument, or its component parts, on initial recognition as a financial liability or an equity instrument in accordance with the substance of the contractual arrangement and the definitions of a financial liability and an equity instrument. Hybrid capital instruments which the Bank has an unconditional right to avoid delivering cash or another financial asset to settle a contractual obligation are classified as equity instruments and presented in equity.

### (d) Financial liabilities

The Group's financial liabilities at fair value through profit or loss are financial instruments held for trading. A financial liability is held for trading if it is incurred principally for the purpose of repurchasing in the near term. A derivative that is not a designated as hedging instruments and an embedded derivative that is separated are also classified as held for trading.

The Group classifies non-derivative financial liabilities, except for financial liabilities at fair value through profit or loss, financial guarantee contracts and financial liabilities that arise when a transfer of financial assets does not qualify for derecognition, as financial liabilities carried at amortized cost and present as 'deposit liabilities', 'borrowings', and 'other financial liabilities' in the statement of financial position.

### (e) Financial guarantee contracts

Financial guarantee contracts are recognized as a financial liability at the time the guarantee is issued. The liability is initially measured at fair value, subsequently at the higher of following:

- the amount determined in accordance with the expected credit loss model under Korean IFRS
   1109 Financial Instruments and
- the amount initially recognized less, where appropriate, the cumulative amount of income recognized in accordance with Korean IFRS 1115 Revenue from Contracts with Customers

### (f) Derecognition of financial liabilities

Financial liabilities are removed from the statement of financial position when it is extinguished; for example, when the obligation specified in the contract is discharged or cancelled or expired or when the terms of an existing financial liability are substantially modified. The difference between the carrying amount of a financial liability extinguished or transferred to another party and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognized in profit or loss.

# Notes to the Consolidated Financial Statements December 31, 2018 and 2017

### (g) Offsetting of financial instruments

Financial assets and liabilities are offset and the net amount reported in the statements of financial position where there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the assets and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Group or the counterparty.

#### 2.11 Derivative Instruments

The Group enters into a variety of derivative financial instruments to manage its exposure to interest rate and foreign exchange rate risk, including foreign exchange forward contracts, interest rate swaps and cross-currency swaps.

Derivatives are initially recognized at fair value at the date the derivative contract is entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognized in profit or loss immediately, unless the derivative is designated and effective as a hedging instrument; in such case, the timing of the recognition in profit or loss depends on the nature of the hedge relationship. The Group designates certain derivatives either as hedges of recognized assets or liabilities or firm commitments (fair value hedges), hedges of highly probable forecast transactions or hedges of foreign currency risk of firm commitments (cash flow hedges) or hedges of net investments in foreign operations (net investment hedges).

A derivative with a positive fair value is recognized as a financial asset; a derivative with a negative fair value is recognized as a financial liability. A derivative is presented as a non-current asset or a non-current liability if the remaining maturity of the instrument is more than 12 months and it is not expected to be realized or settled within 12 months. Other derivatives are presented as current assets or current liabilities.

### (a) Embedded derivatives

Derivatives embedded in other financial instruments or other host contracts are treated as separate derivatives when their risks and characteristics are not closely related to those of the host contracts and the host contracts are not measured at FVTPL.

An embedded derivative is presented as a non-current asset or a non-current liability if the remaining maturity of the hybrid instrument to which the embedded derivative relates is more than 12 months and it is not expected to be realized or settled within 12 months. Other embedded derivatives are presented as current assets or current liabilities.

#### (b) Hedge accounting

The Group designates certain hedging instruments, which include derivatives, embedded derivatives and non-derivatives in respect of foreign currency risk, as either fair value hedges, cash flow hedges or hedges of net investments in foreign operations. Hedges of foreign exchange risk on firm commitments are accounted for as cash flow hedges.

## Notes to the Consolidated Financial Statements December 31, 2018 and 2017

At the inception of the hedge relationship, the entity documents the relationship between the hedging instrument and the hedged item, along with its risk management objectives and its strategy for undertaking various hedge transactions.

Furthermore, at the inception of the hedge and on an ongoing basis, the Group documents whether the hedging instrument is highly effective in offsetting changes in fair values or cash flows of the hedged item.

### (c) Fair value hedges

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recognized in profit or loss immediately, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. The change in the fair value of the hedging instrument and the change in the hedged item attributable to the hedged risk are recognized in the line item of the consolidated statements of comprehensive income relating to the hedged item.

Hedge accounting is discontinued when the Group revokes the hedging relationship; when the hedging instrument expires or is sold, terminated or exercised; or when it no longer qualifies for hedge accounting. The fair value adjustment to the carrying amount of the hedged item arising from the hedged risk is amortized to profit or loss from that date.

### (d) Cash flow hedges

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognized in other comprehensive income. The gain or loss related to the ineffective portion is recognized immediately in profit or loss, and is included in the 'other non-operating income and expenses' line item.

Amounts previously recognized in other comprehensive income and accumulated in equity are reclassified to profit or loss in the periods when the hedged item is recognized in profit or loss, in the same line of the consolidated statements of comprehensive income as the recognized hedged item. However, when the forecast transaction that is hedged results in the recognition of a non-financial asset or a non-financial liability, the gains and losses previously accumulated in equity are transferred from equity and included in the initial measurement of the cost of the non-financial asset or non-financial liability.

Hedge accounting is discontinued when the Group revokes the hedging relationship; when the hedging instrument expires or is sold, terminated or exercised; or it no longer qualifies for hedge accounting. Any gain or loss accumulated in equity at that time remains in equity and is recognized when the forecast transaction is ultimately recognized in profit or loss. When a forecast transaction is no longer expected to occur, the gain or loss accumulated in equity is recognized immediately in profit or loss.

# Notes to the Consolidated Financial Statements December 31, 2018 and 2017

### 2.12 Property and Equipment

Property and equipment are stated at cost, less subsequent accumulated depreciation and accumulated impairment losses. The cost of an item of property and equipment directly attributable to their purchase or construction includes any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. It also includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located.

Subsequent costs are recognized in the carrying amount of an asset or as an asset if it is probable that future economic benefits associated with the assets will flow into the Group and the cost of the asset can be measured reliably. Routine maintenance and repairs are expensed as incurred.

The Group does not depreciate land. Depreciation expense is computed using the straight-line method based on the estimated useful lives of the assets as follows:

	Useful life (Years)	Depreciation method
Construction	50	Straight line
Leasehold improvements	5	Straight line
Equipment	5	Straight line
Fixtures	5	Straight line
Vehicles	5	Straight line

If each part of an item of property and equipment has a cost that is significant in relation to the total cost of the item, it is depreciated separately.

The Group reviews the depreciation method, the estimated useful lives and residual values of property and equipment at the end of each annual reporting period. If expectations differ from previous estimates, the changes are accounted for as a change in an accounting estimate.

An item of property and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the period in which the property is derecognized.

### 2.13 Investment Property

Investment property is property held to earn rentals and/or for capital appreciation (including property under construction for such purposes). Investment property is measured initially at cost, including transaction costs. Subsequent to initial recognition, investment property is measured at fair value. Gains and losses arising from changes in the fair value of investment property are included in profit or loss in the period in which they arise.

An investment property is derecognized upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from the disposal. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the

### Notes to the Consolidated Financial Statements

**December 31, 2018 and 2017** 

period in which the property is derecognized.

While land is not depreciated, all other investment property is depreciated based on the respective assets' estimated useful lives ranging from 50 years using the straight-line method.

The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

An investment property is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Gains or losses arising from derecognition of investment property, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognized in net income in the period in which the asset is derecognized.

#### 2.14 Leases

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

### (a) The Group as lessor

Amounts due from lessees under finance leases are recognized as receivables at the amount of the Group's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Group's net investment outstanding in respect of the leases.

Rental income from operating leases is recognized on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized on a straight-line basis over the lease term.

### (b) The Group as lessee

Assets held under finance leases are initially recognized as assets of the Group at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the consolidated statements of financial position as a finance lease obligation.

Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognized immediately in profit or loss, unless they are directly attributable to qualifying assets, in which case they are capitalized in accordance with the Group's general policy on borrowing costs. Contingent rentals are recognized as expenses in the periods in which they are incurred.

Operating lease payments are recognized as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which

### Notes to the Consolidated Financial Statements

**December 31, 2018 and 2017** 

economic benefits from the leased asset are consumed. Contingent rentals arising under operating leases are recognized as an expense in the period in which they are incurred.

In the event that lease incentives are received to enter into operating leases, such incentives are recognized as a liability. The aggregate benefit of incentives is recognized as a reduction of rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

### 2.15 Intangible Assets

### (a) Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at cost, less accumulated amortization and accumulated impairment losses. Amortization is recognized on a straight-line basis over their estimated useful lives. The estimated useful life and amortization method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost, less accumulated impairment losses.

### (b) Internally generated intangible assets — research and development expenditure

Expenditure on research activities is recognized as an expense in the period in which it is incurred. Expenditure arising from development (or from the development phase of an internal project) is recognized as an intangible asset if, only if, the development project is designed to produce new or substantially improved products, and the Group can demonstrate the technical and economical feasibility and measure reliably the resources attributable to the intangible asset during its development. The amount initially recognized for internally generated intangible assets is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria. Where no internally generated intangible asset can be recognized, development expenditure is recognized in profit or loss in the period in which it is incurred.

Subsequent to initial recognition, internally generated intangible assets are reported at cost, less accumulated amortization and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

### (c) Intangible assets acquired in a business combination

Intangible assets that are acquired in a business combination are recognized separately from goodwill and are initially recognized at their fair value at the acquisition date (which is regarded as their cost). Subsequent to initial recognition, intangible assets acquired in a business combination are reported at cost, less accumulated amortization and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

# Notes to the Consolidated Financial Statements December 31, 2018 and 2017

The Group amortizes intangible assets with a limited useful life using the straight-line method over the following periods:

### **Useful life (Years)**

Development costs	3~5
Software	3~5
Industrial property rights	5
Others	3~10

### (d) Derecognition of intangible assets

An intangible asset is derecognized on disposal, or when no future economic benefits are expected from its use. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognized in profit or loss when the asset is derecognized.

### 2.16 Impairment of Property and Equipment and Intangible Assets Other Than Goodwill

At the end of each reporting period, the Group reviews the carrying amounts of its property and equipment and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the CGU to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual CGUs, or otherwise they are allocated to the smallest group of CGUs for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value, less costs to sell and value in use. If the recoverable amount of an asset (or a CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or the CGU) is reduced to its recoverable amount and the reduced amount is recognized in profit or loss.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or a CGU) is increased to the revised estimate of its recoverable amount, so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or the CGU) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

### 2.17 Non-current Assets Held for Sale

Non-current assets (or disposal group) are classified as held for sale when their carrying amount will be recovered principally through a sale transaction rather than through continuing use and a

# Notes to the Consolidated Financial Statements December 31, 2018 and 2017

sale is considered highly probable. The assets are measured at the lower amount between their carrying amount and the fair value less costs to sell.

When the Group is committed to a sale plan involving loss of control of a subsidiary, all of the assets and liabilities of that subsidiary are classified as held for sale when the criteria described above are met, regardless of whether the Group will retain a non-controlling interest in its former subsidiary after the sale.

When the Group is committed to a sale plan involving disposal of an investment, or a portion of an investment, in an associate or joint venture, the investment or the portion of the investment that will be disposed of is classified as held for sale when the criteria described above are met, and the Group discontinues the use of the equity method in relation to the portion that is classified a held for sale. Any retained portion of an investment in an associate or a joint venture that has not been classified as held for sale continues to be accounted for using the equity method. The Group discontinues the use of the equity method at the time of disposal when the disposal results in the Group losing significant influence over the associate or joint venture.

After the disposal takes place, the Group accounts for any retained interest in the associate or joint venture in accordance with Korean IFRS 1109 *Financial Instruments*, unless the retained interest continues to be an associate or a joint venture, in which case the Group uses the equity method.

Non-current assets (and disposal groups) classified as held for sale are measured at the lower of their previous carrying amount and fair value less costs to sell.

### 2.18 Provisions

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material). The discount rate used is a pretax rate that reflects current market assessments of the time value of money and the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage is recognized in profit or loss as borrowing cost.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

At the end of each reporting period, the remaining provision balance is reviewed and assessed to determine if the current best estimate is being recognized. If the existence of an obligation to transfer economic benefit is no longer probable, the related provision is reversed during the period.

## Notes to the Consolidated Financial Statements December 31, 2018 and 2017

#### \_\_\_\_

(a) Onerous contracts

Present obligations arising under onerous contracts are recognized and measured as provisions. An onerous contract is considered to exist where the Group has a contract under which the

unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received from the contract.

#### (b) Restructurings

A restructuring provision is recognized when the Group has developed a detailed formal plan for the restructuring and has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement the plan or announcing its main features to those affected by it. The measurement of a restructuring provision includes only the direct expenditures arising from the restructuring, which are those amounts that are both necessarily entailed by the restructuring and not associated with the ongoing activities of the entity.

Present obligations arising under onerous contracts are recognized and measured as provisions. An onerous contract is considered to exist where the Group has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received from the contract. The unavoidable costs under a contract reflect the least net cost of exiting from the contract, which is the lower one between the cost of fulfilling it and any compensation or penalties arising from failure to fulfill it.

#### (c) Contingent liabilities acquired in a business combination

Contingent liabilities acquired in a business combination are initially measured at fair value at the acquisition date. At the end of the subsequent reporting periods, such contingent liabilities are measured at the higher of the amount that would be recognized in accordance with Korean IFRS 1037 *Provisions, Contingent Liabilities and Contingent Assets*, and the amount initially recognized less, where applicable, the cumulative amount of income recognized in accordance with Korean IFRS 1115 *Revenue from Contracts with Customers*.

## 2.19 Post-employment Benefit Costs and Termination Benefits

Contributions to defined contribution plans are recognized as an expense when employees have rendered service entitling them to the contributions.

For defined benefit plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each reporting period. Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding interest), is reflected immediately in the consolidated statements of financial position with a charge or credit recognized in other comprehensive income in the period in which they occur. Remeasurement recognized in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to profit or loss. Past service cost is recognized in profit or loss in the period of a plan amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset. Defined benefit costs are composed of service cost (including

## Notes to the Consolidated Financial Statements December 31, 2018 and 2017

current service cost, past service cost, as well as gains and losses on curtailments and settlements), net interest expense (income) and remeasurement.

The Group presents the service cost and net interest expense (income) components in profit or loss, and the remeasurement component in other comprehensive income. Curtailment gains and losses are accounted for as past service costs.

The defined benefit liability recognized in the consolidated statements of financial position represents the actual deficit or surplus in the Group's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

A liability for a termination benefit is recognized at the earlier of when the entity can no longer withdraw the offer of the termination benefit and when the entity recognizes any related restructuring costs.

Discretionary contributions made by employees or third parties reduce service cost upon payment of these contributions to the plan. When the formal terms of the plans specify that there will be contributions from employees or third parties, the accounting depends on whether the contributions are linked to service, as follows:

If the contributions are not linked to services (e.g., contributions are required to reduce a deficit arising from losses on plan assets or from actuarial losses), they are reflected in the remeasurement of the net defined benefit liability (asset).

If contributions are linked to services, they reduce service costs. For the amount of contribution that is dependent on the number of years of service, the entity reduces service cost by attributing the contributions to periods of service using the attribution method required by Korean IFRS 1019 paragraph 70 for the gross benefits.

#### 2.20 Revenue and Expense Recognition

#### (a) Interest income and expense

Using the effective interest rate method, the Group recognizes interest income and expense on financial instruments at amortized cost and at fair value through other comprehensive income in the consolidated statements of comprehensive income. The amortized cost of financial assets or liabilities is calculated based on the effective interest rate method and the interest income and expenses are allocated over the relevant period.

The effective interest rate reconciles the expected future cash in and out through the expected life of financial instruments or, if appropriate, through shorter period and net carrying amount of financial assets or liabilities. When calculating the effective interest rate, the Group estimates future cash flows considering all contractual terms of the financial instruments, except for the loss on future credit risk. Also, the effective interest rate calculation includes redemption costs, points (if it is a part of the effective interest rate) that are paid or earned between contracting parties, transaction costs and other premiums and discounts.

## Notes to the Consolidated Financial Statements

**December 31, 2018 and 2017** 

Once a financial asset or a group of similar financial assets has been written down as a result of an impairment loss, interest income is thereafter recognized using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

In addition, interest income arising from debt instruments at fair value through profit or loss is classified as interest income in the consolidated statements of comprehensive income.

#### (b) Commission income

Financial service fees are recognized in accordance with the accounting standard of the financial instrument related to the fees earned, as followings:

1) Fees that are a part of the financial instruments' effective yield

Fees that are a part of the effective interest rate of a financial instrument are treated as an adjustment to the effective interest rate. Such fees include compensation for activities, such as evaluating the borrower's financial condition; evaluating and recording guarantees, collateral and other security arrangements; negotiating the terms of the instrument; preparing and processing documents; and closing the transaction, as well as origination fees received on issuing financial liabilities measured at amortized cost. These fees are deferred and recognized as an adjustment to the effective interest rate. However, in case the financial instrument is classified as a financial asset at FVTPL, the relevant fee is recognized as revenue when the instrument is initially recognized.

#### ② Commission from rendering services

Commission income from rendering services, such as asset management, trustee business and financial guarantee, is recognized as the services are provided. When it is not probable that specific loan agreement is contracted and agreed commission is not applied to Korean IFRS 1109, those services will be recognized on a straight-line basis as the work is performed.

#### (3) Commission from significant act performed

The recognition of revenue is postponed until the significant act is executed. On performing significant transactions, the earned commissions are recognized as gains and losses at the time the transactions are completed.

The commissions and sales commissions that are paid for the participation in negotiations for the third party are recognized as gains and losses at the time the transactions of the third party are completed.

The Group arranges a syndicated loan, but does not participate in the syndicate or has the same effective gains and losses with other participants; fees on syndicated loan are recognized as gains and losses when the transactions of syndicated loan are completed.

4 Unearned revenue from point programs (customer loyalty program)

# Notes to the Consolidated Financial Statements December 31, 2018 and 2017

The Group operates customer loyalty program to provide customers with incentives to buy their goods or services. If a customer buys goods or services, the entity grants the customer award credits (often described as 'points'). The customer can redeem the award credits for awards, such as free or discounted goods or services. The award credits are accounted separately as identifiable component of the sales transaction(s) in which they are granted (the 'initial sales'). The fair value of the consideration received or receivable with respect to the initial sale shall be allocated between the award credits and the other components of the sale. If the Group supplies the awards itself, it shall recognize the consideration allocated to award credits as revenue when award credits are redeemed and it fulfills its obligation to supply awards. The amount of revenue recognized shall be based on the number of award credits that have been redeemed in exchange for awards, related to the total number expected to be redeemed.

If the third party supplies the awards, the Group shall assess whether it is collecting the consideration allocated to the award credits on its own account (as the principal in the transaction ) or on behalf of the third party (as agent for the third party). The amount of revenue recognized shall be net amount retained on its own account.

#### (c) Dividend income

Dividend income is recognized when the shareholders are entitled to receive dividends. According to the classification of equity securities, dividend income is indicated in the consolidated statements of comprehensive income.

#### 2.21 Income Tax Expense

Income tax expense consists of current and deferred taxes.

In accordance with the Korean Corporate Tax Act, the Group and its 100%-owned domestic subsidiaries have filed a consolidated tax return. Accordingly, the Group recognizes total corporate income tax due as a current tax liability and the amounts due from subsidiaries as loans and receivables. The Group applies the consolidated taxation system, the way that the Group reports and pays income tax based on the total amount of income regarding the Group and all domestic subsidiaries on which the Group completely controls over as a single taxation unit. Deferred taxes are measured based on the future tax benefits expected to be realized in consideration of the expected combined profits or losses of eligible companies in accordance with the consolidated corporate tax system. The Group recognizes total amount of tax payables in accordance with the consolidated corporate tax system as a parent Group and recognizes receivables, which will be received from subsidiaries.

### (a) Current tax

The tax currently payable is based on taxable profit for the period. Taxable profit differs from profit or loss before tax expenses as reported in the consolidated statements of comprehensive income because of items of income or expense that are taxable or deductible in other periods. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

# Notes to the Consolidated Financial Statements December 31, 2018 and 2017

#### (b) Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred income tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred income tax assets and liabilities are not recognized if the taxable or deductible temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit (taxable deficit) nor the accounting profit.

Deferred income tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries and associates, and interests in joint ventures, except where the Group is able to control the reversal of the temporary difference, and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax assets arising from deductible temporary differences associated with such investments and interests are only recognized to the extent it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred income tax assets is reviewed at the end of each reporting period and reduced to the extent it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

The Group shall offset deferred tax assets and deferred tax liabilities if, and only if, the Group has a legally enforceable right to set off current tax assets against current tax liabilities, and the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities that intend either to settle current tax liabilities and assets on a net basis, or to realize the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

If a deferred tax liability or asset arises from investment property that is measured using the fair value model in Korean IFRS 1040, *Investment Property*, there is a rebuttable presumption that the carrying amount of the investment property will be recovered through sale. Accordingly, unless the presumption is rebutted, the measurement of the deferred tax liability or deferred tax asset shall reflect the tax consequences of recovering the carrying amount of the investment property entirely through sale. This presumption is rebutted if the investment property is depreciable and is held

## Notes to the Consolidated Financial Statements December 31, 2018 and 2017

within a business model whose objective is to consume substantially all of the economic benefits embodied in the investment property over time, rather than through sale.

#### (c) Current and deferred taxes for the year

Current and deferred taxes are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity; in which case, the current and deferred taxes are also recognized in other comprehensive income or directly in equity. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

#### 2.22 Accounting for Trust Accounts

In accordance with the Financial Investment Services and Capital Market Act, the Group establishes savings accounts under trust agreements ("trust account") separately from its bank accounts and administers the funds for the benefit of one or more beneficiaries. Funds transferred between a bank account and trust account are recognized as due to/from trust accounts. The fees and commissions received from trust accounts are recognized when the Group provides services to the trust accounts.

With respect to certain trust account products, the Group guarantees the repayment of the principal of the trust accounts and, in certain cases, a fixed rate of return. If income from such trust accounts is insufficient to pay the guaranteed amount, such deficiency is satisfied by using special reserves maintained in the trust accounts, offsetting trust fee payable to the Group accounts and receiving compensating contributions from the Group accounts of the Group. If the Group pays compensating contributions to the trusts with the guaranteed return to cover such deficiencies, these contributions are reflected as operating expense of the Group accounts and as other income of the trust accounts.

#### 2.23 Fair Value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these consolidated financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of Korean IFRS 1102, *Share-Based Payment*, leasing transactions that are within the scope of Korean IFRS 1017, *Leases*, and measurements that have some similarities to fair value, but are not fair value, such as net realizable value in Korean IFRS 1002, *Inventories*, or value in use in Korean IFRS 1036, *Impairment of Assets*.

In addition, for financial reporting purposes, fair value measurements are categorized into Levels 1, 2 and 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

## Notes to the Consolidated Financial Statements December 31, 2018 and 2017

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

#### 2.24 Operating Segments

The Group makes a decision about resources to be allocated within segments and divides segments based on internal reports for management to evaluate performances regularly. Each segment consists of the Group's own strategic business units. The segments provide their products and services and they are separately operated by their business units due to the difference between technical and marketing strategies.

#### 2.25 Approval of Issuance of the Financial Statements

The consolidated financial statements 2018 were approved for issue by the Board of Directors on February 12, 2019 and are subject to change with the approval of shareholders at their Annual General Meeting on March 28, 2019.

#### 3. Critical Accounting Estimates and Assumptions

The preparation of financial statements requires the Group to make estimates and assumptions concerning the future. Management also needs to exercise judgement in applying the Group's accounting policies. Estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. As the resulting accounting estimates will, by definition, seldom equal the related actual results, it can contain a significant risk of causing a material adjustment.

Significant accounting estimates and assumptions applied in the preparation of these consolidated financial statements are the same as those that applied to the consolidated financial statements for the year ended December 31, 2017, except for the accounting estimates and assumptions from adoption of Korean IFRS 1109 as discussed below.

#### (a) Estimated goodwill impairment

The Group tests whether goodwill has suffered any impairment on an annual basis. The recoverable amount of a cash generating unit (CGU) is determined based on value-in-use calculations

## Notes to the Consolidated Financial Statements December 31, 2018 and 2017

#### (b) Income taxes

The Group's taxable income generated from these operations are subject to income taxes based on tax laws and interpretations of tax authorities in numerous jurisdictions. There are many transactions and calculations for which the ultimate tax determination is uncertain.

If certain portion of the taxable income is not used for investments or increase in wages or dividends in accordance with the *Tax System For Recirculation of Corporate Income*, the Group is liable to pay additional income tax calculated based on the tax laws. The new tax system is effective for three years from 2015. Accordingly, the measurement of current and deferred income tax is affected by the tax effects from the new tax system. As the Group's income tax is dependent on the investments, increase in wages and dividends, there is an uncertainty measuring the final tax effects.

#### (c) Fair value of financial instruments

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. The Group uses its judgment to select a variety of methods and make assumptions that are mainly based on market conditions existing at the end of each reporting period.

#### (d) Impairment of financial assets

The provision for impairment for financial assets are based on assumptions about risk of default and expected loss rates. The Group uses judgement in making these assumptions and selecting the inputs to the impairment calculation based on the Group's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

#### (e) Net defined benefit liability

The present value of net defined benefit liability depends on a number of factors that are determined on an actuarial basis using a number of assumptions including the discount rate.

### 4. Financial Risk Management

## 4.1 General

#### (a) General risk management policy

The Group is exposed to various financial risks, such as credit risk, liquidity risk, market risk and operational risk, associated with financial instruments. These risks are recognized, measured and reported in accordance with risk management guidelines established at the Parent Company level and implemented at the subsidiary level.

This outline indicates the level of exposure to such risks and objectives, policies, risk assessment, management procedures and capital management of the Group. Additional quantitative information is disclosed in the consolidated financial statements.

## Notes to the Consolidated Financial Statements

**December 31, 2018 and 2017** 

The Group's risk management system has focused on increasing the transparency of risk and supporting the long-term strategy and management decision making to deal with rapid changes in the financial environment. The Group realizes the important risks, such as credit risk, market risk, operational risk, credit concentration risk, interest rate risk, liquidity risk, strategy risk and reputation risk. It measures and manages the quantitative economic capital or value at risk ("VaR") by using the statistical method.

#### (b) Organization of risk management

#### i) Risk management committee

The risk management committee establishes a risk management strategy in accordance with the strategic direction chosen by the Board of Directors, determines the possible level of risk and manages the level of risk that the Group faced and the condition of risk management activities as a top decision-making organization.

#### ii) Risk management council

Risk management council is responsible for coordinating with the risk management units of subsidiaries to ensure that they implement the policies, guidelines and limits established by the risk management committee. The Group's risk management council is composed of the Group's chief risk management officer and the chief risk management officers of subsidiaries.

#### iii) Risk management division

The Group's risk management division performs detailed risk policies, procedures and business processes of risk management, and is responsible for managing and monitoring the limit of the Group's economic capital.

#### 4.2 Credit Risk

#### (a) General

The credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises primarily from the Group's loan, card assets and securities. The Group considers all the elements of individual borrower's credit risk exposure, including default and breach.

#### (b) Risk management framework

The Group assesses its required expected loss and economic capital by managing all credit exposures on or off balance sheet.

The Group establishes and manages total exposure limits for borrowers and industries in order to optimize the use of credit availability and avoid excessive risk concentration.

The credit management division and management planning division manage the credit risk by integrating and establishing credit policy, monitoring loan portfolios and restructuring the loans

## Notes to the Consolidated Financial Statements

**December 31, 2018 and 2017** 

independently from the marketing division. The risk management division conducts the measurement of the economic capital, total exposure management, credit evaluation and approval and reviews the credit evaluation model.

## (c) Maximum exposure to credit risk

The Group's maximum exposure of financial instruments except for equity securities to credit risk that does not consider value of collateral as at December 31, 2018 and 2017, are as follows:

(in millions of Korean won)		2018		2017
On balance				
Cash and due from banks Financial assets at fair value through profit or	₩	2,067,219	₩	2,127,570

### (d) Analysis of credit quality of financial assets

Credit quality is classified based on internal credit grades as follows:

	Household	Corporates, public sector and other
Grade 1	1	AAA
Grade 2	2	AA+, AA
Grade 3	3	AA-
Grade 4	4	A
Grade 5	5	BBB, BBB-
Grade 6	6	BB+, BB, BB-
Grade 7	7-10	B, B-, C, C-, D

## **Notes to the Consolidated Financial Statements December 31, 2018 and 2017**

The gross carrying amount of loans, receivables and debt securities by credit risk grade as at December 31, 2018, is as follows:

#### 4.3 Liquidity Risk

#### (a) General

Liquidity risk is the risk that the Group is unable to meet its payment obligations arising from financial liabilities as they fall due. The Group classifies and discloses contractual maturity of all financial liabilities into six categories in relation to liquidity risk, such as immediately payable, less than one month, one month to three months, three months to one year, less than one year, one year to five years and more than five years. Although off-balance-sheet items, such as loan commitment and financial guarantees, have contractual maturities, they are separately disclosed as the Group will pay them immediately upon counterparty's request for payment.

The cash flows disclosed in the maturity analysis are undiscounted contractual amounts, including principal and future interest payments, which resulted in disagreement with the discounted cash flows included in the consolidated statements of financial position.

#### (b) Liquidity risk management

General principles and the overall framework for managing liquidity risk across the Group are defined in the liquidity risk policy by risk management regulation, risk management instruction and liquidity risk manual.

All transactions that affect inflows and outflows of Korean/foreign currency funds across the Group are subject to the liquidity risk management. Liquidity risk is centrally managed and controlled by the Financial Planning Department, which reports its analysis and statics of the liquidity, including liquidity gap, liquidity ratio, maturity mismatch ratio and liquidity risk situation, to the asset-liability management committee ("ALCO"). The financial strategies that are required to achieve the Group's risk management goal, including liquidity risk management, are set out and overseen by the ALCO.

## Notes to the Consolidated Financial Statements December 31, 2018 and 2017

(c) Remaining contractual maturity analysis of non-derivative and derivative financial liabilities

The Group's non-derivative financial liabilities as at December 31, 2018, are summarized by remaining contractual maturity as follows:

(in millions	of Korean
--------------	-----------

won)	2018										
	Less than		3–12		More than						
	one month	1-3 months	months	1-5 years	five years	Total					
Financial liabilities 1:

	-	- ·			·						

<sup>&</sup>lt;sup>1</sup> Principal and interest are included in financial liabilities.

### (d) Marginal residual maturity (payment guarantee, commitments and others)

Guarantees, loan commitments and other credit facilities provided by the Group have maturities. However, if the counterparty requests the payment immediately, the payment must be fulfilled. The off balance sheet items as at December 31, 2018 and 2017, are as follows:

(in millions of Korean won)		2018	2017				
Guarantees	₩	1,164,061	₩	1,229,169			
Loan commitments		17,667,195		11,148,925			
	₩	18,831,256	₩	12,378,094			

<sup>&</sup>lt;sup>2</sup> Consist of other payables, accrued expenses and leasehold deposits received and others.

## Notes to the Consolidated Financial Statements December 31, 2018 and 2017

#### 4.4 Market Risk

#### (a) General

Market risk is the risk to the Group's earnings arising from changes in interest rates, stock price, currency exchange rates and commodity prices. It is derived from loans, deposits, securities and derivatives and generated through both trading and non-trading positions. The trading market risk that the Group is mainly exposed to is the interest rate risk arising from the change in the value of debt instruments and interest rate-embedded securities due to changes in market interest rate. The Group is additionally exposed to stock price and foreign exchange rate fluctuation risk arising from loans, receivables, deposits, securities and financial derivatives.

#### (b) Market risk management

The Group monitors and sets up the economic capital limit of market risk and interest rate risk to manage trading and non-trading positions. To manage market risk effectively, trading position enforces trading policy regulation and market risk manual, while non-trading position enforces interest rate risk manual, risk management system and procedure. All such processes are approved by the Group's ALCO and risk management council.

The Group's risk management council establishes overall market risk management principles. It has delegated the responsibility of the market risk management for trading activities to the Market Risk Management Subcommittee of the Group. Based on the policies approved by the Group's risk management council, the Market Risk Management Subcommittee reviews and approves reports as required that include trading profits and losses, position reports, limit utilization, sensitivity analysis and VaR results from the trading activities.

Determination of interest rate and commission rate, enactment and amendment of asset-liability management ("ALM") risk management policy and interest rate and commission rate guidelines and analysis of monthly ALM risks are the responsibilities of the ALCO. Interest rate risk limits are determined based on asset-liability position and expected interest rate volatility considering annual operational planning, and are centrally measured and monitored by the financial planning team. Responsibility for management of interest rate risks, such as interest rate gap, duration gap, sensitivity and compliance, with interest rate risk limits policy resides with the Risk Management department, which reports the results to the ALCO on a monthly basis.

#### (c) Market risk management for trading activities

#### a. Definition of trading position

The trading position in accordance with 'Regulation of Trading Policy' is subject to the trading market management. The basic requirements of the trading position are as follows:

- The target position is not restricted to the sale. It is daily evaluated at fair value and should be a hedge against important risks in the market.
- The trading position should be controlled by the instruction of the trading policy and

## Notes to the Consolidated Financial Statements December 31, 2018 and 2017

managed by a separate trading department.

- The target position is operated in accordance with a documented trading strategy and the limit of trading should be controlled.
- Without the prior approval, a professional dealer or an operation division for the target position should be authorized to handle transactions within the predetermined limit.
- The target position to control risk should be periodically reported to management.

#### b. Measurement of market risk occurring at trading position

The Group measures market risk as VaR that is calculated by market risk management system. It generally manages market risk arising from the trading position at the level of the portfolio.

To manage the market risk, the Group monitors and sets up the economic capital limit based on VaR. It sets up and monitors the economic capital limit, position limit and loss cut within the economic capital limit. According to the regulations and rules of the Financial Supervisory Service, the Group controls and manages risks of derivative transactions.

#### c. VaR

#### 1 VaR measurement

The Group uses daily VaR to measure market risk. Daily VaR is a statistically estimated maximum amount of loss that could occur in one day under normal distribution of financial variables. The Group uses a 99% single-tail confidence level, based on past 250 business days, to measure daily VaR, which means the actual amount of loss may exceed the VaR, on average, once out of 100 business days. VaR is a commonly used market risk management technique; however, this approach does have some shortcomings.

The VaR measures the potential loss in value of a risky asset or portfolio based on historical market movements over a defined period for a given confidence interval. However, it is not always possible in practice that the historical market movements reflect all future conditions and circumstances, which results in variance in actual loss timing and size due to the changes in assumptions used in the calculation. In addition, the time periods used for the model, generally one day or 10 days, are assumed to be sufficient holding periods before liquidating the relevant underlying positions. If these holding periods are not sufficient, or too long, the VaR results may understate or overstate the potential loss.

#### ② Back testing

The Group conducts back testing on a daily basis to validate the adequacy of market risk. In back testing, the Group compares both the actual and hypothetical profit and loss with the VaR calculations, and analyzes any results that fall outside its predetermined confidence interval of 99%.

## Notes to the Consolidated Financial Statements

## **December 31, 2018 and 2017**

#### 3 Stress testing

The Group uses stress testing to assess market risk exposure to abnormal market fluctuations, such as interest rate, equity price, exchange rate and implied volatility of derivatives. The Group uses not only historical scenarios as a main scenario, but also hypothetical scenarios as a supplementary analysis. Stress testing projects the anticipated change in value of holding positions under certain scenarios assuming that no action is taken during a stress event to change the risk profile of a portfolio. Stress testing is conducted at least more than once within a quarter.

#### i) Busan Bank

The following table shows VaR as at December 31, 2018 and 2017, at 99% confidence level for a one-day holding period, for interest rate risk, equity price risk and foreign exchange rate risk related to trading activities.

(in millions of	2018									
Korean won)	Max	kimum	Mini	mum		Average		Ending

Total VaR	₩	709	₩	192	₩	267	₩	215		

#### ii) Kyongnam Bank

The following table shows VaR as at December 31, 2018 and 2017, at 99% confidence level for a one-day holding period, for interest rate risk, equity price risk and foreign exchange rate risk related to trading activities.

(in millions of				20	18			
Korean won)	Max	ximum	Mir	imum		Average		Ending
Interest rate risk	₩	1,307	₩	4	₩	102	₩	64
Equity price risk		424		-		207		46
Foreign exchange rate								
risk		10		7		10		4
Diversification		(184)		(4)		(58)		(7)
Total VaR	₩	1,588	₩	7	₩	260	₩	107

## Notes to the Consolidated Financial Statements December 31, 2018 and 2017

(in millions of	2017							
Korean won)	Max	kimum	Mi	nimum		Average		Ending
Interest rate risk	₩	107	₩	55	₩	64	₩	31
Equity price risk		228		46		192		267
Foreign exchange rate								
risk		36		20		20		6
Diversification		(53)		(35)		(38)		(23)
Total VaR	₩	318	₩	86	₩	238	₩	281

The total VaR becomes smaller than the total of interest rate risk, equity price risk and foreign exchange rate risk due to diversification effect.

#### d. Details by risk factors

#### 1 Interest rate risk

Interest rate risk from trading activities arises mainly from the Group's trading of Korean won denominated debt securities. The Group's trading strategy is to benefit from short-term movements in the prices of debt securities arising from changes in interest rates. As the Group's trading accounts are marked to market daily, it manages the interest risk related to its trading accounts using market value-based tools, such as VaR and sensitivity analysis.

#### 2 Equity price risk

Equity prick risk results from the Group's equity trading portfolio in Korean won since it does not have any trading exposure to shares denominated in foreign currencies. The equity trading portfolio in Korean won consists of exchange-traded stocks and nearest-month or second-nearest-month futures contracts under the strict diversified investment limits. The Group's risk management council sets annual and monthly stop-loss limits, position limits and sensitivity limits that are daily monitored by its Risk Management department.

### 3 Foreign exchange rate risk

Foreign exchange rate risk arises because the Group has assets and liabilities that are denominated in currencies other than Korean won, as well as off-balance-sheet items, such as foreign exchange forwards and currency swaps. Assets and liabilities denominated in U.S. dollars, Japanese yen and Euro are typically accounted for the majority of the Group's foreign currency assets and liabilities. The Group oversees its foreign exchange rate exposure for both trading and non-trading purposes by establishing a limit for net foreign currency open position, together with stop-loss limits.

<sup>(</sup>d) Market risk management for non-trading activities

## Notes to the Consolidated Financial Statements December 31, 2018 and 2017

#### a. Definition of non-trading position

The Group's principal market risk from non-trading activities is interest rate risk. Interest rate risk arises due to mismatches in the maturities or repricing periods of the rate-sensitive assets and liabilities. The Group measures interest rate risk for Korean won and foreign currency assets and liabilities in its bank accounts (including derivatives) and its principal-guaranteed trust accounts. Most of its interest-earning assets and interest-bearing liabilities are denominated in Korean won, and its foreign currency-denominated assets and liabilities are mostly denominated in U.S. dollars.

#### b. Measurement of market risk occurring at non-trading position

The Group's principal interest rate risk management objectives are to generate stable net interest income and to protect its asset value against interest rate fluctuations. The Group principally manages this risk for its non-trading activities by analyzing and managing maturity and duration gaps between its interest-earning assets and interest-bearing liabilities.

#### 4.5 Operational Risk

#### (a) General

The Group defines operational risk broadly to include all financial and non-financial risks that may arise from its operations that could negatively affect its capital.

#### (b) Operational risk management

The Group's operational risk management objectives include not only satisfying regulatory requirements, but also providing internal support through the encouragement of a strong risk management culture, reinforcement of internal controls, improvement of work processes and provision of timely feedback to management members and staff throughout the Group.

#### 4.6 Capital Management

In accordance with financial holding Group regulations, the Group is required to maintain a minimum 8% of the capital adequacy ratio. The capital adequacy ratio must correspond to the standard of capital regulation of the Bank for International Settlements (BIS), and is calculated by dividing own capital by asset (weighted with a risk premium – risk-weighted assets) based on the consolidated financial statements of a holding group. The Group calculates its capital adequacy ratio under Basel I, according to the Regulation on the Supervision of Financial Holding Companies.

In accordance with financial holding Group regulations, the Group must maintain the share capital-common ratio of 6.375%, Tier 1 capital ratio of 7.875% and total capital ratio of 9.875% as at December 31, 2018.

The risk-weighted asset includes intrinsic risks in total assets, errors of internal operation processes and loss risk from external events. It indicates a size of assets reflecting the level of risks that the Group bears. The Group computes the risk-weighted asset by risk (credit risk, market

## Notes to the Consolidated Financial Statements December 31, 2018 and 2017

risk and operational risk) and uses it for calculation of BIS capital ratio.

The Group's BIS capital ratios as at December 31, 2018 and 2017, are as follows:

(in millions of Korean won)		2018	2017		
Share capital - common (A)	₩	6,749,028	₩	6,408,895	
Other basic capital (B)		1,016,115		674,003	
Tier 2 capital (C)		1,530,316		1,639,930	
Total capital (D)	₩	9,295,459	₩	8,722,828	
Credit risk-weighted assets	₩	65,540,331	₩	61,892,421	
Market risk-weighted assets		459,250		401,182	
Operational risk-weighted assets	-	4,694,986		4,430,299	
Total risk-weighted assets (E)	₩	70,694,567	₩	66,723,902	
Share capital - common ratio (A/E) (%)		9.55		9.61	
Tier 1 capital ratio ((A+B)/E) (%)		10.98		10.62	
Total capital ratio (D/E) (%)		13.15		13.07	

## 5. Operating Segment Information

#### (a) Segment report and division information

Segment information indicates details of the Group's divisions. Main divisions of business are based on the Group's internal report. The Group consists of six business divisions: two divisions of bank, securities, capital, savings bank and other. Such business divisions are divided by products, characteristics of services, customers and organization of the Group. Based on these categories, the main information by divisions is disclosed as follows:

Operations by divisions for the years ended December 31, 2018 and 2017, are as follows:

## (b) Information on financial services and geographical areas

As the financial products of the Group are categorized as interest bearing, non-interest bearing and others, and the categorization is already reflected in the composition of the reportable segments above, revenue from external customers is not separately disclosed. Revenue by geographical areas is not separately disclosed as the Group operates its business domestically.

## Notes to the Consolidated Financial Statements December 31, 2018 and 2017

### 6. Financial Assets and Financial Liabilities

During the current year, there are no significant changes in business or economic circumstances that may influence fair value of the Group's financial assets and liabilities.

### (a) The Carrying Amount of Financial Instruments by Category

The carrying amounts and fair value of financial assets and financial liabilities by each category as at December 31, 2018 and 2017, are as follows:

## Notes to the Consolidated Financial Statements

**December 31, 2018 and 2017** 

(b) Fair value measurement method and assumptions by financial instruments

Fair value assessment method and assumptions are as follows:

#### Classification

#### Fair value measurement technique

Cash and due from banks The carrying amounts of cash are assumed to be, and demand due from banks and payment due from banks are reasonable approximation of fair values. These financial instruments do not have a fixed maturity and are receivable on demand. Fair value of ordinary due from banks is measured using DCF model (Discounted Cash Flow Model). However, if the contractual maturity and the interest resetting period from the settlement date are within 3 months, the carrying amounts are assumed to be the fair value.

Securities

The fair value of financial instruments that are quoted in active markets is determined using the quoted prices. Fair value is determined by independent third-party pricing services when quoted prices are not available. Pricing services use one or more of the valuation techniques, including Discounted Cash Flow Model ("DCF"), Imputed Market Value Model ("IMV"), Free Cash Flow to Equity Model, Dividend Discount Model, Risk-Adjusted Discount Rate Method, Net Asset Value Method.

**Derivatives** 

For exchange-traded derivative, a quoted price in active market is used to determine fair value and for over-the-counter ("OTC") derivative, fair value is determined using valuation techniques. The Consolidated Entity uses internally developed valuation models that are widely used by market participants to determine fair value of plain OTC derivatives, including options, interest rate swap and currency swap, based on observable market parameters. However, some complex financial instruments are valued using advanced internal valuation model or the results of independent pricing services, where part or all of the inputs are not observable in the market. OTC derivatives with closed-form solution in its valuation are valued using appropriate model. Complex derivative instruments where its valuation method cannot be defined by closed-form solution are valued using techniques, including Finite Difference Method and Monte Carlo Simulation.

Loans and receivables

DCF is used to determine the fair value of loans and receivables. When DCF Model is applied, the expected cash flow is calculated by applying the early redemption risk rate to the contractual cash flow calculated according to the contract terms, and discounted at appropriate discount rate to calculate fair value. For those loans and receivables with the residual maturities of less than three months as of the closing date and the ones with reset period of less than three months, the carrying amount is regarded as fair value.

Deposit liabilities

The carrying amount of demand deposit is regarded as fair value as it does not have maturity and the amount approximates the fair value. Fair value of time deposit is determined using DCF. Fair value is determined using appropriate discount rate and the expected cash flows by contractual cash flows with prepayment rate taken into account. For those deposits with the residual maturities of less than three months as of the closing date and the ones with a reset period of less than three months, the carrying amount is regarded as fair value.

Borrowings

Fair value is determined using DCF discounting contractual future cash flows by appropriate discount rate. However, for those borrowings with the residual maturities of less than three months as of the closing date and the ones with a reset period of less than three months, the carrying amount is regarded as fair value.

Debentures

Fair value is determined by using the valuation of independent third-party pricing services in accordance with the market prices that are quoted in active markets.

Other financial liabilities

For financial liabilities with the residual maturities of less than three months as of the closing date and the ones with a reset period of less than three months, the carrying amount is regarded as fair value.

## Notes to the Consolidated Financial Statements December 31, 2018 and 2017

## (c) Fair Value Hierarchy Classifications of the Financial Instruments that are Subsequently Measured at Fair Value

Fair value hierarchy classifications of the financial instruments that are subsequently measured at fair value as at December 31, 2018 and 2017, are as follows:

(in millions of Korean won)				20	018

## Notes to the Consolidated Financial Statements December 31, 2018 and 2017

The following table shows the sensitivity analysis to disclose the effect of reasonably possible alternative assumptions on the fair value of Level 3 financial instruments for the years ended December 31, 2018 and 2017:

(in millions of Korean won)	2018									
	Р	rofit (loss)	for t	he year	Other comprehensive income					
	Favorable changes		Unfavorable changes		Favorable changes		Unfavorable changes			
Financial assets										
Financial assets at fair value through profit or loss <sup>1</sup> Financial assets at fair value through other	₩	1,755	₩	(1,477)	₩	-	₩	-		
comprehensive income <sup>1</sup>		-		-		32,721		(15,238)		
Loans receivables at fair value through profit or loss <sup>2</sup>		750		(521)		-		-		
Derivative assets <sup>3</sup>		3,797		(15,753)		-		-		
Financial liabilities										
Derivative liabilities <sup>3</sup>		13,340		(36,420)		_				
	₩	19,642	₩	(54,171)	₩	32,721	₩	(15,238)		

<sup>&</sup>lt;sup>1</sup> Fair value changes of securities are calculated by increasing or decreasing growth rate (0% - 1%) and discount rate (-1% - 1%) or liquidation value (-1% - 1%) and discount rate (-1% - 1%). The growth rate, discount rate and liquidation value are major unobservable inputs

 $<sup>^2</sup>$  For convertible private bonds, changes in their fair value are calculated by decreasing the stock price (-20% - 20%), product price and others (-20% - 20%), and increasing or decreasing the interest rate (-2%p - 2%p), value of Korean won (-10% - 10%) and credit premium (additional interest rate) (-5%p - 5%p).

<sup>&</sup>lt;sup>3</sup> Changes in the fair value are calculated by increasing or decreasing 10% of KRW Swaption volatility that is a significant unobservable input variable related to Callable IRS.

## Notes to the Consolidated Financial Statements December 31, 2018 and 2017

Fair value changes of equity derivatives are calculated by increasing or decreasing share price or historical fluctuation rate of share price by 10%. The share price and historical fluctuation rate of share price are major unobservable inputs.

(in millions of Korean won)	2017

## Notes to the Consolidated Financial Statements December 31, 2018 and 2017

#### (e) Transfer of Financial Assets

The Group holds securities sold under repurchase and securities lending arrangements, and such transactions have resulted in transfer of financial assets. However, they have been recorded in the financial statements since the assets did not meet the removal criteria. In case of securities sold under repurchase agreements, the Group sells the assets to another party with a commitment to buy the assets back at a specified price. Loaned securities will be returned at the end of security lending agreement; hence, the Group retains substantially all the risks and rewards of ownership of the financial assets.

Details of carrying amounts of transferred assets and relevant liabilities at the reporting date are as follows:

(in millions of Korean won)		20	18		2017				
	aı tra	Carrying mount of ansferred assets	Carrying amount of related liabilities	of	aı tra	Carrying mount of ansferred assets	Carrying amounts of related liabilities		
Securities sold under repurchase agreement	₩	1,639,964 696,359	₩ (1,483,6	604)	₩	1,289,308 198,028	₩ (1,108,219)

#### Hedge

In order to hedge fluctuation risks of fair value due to changes in interest rate and foreign currency of structured deposits and issued financial bonds, a hedge accounting of fair value risk is applied that interest rate swaps and currency swaps are designated as a hedging instrument. In order to hedge currency fluctuation risks of net investments in foreign operations, a hedge accounting of net investments in foreign operations is applied that non-derivative financial instruments are

## Notes to the Consolidated Financial Statements December 31, 2018 and 2017

designated as a hedging instrument.

The valuation of derivatives designated as a hedging instrument as at December 31, 2018 and 2017, are as follows:

(in millions of Korean won)	2018										
	Valuation gain		Valuation loss		Assets		Liab	oilities			
Interest rate:											
Interest rate swaps	₩	8,132		3,370		1,072		27,517			
Currency rate:											
Currency rate swaps		343		3,178		343		3,178			
	₩	8,475		6,548		1,415		30,695

<sup>&</sup>lt;sup>1</sup> Transferred from construction in progress.

Impairment test on goodwill is based on value-in-use calculated by the recoverable amount of a cash-generating unit, and these calculations use pre-tax cash flow projections based on financial budgets covering a five-year period. The cost of capital reflected in discounting estimated cash flows is determined as follows:

Input	Applied rate	Basis
Risk free interest rate	2.11%	Average of one year from the valuation date
Corporate Beta	0.514	Reflecting capital structure of similar companies
Market rate premium (MRP)	10.01%	Average MRP of one year from the valuation date
Cost of capital	7.25%	

# Notes to the Consolidated Financial Statements December 31, 2018 and 2017

#### 21. Investment Properties

Investment properties as at December 31, 2018 and 2017, are as follows:

(in millions of Korean won)	2018											
, , , , , , , , , , , , , , , , , , ,	Acc	quisition cost		ımulated eciation	Accumo impair los	ment	Book amount					
Land	₩	99,857	₩	-	₩	-	₩	99,857

#### Operating lease

Building

(in millions of Korean won)

The Group entered in to various operating lease agreements for land and buildings which are classified as investment properties. The remaining periods of non-cancellable operating lease are within five years. The lease payments can be increased annually depending on the market condition under all operating lease agreements. The future minimum lease payments expected to be received in relation to the non-cancellable operating lease agreement for investment properties as at December 31, 2018 and 2017, are as follows:

(in millions of Korean won)	20	)18	2017		
Within one year	₩	1,143	₩	880	
Later than one year but not later than five years Later than five years		1,008 -		236	
,	₩	2,151	₩	1,116	

<sup>&</sup>lt;sup>1</sup> Reclassifications as at December 31, 2017, are due to change in lease ratio for investment in real properties.

# Notes to the Consolidated Financial Statements December 31, 2018 and 2017

## Notes to the Consolidated Financial Statements December 31, 2018 and 2017

#### 26. Net Defined Benefit Liabilities

#### Defined benefit plan

The Group operates a retirement benefit plan, which is an arrangement whereby the Group provides benefits as a lump sum, based on current salary and tenure of employment provided to employees on or after termination of their service. The retirement benefit plan is normally described as a defined benefit plan and its own characteristics are as follows:

- The obligation of the Group is to pay existing and previous employees promised retirement benefits.
- The Group will have the actuarial risk due to the fact that actual retirement benefits exceed expected retirement benefits and investment risk.

The defined benefit liabilities recognized in the consolidated financial statements is measured by an independent actuary. The Group uses the projected unit credit method in order to determine defined benefit liabilities.

Actuarial assumptions and variables, such as market rate risk, wage rate risk, death rate risk, consumer price index, expected rate of return and others, are based on market information and historical data and are renewed annually. Profit or loss incurred from the change in actuarial assumptions and the difference between assumptions and actual results are recognized for the year.

As at December 31, 2018 and 2017, the amounts recognized in the consolidated statements of financial position related to post-employment benefits are as follows:

(in millions of Korean won)		2018	2017		
Present value of funded defined benefit liabilities	₩	525,328	₩	445,125	
Fair value of plan assets		(453,328)		(413,396)	
Net defined benefit liabilities	₩	72,000	₩	31,729	

# Notes to the Consolidated Financial Statements December 31, 2018 and 2017

	₩	75,980	₩	333	₩	(66,891)	₩	223	₩	9,645

Provision for restoration costs is the present value of expected settlement cost for the existing leasehold stores as at December 31, 2018 and 2017, which is discounted at an appropriate discount rate. Provision for restoration costs will be incurred at the end of lease contract of leasehold store, and average lease period of leasehold stores terminated within three years is used for estimation. Actual average restoration costs of leasehold stores for the past seven years and average inflation rate for the past three years are used for estimating the expected settlement cost.

# Notes to the Consolidated Financial Statements December 31, 2018 and 2017

#### (e) Retained earnings

Retained earnings as at December 31, 2018 and 2017, are as follows:

(in millions of Korean won)	2018		2017	
Reserve:				
Earned profit reserves <sup>1</sup>	₩	539,559	₩	481,671
Regulatory reserve for credit loss		548,168		490,391
Discretionary reserves		2,254,884		2,125,577
		3,342,611		3,097,639
Retained earnings before appropriation		1,410,392		1,320,242
	₩	4,753,003	₩	4,417,881

<sup>&</sup>lt;sup>1</sup> Article 53 of The Financial Holding Company Act requires a Parent Company to appropriate at least 10% of profit for the period to legal reserve, until such reserve equals 100% of its paid-up capital. This reserve is not available for payment of cash dividends; however, it can be used to reduce deficit or be transferred to capital.

#### Regulatory reserve for credit loss

In accordance with the Regulations for Supervision of Financial Company Holding, if provision for impairment under Korean IFRS for the accounting purpose do not exceed those for the regulatory purpose, the Group discloses such shortfall amount as regulatory reserve for credit loss. Due to the fact that regulatory reserve for credit loss is a discretionary reserve, amounts exceeding the existing reserve for credit loss are over the compulsory reserve for credit loss at the period-end date and are able to be reversed in profit. In case of accumulated deficit, the Group should set aside reserve for credit loss at the time when accumulated deficit is gone.

Regulatory reserve for credit loss as at December 31, 2018 and 2017, is as follows:

(in millions of Korean won)	2	2018		2017	
Provided reserve for credit loss <sup>1</sup>	₩	548,168	₩	490,391	
Changes in accounting policy		(67,122)		-	
Expected provision of reserve for credit loss		9,028		57,777	
Regulatory reserve for credit loss	₩	490,074	₩	548,168	
Owners of the Parent Company	₩	490,074	₩	548,168	
Non-controlling interests		_		_	

<sup>&</sup>lt;sup>1</sup> Provided reserve for credit loss as at December 31, 2018 and 2017, is the amount after appropriations of retained earnings.

## Notes to the Consolidated Financial Statements December 31, 2018 and 2017

Expected provision of reserve for credit losses, adjusted profit after the provision of regulatory reserve and adjusted earnings per share after the provision of regulatory reserve for the years ended December 31, 2018 and 2017, are as follows:

(in millions of Korean won)	2018		2017	
Profit for the year of owners of the Parent Company	₩	502,095	₩	403,100
Provision of reserve for credit losses		9,028		57,777
Adjusted profit after the provision of regulatory				
reserve <sup>1</sup>	₩	493,067	₩	345,323
Adjusted earnings per share after the provision of		<u> </u>		_
regulatory reserve¹ (in Korean won)	₩	1,447	₩	1,023

<sup>&</sup>lt;sup>1</sup> Adjusted profit and earnings per share after provision of reserve for credit loss are not in accordance with Korean IFRS, but are calculated on the assumption that provision or reversal of reserve for credit loss is adjusted to the profit for the year of owners of the Parent Company. Earnings per share after provision of reserve for credit loss are presented net of dividends on hybrid equity securities.

#### 30. Net Interest Income

Net interest income, interest income and expenses for the years ended December 31, 2018 and 2017, are as follows:

(in millions of Korean won)		2018		2017	
Interest income					
Due from banks	₩	8,048	₩	8,178

### (a) Share-based Payments

The Group has granted share-based payments to its executives and employees, and measured the cost of the share options by a fair value approach. The share-based payments is an incentive plan that sets, on grant date, the maximum number of shares that can be awarded. Actual shares to be granted is determined and paid in cash in accordance with achievement of performance targets over the vesting period.

The performance compensation shall be paid in cash of 40% by the chairman, the executive director, the bank president, and 60% by the other executives and the business executive, and the remaining compensations shall be deferred in connection with the share price for three years.

## Notes to the Consolidated Financial Statements December 31, 2018 and 2017

### 41. Earnings Per Share

Basic earnings per share are calculated by dividing profit attributable to owners of Parent Company by weighted average number of ordinary shares outstanding for the years ended December 31, 2018 and 2017.

Weighted average number of ordinary shares for the years ended December 31, 2018 and 2017, are as follows:

(in shares)		2018		
	Number of			Weighted average
	ordinary shares	Days		number of shares
Beginning	325,920,391		365	118,960,942,715
Weighted average number of ordinary shares				325,920,391
(in shares)		2017		
	Number of			Weighted average
	ordinary shares	Days		number of shares
Beginning Weighted average number of	325,920,391		365	118,960,942,715
ordinary shares				325,920,391

## Notes to the Consolidated Financial Statements December 31, 2018 and 2017

Basic earnings per share attributable to owners of the Parent Company for the years ended December 31, 2018 and 2017, are as follows:

(in Korean won and in shares)	2018			2017
Profit for the year attributable to owners of the				
Parent Company	₩	502,094,859,921	₩	403,100,234,100
Dividends on hybrid equity securities		(21,499,628,995)		(11,930,000,000)
Profit attributable to the ordinary equity holders		480,595,230,926		391,170,234,100
Weighted average number of ordinary shares				
outstanding		325,920,391		325,920,391
Basic earnings per share	₩	1,475	₩	1,200

Diluted earnings per share for the years ended December 31, 2018 and 2017, are equal to the basic earnings per share because the Group did not have any potentially dilutive ordinary shares during the year.

#### Lawsuits

As at December 31, 2018 and 2017, the Group's major lawsuits are as follows:

(in millions of Korean won)		2018				2017			
	As a plaintiff		As a defendant		As a plaintiff		As a defendant		
Number (case)		44 cases		67 cases		35 cases		62 cases	
Amount	₩	177,383	₩	31,094	₩	94,316	₩	86,367	
Provisions related to these lawsuits			₩	_			₩	440	

The Group filed a lawsuit against Korea Deposit Insurance Corporation to seek compensation for loss (litigation value: \( \psi 53.2 \) billion) as at the end of the reporting period. On December 15, 2017, the court ordered Korea Deposit Insurance Corporation to pay \( \psi 53.2 \) billion to the Group in the first trial. In respect of the first court decision, Korea Deposit Insurance Corporation paid \( \psi 53.2 \) billion in advance and the Group recognized the corresponding amount as other liabilities. In the second trial held on January 24, 2019, the Group has decided to returned back certain amount to Korea Deposit Insurance Corporation, which is the case after the reporting period that requires amendment, and the amount of the liability has been revised including the interest paid after the end of the reporting period. In addition, although the Group returned the loss and filed an appeal for the final judgement in the Supreme Court on February 13, 2019, and the ultimate outcome of the appeal cannot be reasonably estimated, the management judges that the outcome of the suit does not exceed the amount of the liability recognized at the end of the reporting period.

### Others

BNK Financial Group, Inc., Busan Bank, BNK Securities Co., Ltd., and their former and current employees were accused of in a lawsuit with violation of the Financial Investment Services and Capital Markets Act anti-competitive transactions BNK Financial Group Inc. second capital increase by Busan District Public Prosecutor's Office on May 1, 2017. First court decision was made for the violation of certain former employees on January 9, 2018. The final outcome of this case and its financial effect cannot be predicted at the end of the reporting period.

## Notes to the Consolidated Financial Statements December 31, 2018 and 2017

A former executive of Busan Bank was filed in a lawsuit with violation of the Act on the Specified Economic Crime, Severe Punishment, etc. such as misappropriation during establishing the credit lines for BL Co., Ltd. related to the project of Haeundae LCT., by Busan District Public Prosecutor's Office on February 8, 2019. The ultimate outcome of this case and its financial effect cannot be predicted at the end of the reporting period.

After the end of the reporting period, Busan Bank has been involved in a lawsuit as a defendant amounting to  $\pm 44,250$  million. The ultimate outcome of this case and its financial effect cannot be predicted at the end of the reporting period.

#### 46. Dividends

A dividend in respect of the year ended December 31, 2018, of  $\forall 300$  per share, amounting to a total dividend of  $\forall 97,776$  million, is to be proposed to shareholders at the annual general meeting on March 28, 2018. These financial statements do not reflect this dividend payable.

#### 47. Unconsolidated Structured Entities

The Group owns interests in unconsolidated structured entities where the Group does not have control in accordance with Korean IFRS 1110. The natures of interests and risks are as follow:

Interests owned by the Group in unconsolidated structured entities has been classified per nature and purpose of each structured entity into structured financing and investment fund.

## Notes to the Consolidated Financial Statements December 31, 2018 and 2017

Unconsolidated structured entities classified as 'structured financing' include real estate project financing investment entity, infrastructure development entity and special-purpose entity for shipping and aviation financing. Each entity was incorporated as a separate entity to efficiently carry out the Group's business. The funds are raised through channels such as equity investments, loans from financial institutions and participating organizations. Structured financing is a way of funding large scale businesses with risks. The structured financing invests in qualifying companies not based on credit or physical collateral of the Group leading the project, but the economic feasibilities of the specific project. Investors of the entity benefit from the income arising from the ongoing projects and the Group recognizes interest income, income from valuation of equity investments and dividend income. Although an entity that provides funds, joint guarantees, unsubordinated credit offerings and others exists prior to the Group's financial support, if the funds are not collected by the predetermined schedule or if circumstances such as cessation of a project occurs, the Group could be exposed to principal losses due to decrease in value of equity investments or losses arising from uncollectible loans.

Unconsolidated structured entities classified as 'investment fund' include investment trust company and private equity firm. The investment trust company delegates investment and management to fund managers according to the trust agreement and distributes operating profit to the investors. The private equity firm invests in equity securities through private placement in order to participate in management, enhance governance, and others. The income from the investment is distributed to the investors. The Group, an investor to the investment fund, recognizes income from valuation of equity investments and dividend income in proportion to its share ratio. If the value of the private equity fund decreases, the Group will be exposed to the risk of principal losses.

Total asset size of the unconsolidated structured entities, carrying amount for the line items as recognized in the consolidated financial statements, maximum exposure to loss and loss incurred for the years ended December 31, 2018 and 2017, are as follows:

statement of financial position, and the amount readily determinable when specific criteria of contracts including purchase agreement or credit grants are met.

#### 48. Approval of Issuance of the Financial Statements

The consolidated financial statements 2018 were approved for issue by the Board of Directors on February 12, 2019 and are subject to change with the approval of shareholders at their Annual General Meeting on March 28, 2019.

#### 49. Changes in Accounting Policies

- Adoption of Korean IFRS 1109 Financial Instruments

As explained in Note 2, the Group has applied Korean IFRS 1109 *Financial Instruments* on January 1, 2018, the date of initial application. In accordance with the transitional provisions in Korean IFRS 1109, comparative figures have not been restated. The application of Korean IFRS 1109 has following impacts on the financial statements.

#### (a) Classification and Measurement of Financial Instruments

The total impact on the Group's retained earnings due to classification and measurement of financial instruments as at January 1, 2018, is as follows:

(in millions of Korean won) January 1, 2018

### **Retained earnings**

Beginning balance - Korean IFRS 1039	₩	4,417,881
Reclassification of available-for-sale securities to financial assets at

Increase in provision for impairment of debt instruments at fair value		
through other comprehensive income		(730)
Increase in deferred tax relating to the provision for impairment		35,391
Adjustments to retained earnings from adoption of Korean IFRS		
1109		(66,666)
Beginning balance of retained earnings - Korean IFRS 1109	₩	4,351,215

# Notes to the Consolidated Financial Statements December 31, 2018 and 2017

### (b) Classification and Measurement of Financial Instruments

On the date of initial application of Korean IFRS 1109, January 1, 2018, the Group has assessed which business models apply to the financial assets held by the Group and has classified its financial instruments into the appropriate Korean IFRS 1109 categories. The main effects resulting from this reclassification are as follows:

(in millions of Korean won)	ass valu	inancial sets at fair ue through fit or loss	AF	S financial assets	as va	Financial sets at fair lue through other nprehensive income	as	TM financial ssets, loans and eceivables	;	Financial assets at ortized cost		Total

<sup>&</sup>lt;sup>1</sup> The adjustments arising from impairment of financial assets are not included. See Note 49 (a).

## Notes to the Consolidated Financial Statements December 31, 2018 and 2017

The impact on these changes on the Group's equity is as follows:

(in millions of Korean won)	Effect on accumulated other comprehensive income	Effects on fair value through other comprehensive income reserve	Effect on retained earnings
Beginning balance – Korean IFRS 1039 <sup>1</sup> Reclassification from available-for-sale financial assets to financial assets at fair value through	₩ 49,314	₩ -	₩ 4,417,881
profit or loss  Reclassification of equity investments that are not held for trading from available-for-sale financial assets to financial assets at fair value	(6,925)	-	6,925
through other comprehensive income Reclassification of privately placed convertible bonds from available-for-sale financial assets to financial assets at fair value through profit or	(87,883)	60,031	27,852
loss Reclassification of listed and unlisted debt securities from available-for-sale financial assets to financial assets at fair value through	-	-	(52)
other comprehensive income	45,494	(45,494)	-
Effect of other classification and measurement		<del>_</del>	423
	(49,314)	14,537	35,148
Beginning balance - Korean IFRS 1109 <sup>1</sup>	₩ -	₩ 14,537	₩ 4,453,029

<sup>&</sup>lt;sup>1</sup> The adjustments arising from impairment of financial assets are not included. See Note 49 (a).

### (c) Impairment of Financial Assets

The Group has three types of financial assets subject to Korean IFRS 1109's new expected credit loss model:

- · Loans and receivables carried at amortized cost
- debt investments carried at fair value through other comprehensive income, and
- debt investments carried at amortized cost.

Upon adoption of Korean IFRS 1109, accounting policies for recognition of impairment have changed. The impact of the change in impairment methodology on the Group's beginning balance of retained earnings is disclosed in the table on (a) above.

### (i) Loans and receivables

If the credit risk of loans and receivables has significantly increased since the initial recognition, a loss allowance at an amount equal to lifetime expected credit losses is recognized at the end of each reporting period. And if the credit risk has not significantly increased since the initial recognition, 12 month expected credit losses is recognized at the end of each reporting period.

# Notes to the Consolidated Financial Statements December 31, 2018 and 2017

#### (ii) Debt instruments

For debt instruments at amortized cost or fair value through other comprehensive income, that are determined to have low credit risk at the end of each reporting period, the Group applies a simplified approach which assumes that the credit risk on the financial instruments have not increased significantly since initial recognition.

- Application of Korean IFRS 1115 Revenue from contracts with customers

As explained in Note 2, the Group has applied Korean IFRS 1115 *Revenue from contracts with customers* from January 1, 2018. In accordance with the transitional provisions in Korean IFRS 1115, comparative figures have not been restated. The application of Korean IFRS 1115 has no impact on the consolidated interim financial statement.
